enigmatic physicist whose work in creating the atomic bomb would forever impact modern history His first and most intense love was for Jean Tatlock though he married the tempestuous Kitty Harrison both were members of the Communist Party and was rumored to have had a scandalous affair with the brilliant Ruth Sherman Tolman ten years his senior and the wife of another celebrated physicist Although each were connected through their relationship to Oppenheimer their experiences reflect important changes in the lives of American women in the 20th century the conflict between career and marriage the need for a woman to define herself independently experimentation with sexuality and the growth of career opportunities Beautifully written and superbly researched through a rich collection of firsthand accounts this intimate portrait shares the tragedies betrayals and romances of an alluring man and three bold women revealing how they pushed to the very forefront of social and cultural changes in a fascinating volatile era

The Atomic Bomb and American Society Rosemary B. Mariner, G. Kurt Piehler, 2009 Drawing on the latest research on the atomic bomb and its history the contributors to this provocative collection of eighteen essays set out to answer two key questions First how did the atomic bomb a product of unprecedented technological innovation rapid industrial scale manufacturing and unparalleled military deployment shape U S foreign policy the communities of workers who produced it and society as a whole And second how has American society's perception that the bomb is a means of military deterrence in the Cold War era evolve under the influence of mass media scientists public intellectuals and even the entertainment industry In answering these questions *The Atomic Bomb and American Society* sheds light on the collaboration of science and the military in creating the bomb the role of women working at Los Alamos the transformation of nuclear physicists into public intellectuals as the reality of the bomb came into widespread consciousness the revolutionary change in military strategy following the invention of the bomb and the development of Cold War ideology the image of the bomb that was conveyed in the popular media and the connection of the bomb to the commemoration of World War II As it illuminates the cultural social political environmental and historical effects of the creation of the atomic bomb this volume contributes to our understanding of how democratic institutions can coexist with a technology that affects everyone even if only a few are empowered to manage it Rosemary B Mariner is formerly Joint Chiefs of Staff Chair and Professor of Military Studies for the National War College She is currently a lecturer in history at the University of Tennessee Knoxville G Kurt Piehler is associate professor of history and former director of the Center for the Study of War and Society at the University of Tennessee Knoxville which hosted the conference that formed the basis of this volume He is the author of *Remembering War the American Way* and *World War II in the American Soldiers Lives Series* as well as the coeditor with John Whiteclay Chambers II of *Major Problems in American Military History*

Atomic Frontier Days John M. Findlay, Bruce W. Hevly, 2011-10-01 Outstanding Title by Choice Magazine On the banks of the Pacific Northwest's greatest river lies the Hanford nuclear reservation an industrial site that appears to be at odds with the surrounding vineyards and desert The 586 square mile compound on the Columbia River is known both for its origins as part of the Manhattan Project which made the first atomic bombs and for the monumental effort now under way to clean up forty five years of waste from manufacturing plutonium for nuclear weapons Hanford routinely makes the news as scientists litigants administrators and politicians argue over its past and its future It is easy to think about Hanford as an expression of federal power a place apart from humanity and nature but that view distorts its history Atomic Frontier Days looks through a wider lens telling a complex story of production community building politics and environmental sensibilities In brilliantly structured parallel stories the authors bridge the divisions that accompany Hanford's headlines and offer perspective on today's controversies Influenced as much by regional culture economics and politics as by war diplomacy and environmentalism Hanford and the Tri Cities of Richland Pasco and Kennewick illuminate the history of the modern American West
