Sam Nunn On Arms Control:

Sam Nunn on Arms Control Sam Nunn, Kenneth W. Thompson, 1987 Senator Nunn stands out among American leaders as a spokesman for a strong defense who recognizes as Churchill did that defense must not be considered an end in itself but as it relates to foreign policy objectives Senator Nunn has made an important contribution to arms control through innovative proposals for such arrangements as risk reduction centers The breadth of his foreign policy thinking goes beyond defense In this book the reader can trace Senator Nunn's views on a variety of arms control issues in the 1980s What is most striking is the consistency of his approach and the continuity of his thought **Sam Nunn on arms control** Sam Nunn, 1987 *Arms Control* Robert E. twenty first century A new paradigm in arms control is gradually replacing the idea that mutually agreed restrictions on armaments can improve international security Thus Hedley Bull s classic definition of arms control as the cooperation between antagonistic pairs of states in military affairs needs to be amended by a new notion of coercive arms control as the set of non cooperative and non reciprocal measures to restrict the weapons or military capabilities of certain states This volume addresses the topic of how this ongoing paradigmatic shift will affect the effectiveness of arms control as a conflict management instrument While some argue that new instruments can complement and strengthen traditional multilateral and inclusive arms control regimes others maintain that conflicts and contradictions between coercive and cooperative arms control regimes will severely limit their effectiveness This volume provides a forum for academics and practitioners from around the globe to discuss these developments in depth and to assess the specific strengths and weaknesses of these new instruments of arms control This book will be of much interest to students of arms control global governance foreign policy and IR Security Studies in general

Arms Control: The U.S. Perspective , A Global History of the Nuclear Arms Race Richard Dean Burns, Joseph M. Siracusa, 2013-04-23 Written by two preeminent authors in the field this book provides an accessible global narrative of the nuclear arms race since 1945 that focuses on the roles of key scientists military chiefs and political leaders The first book of its kind to provide a global perspective of the arms race this two volume work connects episodes worldwide involving nuclear weapons in a comprehensive narrative fashion Beginning with a discussion of the scientific research of the 1930s and 1940s and the Hiroshima decision the authors focus on five basic themes political dimensions technological developments military and diplomatic strategies and impact The history of the international nuclear arms race is examined within the context of four historical eras America s nuclear monopoly America s nuclear superiority superpower parity and the post Cold War era Information about the historical development of the independent deterrence of Britain France and China as well as the piecemeal deterrence of newcomers Israel India Pakistan and North Korea is also included as is coverage of the efforts aimed at the international control of nuclear weapons and the diplomatic architecture that underpins the global nuclear non proliferation regime

China and Global Nuclear Order Nicola Horsburgh, 2015-02-12 This book offers an empirically rich study of Chinese nuclear weapons behaviour and the impact of this behaviour on global nuclear politics since 1949 China s behaviour as a nuclear weapons state is a major determinant of global and regional security For the United States there is no other nuclear actor with the exception of Russia that matters more to its long term national security However China s behaviour and impact on global nuclear politics is a surprisingly under researched topic Existing literature tends to focus on narrow policy issues such as misdemeanours in China s non proliferation record the uncertain direction of its military spending and nuclear force modernization or enduring opaqueness in its nuclear policy This book proposes an alternative context to understand both China s past and present nuclear behaviour its engagement with the process of creating and maintaining global nuclear order The concept of global nuclear order is an innovative lens through

which to consider China as a nuclear weapons state because it draws attention to the inner workings institutional and normative that underpin nuclear politics It is also a timely subject because global nuclear order is considered by many actors to be under serious strain and in need of reform Indeed today the challenges to nuclear order are numerous from Iranian and North Korean nuclear ambitions to the growing threat of nuclear terrorism This book considers these challenges from a Chinese perspective exploring how far Beijing has gone to the aid of nuclear order in addressing these issues Bulletin of the Atomic Scientists ,1988-10 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world Nuclear Deterrence And Global Security In Transition David Goldfischer,2019-04-08 This book contains papers presented at a conference held at the University of California s Institute on Global Conflict and Cooperation in 1991 The papers reflect the spectrum of thought in the expert community that is likely to frame the policy debate over the future of nuclear deterrence *Department of Defense Authorization for Appropriations for Fiscal Year 1994 and the Future Years Defense Program* United States.
