

LOST LINES: NORTH EASTERN REGION

Since the Nationalisation of Britain's railways in 1948 the nation's railway network has almost halved, with the closure of duplicate and unremunerative lines. Although Dr Beeching is widely regarded as the perpetrator of the policy that led to many of these closures — in so far as he was Chairman at the time of the infamous Reshaping Report in the early 1960s — it was a process that had started well before his rise to power. The result of these closures is that Britain has a remarkable heritage of closed railways and stations, some well known and others less familiar, but all of which have a fascinating history.

In the 'Lost Lines' series Nigel Welbourn, who over more than 30 years has visited and revisited most railway lines in the British Isles, provides an illustrated history to many of these lines. Dividing the country into the BR regions, each volume is illustrated with a superb range of some 250 mono illustrations — photographs, maps, ephemera and tickets.

This volume, covering the North Eastern Region, examines many of the most fascinating lines in the area, including closed sections of the historic Stockton & Darlington Railway, the Derwent Valley Light Railway, the Border Counties Railway and the line from Whitby to Scarborough, and many other lines, all of which have a remarkable story to tell.

General Land Office,1916 *The Myth of the Lost Cause* Edward H. Bonekemper,2015-10-05 History isn't always written by the winners Twenty first century controversies over Confederate monuments attest to the enduring significance of our nineteenth century Civil War As Lincoln knew the meaning of America itself depends on how we understand that fratricidal struggle As soon as the Army of Northern Virginia laid down its arms at Appomattox a group of Confederate officers took up their pens to refight the war for the history books They composed a new narrative the Myth of the Lost Cause seeking to ennoble the sacrifice and defeat of the South which popular historians in the twentieth century would perpetuate Unfortunately that myth would distort the historical imagination of Americans north and south for 150 years In this balanced and compelling correction of the historical record Edward Bonekemper helps us understand the Myth of the Lost Cause and its effect on the social and political controversies that are still important to all Americans Lost Maps of the Caliphs Yossef Rapoport,Emilie Savage-Smith,2018-12-11 About a millennium ago in Cairo an unknown author completed a large and richly illustrated book In the course of thirty five chapters this book guided the reader on a journey from the outermost cosmos and planets to Earth and its lands islands features and inhabitants This treatise known as The Book of Curiosities was unknown to modern scholars until a remarkable manuscript copy surfaced in 2000 Lost Maps of the Caliphs provides the first general overview of The Book of Curiosities and the unique insight it offers into medieval Islamic thought Opening with an account of the remarkable discovery of the manuscript and its purchase by the Bodleian Library the authors use The Book of Curiosities to re evaluate the development of astrology geography and cartography in the first four centuries of Islam Their account assesses the transmission of Late Antique geography to the Islamic world unearths the logic behind abstract maritime diagrams and considers the palaces and walls that dominate medieval Islamic plans of towns and ports Early astronomical maps and drawings demonstrate the medieval understanding of the structure of the cosmos and illustrate the pervasive assumption that almost any visible celestial event had an effect upon life on Earth Lost Maps of the Caliphs also reconsiders the history of global communication networks at the turn of the previous millennium It shows the Fatimid Empire and its capital Cairo as a global maritime power with tentacles spanning from the eastern Mediterranean to the Indus Valley and the East African coast As Lost Maps of the Caliphs makes clear not only is The Book of Curiosities one of the greatest achievements of medieval mapmaking it is also a remarkable contribution to the story of Islamic civilization that

opens an unexpected window to the medieval Islamic view of the world East Rome, Sasanian Persia and the End of Antiquity James Howard-Johnston, 2024-10-28 The last longest and most damaging of the wars fought between East Rome and Sasanian Persia 603-628 brought the classical phase of west Eurasian history to a dramatic close Despite its evident significance not least as the distant setting for Muhammad's prophetic mission this last great war of antiquity attracted comparatively little scholarly attention until the last decades of the twentieth century James Howard Johnston's contributions to the subject most of which were published in out of the way places one that on al Tabari is printed for the first time are brought together in convenient form in this volume They strive to root history in close observation of landscape and monuments as well as careful analysis of texts They explore the evolving balance of power between the two empires look at events through Roman Armenian and Arab eyes and home in on the climax of the final conflict in the 620s *Erie East Side Access Study, Erie County*, 1996
