The Frankfurt School Rolf Wiggershaus, 1994 The book is based on documentary and biographical materials that have only recently become available As the narrative follows the Institute for Social Research from Frankfurt am Main to Geneva New York and Los Angeles and then back to Frankfurt Wiggershaus continually ties the evolution of the school to the changing intellectual and political contexts in which it operated Social Movements Rudolf Heberle, Chapter introducing students of social policy to social movements and their importance to the policy process **Constitutional Theory** Carl

Schmitt,2008-01-23 This volume makes Schmitt s provocative work on comparative constitutionalism available in English for the first time since it was published in 1928 in Germany **Public Law in Germany, 1800-1914** Michael Stolleis,2001 He argues that the concept of family resemblances as that concept has been refined and extended in prototype theory in the contemporary cognitive sciences is the most plausible analytical strategy for resolving the central problem of the book In the solution proposed religion is conceptualized as an affair of more or less rather than a matter of yes or no and no sharp line is drawn between religion and non religion BOOK JACKET Karl Lueger Richard S. Geehr,1990 A biography of the Christian Social mayor of Vienna 1897 1910 Ch 5 p 171 207 Running with the Hares Hunting with the Hounds discusses Lueger s antisemitism which many historians have tended to discount While leaving open the question of Lueger s personal convictions argues that his antisemitic remarks and those of his party associates exerted an extremely harmful influence which continued through the First Republic and is still felt today and that only the limitations imposed on him by the Emperor prevented drastic measures against the Jews Reviews the position of Lueger and the Christian Socialists in the debate over Jews at the university especially the medical school the antisemitic productions of Adam M ller Guttenbrunn s Kaiserjubil ums Stadttheater the Aryan Theater and demands for segregation in the public schools **The Elgar Companion to Law and Economics** Jürgen G. provoking book a team of distinguished scholars revisits this notion to assess its continuing utility and establish a common vocabulary for debates on these issues Drawing on new political and economic theories and emphasizing recent events the authors examine the East Asian experience to show how the developmental state involves a combination of political bureaucratic and moneyed influences that shape economic life in the region Taking as its point of departure Chalmers Johnson s account of the Japanese developmental state the book explores the interplay of forces that have determined the structure of opportunity in the region The authors critically address the argument for centralized political involvement in industrial development with a new contribution by Johnson describe the historical impact of colonialism and the Cold War consider new ideas in economics and compare the experiences of East Asian countries with those of France Brazil Mexico and India

Table of contents *State-Making in an Age of Revolution, 1830-1880* Christos Aliprantis,Anna Ross,2025-07-02 How did states expand in the mid nineteenth century While scholars now associate the period after the 1848 revolutions with a striking increase in state activity few have demonstrated how new state building measures were put into practice From France to Hungary and Scandinavia to Spain *State Making in An Age of Revolution* shows how officials went about implementing reform With original contributions grounded in extensive archival research this volume casts light on the scale at which officials relied on elites professionals and technical experts both inside and outside of government and even from outside their own states to carry out their expanding work Together these findings help us to re think the reach and nature of growing states during these pivotal decades of change

The Public's Law Blake Emerson,2019 The Public s Law is a theory and history of democracy in the American administrative state The book describes how American Progressive thinkers such as John Dewey W E B Du Bois and Woodrow Wilson developed a democratic understanding of the state from their study of Hegelian political thought G W F Hegel understood the state as an institution that regulated society in the interest of freedom This normative account of the state distinguished his view from later German theorists such as Max Weber who

adopted a technocratic conception of bureaucracy and others such as Carl Schmitt who prioritized the will of the chief executive. The Progressives embraced Hegel's view of the connection between bureaucracy and freedom but sought to democratize his concept of the state. They agreed that welfare services, economic regulation and official discretion were needed to guarantee conditions for self-determination. But they stressed that the people should participate deeply in administrative policymaking. This Progressive ideal influenced administrative programs during the New Deal. It also sheds light on interventions in the War on Poverty and the Second Reconstruction as well as on the Administrative Procedure Act of 1946. The book develops a normative theory of the state on the basis of this intellectual and institutional history with implications for deliberative democratic theory, constitutional theory and administrative law. On this view, the administrative state should provide regulation and social services through deliberative procedures rather than hinge its legitimacy on presidential authority or economic reasoning.

The Exercise of Public Authority by International Institutions Armin Bogdandy, Rüdiger Wolfrum, Jochen Bernstorff, Philipp Dann, Matthias Goldmann, 2010-02-11. The concept of global governance, which first emerged in the social sciences, has triggered different responses in the discipline of law. This volume contains our proposal. It approaches global governance from a public law perspective which is centered around the concept of international public authority and relies on international institutional law for the legal conceptualization of global governance phenomena. This proposal results from a larger project which started in 2007. The project is a collaborative effort of the directors of the Max Planck Institute for Comparative Public Law and International Law, research fellows and friends of the Institute as well as eminent members of the Law Faculty of the University of Heidelberg. Most of the materials contained in this volume were first published in the November 2008 issue of the German Law Journal (<http://www.germanlawjournal.com>). We would like to express our sincere gratitude to the journal's editors in chief, Professors Russell Miller (Washington University School of Law) and Peer Zumbansen (Osgoode Hall Law School, York University, Toronto) for the opportunity to publish our papers as a special issue of their journal. The 2008-2009 University of Idaho College of Law German Law Journal student editors deserve special recognition for their hard and diligent work during the publication process. At the Institute, Eva Richter, Michael Riegner and the editorial staff of this publication series were instrumental in bringing this publication to fruition.

Ideas and Events Leonard Krieger, 1992-11. Leonard Krieger has long been revered as a contemporary master historian. With an eye toward placing his critical achievements before an expanded readership, he helped compile this core collection of his most important essays. Together, these essays bring under a single cover the key themes and ideas of his life's work to serve as a handbook for intellectual history and historians of every stripe. This book reflects Krieger's conviction that the value of intellectual history is as a source of orientation in a world of information overload. In Krieger's hands, intellectual history has stressed thinking through the relations between ideas and events rather than the compilation and recapitulation of mere facts and historical categories. The essays in this collection cover a range of topics including history of ideas.

intellectual history early modern political history German political history Hegel Marx and more Many of these essays are already classics of historical scholarship With the demise of the Soviet Union and state sponsored Marxism and with the reunification of Germany Krieger's history takes on new relevance and a renewed importance With a splendid introduction by Michael Ermath and an extensive bibliography of Krieger's most important books and essays this is a must read for every serious student of modern history Leonard Krieger was University Professor Emeritus in the Department of History at the University of Chicago until his death in 1990

The State as Utopia Jürgen Backhaus, 2010-11-25 This book examines utopias in classical political economy and is based on the papers presented by leading scholars at the 22nd Heilbronn Symposium in the Economics and the Social Sciences The book focuses on the tension between the State and utopia the State as utopia vs utopia instead of a state The contributors also study the question of whether seafaring and landlocked states visualize the commonwealth differently and develop different utopias and it is concluded they do not The volume therefore follows the refutation of the Schumpeterian Hypothesis that more concentrated industries stimulate innovation Though the hypothesis is refuted it still remains important the chapters argue because it charts out an entire research program serves as a benchmark of definite public and private sector boundaries and defines the grammar of discourse for constitutional economic policy in OECD states These themes are explored in detail through contributions by economists philosophers and social historians The contributors examine utopias hitherto never or rarely reviewed in the English language making this book of interest to students and scholars in economics political science and the history of economic thought

The Implementation of the EU Services Directive Ulrich Stelkens, Wolfgang Weiß, Michael Mirschberger, 2012-02-25 The EU Services Directive is one of the cornerstones for the realization of the EU internal market and is fundamental to economic and legal experts in governments trade and industry as well as to the general public This book analyses in detail the different steps taken by each of 26 EU Member States all but Greece in the implementation process of the Services Directive It provides not only detailed information about the changes in national law adopted by the Member States but also facilitates a comparison of the different implementation strategies It gives an insight in the heterogeneity or homogeneity of implementation concepts and shows how European legislation affects legislation that was originally nationally dominated such as the law of national administration This book is valuable reading for academics interested in European and administrative law and the transposition of European directives into domestic law as well as for practitioners and civil servants in ministries chambers of commerce local governments and other comparable institutions having to implement the Directive Ulrich Stelkens and Wolfgang Wei are both University Professors of Law at the German University of Administrative Sciences Speyer and Ordinary Members of the German Research Institute for Public Administration Speyer Michael Mirschberger Ass Jur is research assistant at both institutions
