Around the World in 80 Years Ranulph Fiennes, 2024-03-07 The extraordinary life and adventures of the world s greatest living explorer perfect for fans of The Moth and the Mountain and Touching the Void On the eve of his 80th birthday Sir Ranulph Fiennes looks back at his remarkable life and adventures He s climbed Everest not long after a heart bypass operation he s run seven marathons on seven continents he s hauled loaded sledges across both polar ice caps and he s circumnavigated the earth Ran Fiennes truly is the world s greatest explorer and this book celebrates his 80th birthday by showcasing his greatest achievements in his own words Featuring interviews and tributes from his friends colleagues and admirers Around the World in 80 Years celebrates the incredible life of a legendary explorer PRAISE FOR SIR RANULPH FIENNES Always that little bit further and always the best It is why even to this day I remain in awe at all he has accomplished Bear Grylls His ground breaking expeditions have redefined what is possible but have also ignited a fire within the hearts of those seeking their own extraordinary journeys Levison Wood That sunny March day on top of the Eiger represented the beginning of the end of our days climbing together Looking at Ran s grizzly bearded face I was yet to realise what he had planted within me but I knew it was there As the mist rolled in for a while it looked like we might be stuck but I didn t mind at all I simply had to channel my inner Ran Kenton Cool His public persona is that of the intrepid man of action overcoming insuperable odds to achieve feats of superhuman endurance and danger But with the children he was gentle patient and kind Monty Don Ran seeks out dangers because the experience of intense situations such as facing a polar bear or a heavy snowstorm and his ability to overcome them feels like a confirmation of his own vitality Erling Kagge If an opportunity were to come again to step out of life there is no question as to whom I would wish for a companion I would go with Ran Mike Stroud No great experience in life is worth anything without overcoming your fears I usually say when I give talks Then I think of Ran I wanted to say how impressed I am that he just keeps going and never stops Borge Ousland **A Further Record** Peter Demianovich Ouspensky, MR O Recurrence is in eternity It is not the same life This life ends and time ends There is a theory and this system admits this theory that time can be prolonged I have no evidence If you think about time how many attempts were made by spiritualists and others but there is no evidence The study of recurrence must begin with the study of children s minds and particularly before they begin to speak If they could remember this time they could remember very interesting things But unfortunately when they begin to speak they become real children and they forget after six months or a year It is very seldom that people remember what they thought before that at a very early age They

would remember themselves such as they were grown up They are not children at all Then later they become children If they remember their mentality it is the same mentality as grown up people have That is what is interesting Q Do you know why a child should remember its grown up mind and not its previous child s mind MR O We have so little material to judge about it I speak only about the way it can be studied Suppose we try to remember our own suppose we find it was one or another trying not to let imagination come in if we find something that would be material In literature you find very little because people don t understand how to study it But with my own experience I met with some very interesting things Some people I knew had very interesting recollections of first years of life and they all had the same impression which was that the mentality was not a child s mentality how they took people how they recognized people it was not a child s psychology But most people don t remember that at all You see what I mean They had a ready mind such that you cannot imagine this ready mind with quite grown up reactions could be formed in six months of unconscious life It had to be before if it is really so but as I say it is very difficult to find material Q Why should it disappear when the child learns to talk MR O It begins to imitate children and do exactly what grown up people expect from him They expect him to be a stupid child and he becomes a stupid child Q How could recurrence be of advantage to man MR O If one begins to remember and if one begins to change and not go by the same circle each time but do what one wants and what one thinks better and if one doesn t know about it or even if one knows and doesn t do anything then there is no advantage in it at all It is generally the same things repeated and repeated Q Having met the system in one recurrence will one meet it again in the next MR O It depends what one did with the system One could meet the system and say What nonsense these people talk It depends how much effort one makes If one made efforts one could acquire something and that may remain if it was not only in surface personality if it wasn t only formative Q Does one necessarily follow some line of action in each recurrence MR O The law about it is that all acquired tendencies repeat themselves One person acquires a tendency to study or be interested in certain things He will be interested again Another acquires a tendency to run away from certain things Then he will run away again Q Do these tendencies grow stronger MR O They may or they may grow in a different direction There is no guarantee until one reaches some kind of conscious action when one has a certain possibility to trust oneself Q Does the parallel time mean that all moments continually exist MR O Yes It is very difficult to think about it Certainly it means eternity of the moment but our minds cannot think in that way Our mind is a very limited machine We must think in the easiest way and make allowances for it It is easier to think of repetition than of the eternal existence of the moment You must understand that our mind cannot formulate rightly things as they are We must have only approximate formulations which are nearer to truth than our ordinary thinking That is all that is possible Our mind and our language are very rough instruments and we have to deal with very fine matters and fine problems Studying children this is the easiest way to study it If we had enough material we could answer many questions Why for instance strange tendencies appear in children quite opposite to their surrounding circumstances

quite new to the people who surround them It happens sometimes in many different ways and they may be very strong tendencies that may change the life and go quite unexpected ways when there is nothing in heredity to produce that As I said heredity in man does not work it is a fantastic idea It works in dogs and horses but not in men Q Does not the question of types come into that MR O Yes but we know nothing about types not enough to speak about them And this is why in most cases it happens that parents don t understand children and children don t understand parents They never could really understand one another sufficiently or rightly They are quite different people strangers to one another they just happened to meet accidentally at a certain station and then go in different directions again Q When you said Observe children what do you mean MR O That is what is so difficult If you observe tendencies on a big scale you can find quite unexpected tendencies You can say it is the result of a certain reason or surroundings but quite unexpected tendencies can appear in quite young children and not accidental tendencies that appear and disappear They will continue throughout life afterwards In this case according to this theory it may be a tendency acquired in a previous life in much later years and then it appears very early Q From the point of view of recurrence then may it not be that some important actions that we make between now and the time that we die are really responsible for our tendencies now MR O You mean in previous lives Quite possibly Only one thing this work did not exist before It may be that other work did there are many different kinds but not this It didn t exist before that I am perfectly sure of Q What I mean is that it seems such a huge idea to think that between now and the time we die we make the fatal actions which will give us tendencies for next time MR O Certainly Every moment of our lives we may create tendencies that we may not be able to get rid of for ten lives That is why in Indian literature they always emphasize this point It may be in fairy tale form but the principle is the same APRIL 4TH 1938 Q MR O said that this work has not occurred before Does this mean also that it will not occur again MR O There is no guarantee That will depend on you for yourself Certainly one thing could be certain it will not happen in the same way Maybe there will be groups and schools only not in the same way and not at the same time Work is the only thing which is not under the law of recurrence otherwise it is not work If it is a little conscious it cannot be under recurrence Then again in this particular work many things will happen quite differently What was now at a certain time will begin perhaps twenty years earlier Q In my childhood I was greatly attached to a cousin three years older than myself who died when she was ten If her brief life has repeated itself four or five times since then my life as related to hers must also have repeated itself How is this explained MR O It is very difficult to explain it and at the same time mathematically it is very simple Our calculation of length of this time is based on certain ideas of duration We say that ten years are less than a longer life of say fifty years Really there is no guarantee that it is shorter or longer I said in one page of the New Model suppose for a moment that what looks to us like different duration is the same duration but the speed is different There are many things which we take as the foundation of our world which are really illusions In any case it is not difficult to adjust one life to another life but our power of visualization is too small and weak for that We have to leave it as a

problem and understand that it may be adjusted somehow Q How is it possible to know what a baby remembers I thought that one was born with one's centres completely blank and that one remembered with centres MR O This is a strange thing Some people who don't differ much from other people have strange and quite definite recollections of their first months even They think they saw people as grown up people do not as children They don't make compound pictures from elements but they have quite definite impressions of houses people and so on They have a quite grown up mentality *The Discovery of the Ark of the Covenant* Alan Wilson, Barum Blackett, 2007-08-29 British history records that there were two major migrations from the near east into Britain in antiquity One was the fleet migration from Syria led by Albyne around 1560 BC and the other was the second fleet migration from the Trojan Dardanelles areas in Western Turkey led by Brutus around 504 BC Ancient alphabet inscriptions and other tangible and written records show that the second migration was that of the Ten Tribes of Israel The same ancient Alphabet is found all the way along the British migration routes from Palestine to Assyria through Asia Minor to the Aegean and to Etruscan Italy and Rhaetian Switzerland In Britain the Ten Tribes were known as the Khumry This research began in 1976 some 31 years ago and it has met with nothing but opposition and obstruction Around 1360 BC Moses has the fabulous box called the Ark of the Covenant made This holy box was the national talisman of the Hebrew nation It was revered as the place of the presence of the god Yahweh and the most holy thing belonging to the Hebrew nation A series of events that included the Ark being seen as an invincible means of military success and in one disaster being captured by the Philistines ended when King David placed the Ark in the care of the family of Obed Edom and he took the Ark to Jerusalem around 975 BC along with the family of Obed Edom The next King was Solomon and he built a celebrated temple in Jerusalem to house the Ark where annually the high priest entered the holy of holies chamber to serve the divine box Nothing much is said of the Ark until c 790 BC the Judean King Ahaziah attached the Israelite King Jehoash and was totally defeated The victorious Jehoash then went to Jerusalem where he took everything from the palace and everything from the temple and he also took away the family of Obed Edom who are the family mentioned several times in the Bible as guardians of the Ark Therefore Jehoash removed the Ark from Jerusalem and took it north to Samaria Nothing is said in the Biblical record of the Ark being anywhere near Jerusalem after this event in circa 790 BC In 740-736 BC the Judean King Ahaz paid a huge bribe to the Assyrian Emperor Tiglathpileser III to attack King Pekah of Ten Tribe Israel and as a result Israel was totally crushed by the Assyrian army A large number of Israelite nobles and leaders were immediately deported north to areas around Harran from where the patriarch Abraham has begun his migrations In successive campaigns by the Assyrian emperors Shalmaneser IV Sargon II and Sennacherib great numbers of the Israelite nation were deported north and up into the areas north of Harran In 702 BC Sennacherib recorded how he deported 200 120 people in one mass exodus The Assyrian records unmistakably and persistently call the Ten Tribes as the Khumry It is a virtual certainty that these deported Ten Tribes took the Ark with them from Israel Sennacherib was murdered by two of his

sons in c 687 BC and civil war Convulsed the Assyrian Empire and as the heir Esarhaddon fought the murders the massed Ten Tribes took the opportunity to move westwards across both the upper branches of the Y shaped Euphrates river as described in the Book of Esdras II They moved slowly and unstoppably through Siasia Minor and the Greeks recorded their migration as that of the Kimmerio Khumry There is a record of the Khumry having the Ark with them on this journey from north of Assyria through Asia Minor and to the Dardanelles Finally around 650 BC the nation split into tow and one half migrated to Italy whilst the other half remained in the areas around Byzantium until circa 504 BC when they gathered on the island of Lemnos before sailing to Britain in the fleets An inscribed stone that was found on Lemnos in 1876 and now in the Athens museum that records this gathering and the intent to sail to Britain Either the Ark was taken to Etrurian Italy in circa 650 BC or it remained near the Dardanelles until around 504 BC before being brought into Britain The fact is that the Greal or Holy Greal is simply a record and a comparison would be that the Bible the Koran the American Declaration of Independence or the Two Tablets brought down the mountain by Moses would all be greals Britain is the land of the Holy Greal The search was begun to locate the Ark in Britain and this proved to be relatively straightforward but technically different The persistent ancient legend in the area north of Cardiff is that a great chest lies buried and this chest is guarded by two Cigfrangawr Giant Ravens It is not difficult to perceive that this great chest is the Ark that has two golden Cherubim fearsome dragons figures What emerged was that these had been a direct transfer of culture from Israel to Britain and all across the hills of South Wales there are gigantic mounds and these huge mounds are named and set out in a pattern to mirror the pattern of the major stars in the heavens Then there are several ancient tales that tell of the great plants moving on their orbits and being in conjunction with the main stars of the various constellations The journeys of the planets seen as moving and not fixed stars are tracing out routes that can be followed around the Star t Mound Maps on the ground In short our British ancestors left us clear records of where to go The Ark is at a place where the giant mound marks the start Regulus in Leo the Lion the Judean emblem The ancient place name is The Enclosure of the Ark and the central area is The Place of Worship The top of the large hillock has clearly been molded by the hand of man and satellite photography showed spoil heaps tumbling down the slopes form a tunnel excavated horizontally to underground chambers Five very ancient drainage systems of the type used in antiquity to drain and keeps chambers dry are clearly evident Amazingly the Above sea Levels readings of satellite photography proved absolutely that the top 60 feet of this low dome shaped hill is a man made construction This is unassailable incontrovertible and absolute scientific proof of the highest order Ground penetrating radar and other methods shows at least two underground chambers and deep reading g electronic metal detection identifies a large non ferrous box of around four feet long and two feet wide This is the precise size of the Ark of the Covenant An approach has been made to the Welsh National Assembly and hopefully something positive will at last be done to restore Khumric British heritage cultures and history

The Invisible World E. Kavanna, 2018-03-23 One archetypethe youngest son

who sets out to seek his fortune meets another wizard returning home after completing his apprenticeship. Although the two never meet again, both of their lives are changed by the chance encounter and by subsequent events in the invisible world of the mind. These events include the experiences of meditating monks, the wizard's spells, and the explorations by both the wizard and a female monk into the nature of time and the possible existence of alternative realities. The Invisible World is inextricably linked with the reality of the physical world, a world like our own in pre-industrial times but with some differences in social attitudes towards religion and towards sexual behaviour.

In the Heart of the World Mario Mantese, 2015-12-28. This uncommon book is a journey of discovery in the truest sense of those words: a journey to unseen inner worlds. Mario Mantese's thorough investigation of internal frontiers and parallel worlds are depicted here, and the reader is awe-struck by his extraordinary sensitivity and his almost unlimited spiritual capabilities and how he employs them to cross over secret invisible boundaries. What he saw, experienced, and had to endure is fascinating and simply inconceivable for the human intellect. His contacts with various masters and the manner in which these events occurred are deeply touching and invite the reader into unfathomable depths of our existence. This book is certainly one of the most unusual autobiographies ever to be published in the field of spiritual literature.

Nature Sir Norman Lockyer, 1923

Alive in God's World Joa Bolendas, 2001. To be alive in God's world means living in a prayerful and powerful unity with God with those risen from the dead and all the peoples of the earth. To live this unity is truly human. The focus of the visions contained in this book is to bring awareness of the deep bonds uniting the living with each other, with the dead, and with God. The risen ones tell us to make God's kingdom alive on earth and thus release a process of great spiritual energy to guide humanity and restore the earth to its spiritual axis.

The World as a Future Laboratory Martina Bonenberger, 2024-05-02. The World as a Future Laboratory is an experiment within the global society aimed particularly at igniting a spark of hope in today's children, youth, and young adults. Hope for a livable future. Hope that we are capable of halting the warming of our planet caused since the Industrial Revolution and ideally not exceeding the 1.5 degree limit. The book showcases numerous promising projects underway worldwide, offering a glimpse of a path forward, overcoming apocalyptic sentiments and rekindling optimism for the future, even as nature grows impatient with us. Across the globe, countless innovative startups and dynamic individuals are working to make our future sustainable. Decisive environmental and climate protection measures are essential. World leaders must act swiftly to ensure that the basic needs of the entire human race are met if we are to provide a future for nearly ten billion people in less than thirty years. Courageous representatives who embrace innovation, discard narrow-mindedness, and give the green light to sustainable projects are needed. The World as a Future Laboratory is not a guidebook or a visionary tome, although admittedly it may be a bit visionary. It speaks to my dream of an intact environment and intact humanity and the journey to achieve it. The book delves into a total of EIGHT proposed solutions in detail, illustrating how this dream can be realized with unwavering
