Principles of Rorschach Interpretation Irving B. Weiner, 2003-07-18 This second edition of Irving Weiner's classic comprehensive clinician friendly guide to utilizing the Rorschach for personality description has been revised to reflect both recent modifications in the Rorschach Comprehensive System and new evidence concerning the soundness and utility of Rorschach assessment. It integrates the basic ingredients of structural, thematic, behavioral, and sequence analysis strategies into systematic guidelines for describing personality functioning. It is divided into three parts. Part I concerns basic considerations in Rorschach testing and deals with conceptual and empirical foundations of the inkblot method and with critical issues in formulating and justifying Rorschach inferences. Part II is concerned with elements of interpretation that contribute to thorough utilization of data in a Rorschach protocol: the Comprehensive System search strategy, the complementary roles of projection and card pull in determining response characteristics, and the interpretive significance of structural variables, content themes, test behaviors, and the sequence in which various response characteristics occur. Each of the chapters presents and illustrates detailed guidelines for translating Rorschach findings into descriptions of structural and dynamic aspects of personality functioning. The discussion throughout emphasizes the implications of Rorschach data for personality assets and liabilities with specific respect to adaptive and maladaptive features of the manner in which people attend to their experience, use ideation, modulate affect, manage stress, view themselves, and relate to others. Part III presents 10 case illustrations of how the interpretive principles delineated in Part II can be used to identify assets and liabilities in personality functioning and apply this information in clinical practice. These cases represent persons from diverse demographic backgrounds and demonstrate a broad range of personality styles and clinical issues. Discussion of these cases touches on numerous critical concerns in arriving at different diagnoses, formulating treatment plans, and elucidating structural and dynamic determinants of behavior.

Contemporary Rorschach Interpretation J. Reid Meloy, Marvin W. Acklin, Carl B. Gacono, James F. Murray, 2013-10-31 Appreciation of the beauty and complexity of the human mind when perceiving an ambiguous stimulus led Dr. Hermann Rorschach to develop his scientific method eighty years ago. Full of gratitude for his brief life and work, the editors hope this volume will stand as an idiographic testament to his brilliance for the Rorschach students of the future. The contributors are clearly the most notable Rorschach clinicians in practice, and their work integrates the Comprehensive System and psychoanalytic methods. This book is organized into four sections. Within each of the first three sections devoted to psychotic, borderline, and neurotic disorders, respectively, the editors and invited authors have contributed Rorschach case studies which vertically cut a character pathology, personality disorder, or clinical diagnosis through a particular level of personality organization. The last section charts the enormously varied course that Rorschach work can navigate, from the understanding of a Nobel laureate, the pain of trauma and transsexuality, and the Nazi perversion of youth to the consensus Rorschach in couple's therapy and cutting edge work in neuropsychology.

Coping With Loss Susan Nolen-Hoeksema, Judith Larson, Judith M. Larson, 2013-01-11 Coping With Loss describes the many ways in which people cope with the death of someone they love Most earlier books on bereavement have fallen into two categories distillations of the clinical experience of individual therapists or collections of chapters reporting the results of empirical studies Each category is valuable but has tended to serve a narrow group of readers practitioners with particular theoretical orientations or researchers in quest of the latest findings Coauthored by a leading research psychologist and an experienced therapist who specializes in bereavement education and intervention this book is different The authors weave together the strands of theory research and clinical wisdom into a seamless and readable narrative While they discuss previous work they also present new data never before published from one of the largest studies of bereaved people ever conducted the Bereavement Coping Project Unlike most studies to date which focused on only one type of bereaved group usually widows or widowers the Bereavement Coping Project examined the experiences of several different groups during the first 18 months after the death The groups included those who had lost a spouse a parent an adult sibling or a child and those who had lost their significant other to cancer or cardiovascular disease on one hand as opposed to the stigmatized disease of AIDS on the other The book begins with a critical overview of theories of bereavement succeeding chapters explore in depth the impact of specific types of loss the impact of particular coping strategies on recovery the impact of social supports and religion and the special cases of children and of people who seem to grow and change for the better after a loss A final chapter considers implications for intervention with bereaved people Each chapter is richly illuminated with real life examples throughout and ends with a section called Voices in which bereaved people describe their various attempts to cope in their own words Insightful and informative

Sexual Murder Louis B. Schlesinger, 2021-03-22 Sexual Murder Catathymic and Compulsive Homicides is the culmination of the author's 45 years of experience with and studying sexually motivated homicide Sexual murders are generally of two types catathymic and compulsive Catathymic homicides are caused by a breakthrough of underlying sexual conflicts They can be unplanned explosive acute attacks or planned murders stemming from a chronic obsession with or disturbed attachment to the victim In compulsive homicides a fusion of sex and aggression results in a powerful internal drive which pushes the offender to seek out victims to kill and the killing itself is

sexually gratifying These murders also may be planned or unplanned In compulsive homicides that are unplanned the urge breaks through and disrupts the offender's controls when a victim of opportunity crosses his path The compulsive offender who plans his crimes often eludes law enforcement and as a result he can have multiple serial victims over extended periods of time Both forms of sexual murder the catathymic and the compulsive are presented in this volume from a clinical descriptive perspective encompassing case studies with analysis Recent advances in empirical research in sexual murder including findings from the joint research project between John Jay College of Criminal Justice and the FBI Behavioral Analysis Unit in Quantico has published many important studies These include such topics as necrophilia foreign object insertions in sexual homicide ritual and signature and temporal patterns in serial sexual homicide mass murder crime scene staging in homicide and undoing symbolic reversal at homicide scenes All such research will be included and incorporated into this fully updated Second Edition including approximately fifty new clinical case studies

Interpersonal Sensitivity Judith A. Hall, Frank J. Bernieri, 2001-06-01 Interpersonal sensitivity refers to the accuracy and or appropriateness of perceptions judgments and responses we have with respect to one another It is relevant to nearly all aspects of social relations and has long been studied by social personality and clinical psychologists Until now however no systematic or comprehensive treatment of this complex concept has been attempted In this volume the major theorists and researchers of interpersonal sensitivity describe their approaches both critically and integratively Specific tests and methods are presented and evaluated The authors address issues ranging from the practical to the broadly theoretical and discuss future challenges Topics include sensitivity to deception emotion personality and other personal characteristics empathy the status of self reports dyadic interaction procedures lens model approaches correlational and categorical measurement approaches thin slice and variance partitioning methodologies and others This volume offers the single most comprehensive treatment to date of this widely acknowledged but often vaguely operationalized and communicated social competency

Personality Disorders Mario Maj, 2005-03-11 Personality Disorders is a general term for a group of behavioural disorders characterised by usually lifelong ingrained maladaptive patterns of deviant behaviour lifestyle and social adjustment that are different in quality from psychotic and neurotic symptoms This book aims to review recent progress and current controversies in this area providing a guide to clinicians and a contribution to the ongoing revision of the two main diagnostic systems the DSM IV and ICD 10

The Mark of Cain J. Reid Meloy, 2013-06-17 The Mark of Cain makes available for the first time the accumulated psychoanalytic understanding of the psychopathic mind Editor Reid Meloy a leading authority on the psychology of the psychopath has brought together in a single collection the most historically important psychoanalytic papers on the psychopath and delineated their continuing relevance to contemporary understanding According to Meloy two theoretical traditions flow into the psychoanalytic understanding of psychopathy The first tributary focuses on the early development of the psychopath in order to illuminate how a profound alteration in self regard leads both to a denigration of the other and to

an impulsive search for gratification in the present The second tributary seeks to locate the psychopathic miscarriage of human potentiality within analytic theories of personality structure and clinically grounded differential diagnosis Meloy presents the major contributions associated with both of these traditions Included within this body of literature are the original formulations of concepts that have long since become part of the psychoanalytic nomenclature the affectionless juvenile offender the diagnostic significance of affect hunger the behavioral consequences of superego lacunae the recourse to promiscuous identification in the impostor and the paradoxically lethal lure of malignant narcissism Of special interest are Meloy's historical notes to each chapter and two section introductions the latter major essays in their own right The explosion of empirical research on psychopathy over the past two decades masks the fact that much contemporary work in this area is grounded in the clinical formulations of leading psychoanalysts of the twentieth century The Mark of Cain rescues this intimate understanding of the inner world of the psychopath and thereby contributes to clinical realism in the face of deception manipulation exploitation and even frank dangerousness
