Once AI has attained it, scientists argue it will have survival drives much like our own. We may be forced to compete with a rival more cunning, more powerful and more alien than we can imagine. Through profiles of tech visionaries, industry watchdogs and groundbreaking AI systems, *Our Final Invention* explores the perils of the heedless pursuit of advanced AI. Until now, human intelligence has had no rival. Can we coexist with beings whose intelligence dwarfs our own? And will they allow us to? If you read just one book that makes you confront scary high tech realities that we'll soon have no choice but to address, make it this one. *The Washington Post* Science fiction has long explored the implications of humanlike machines; think of Asimov's *I, Robot*, but Barrat's thoughtful treatment adds a dose of reality. *Science News*. It works in three ways: firstly, it raises attachment theory, one of the pillars of self understanding, into a central place in terms of reflecting on and learning from the dynamics of business and organisations. Neath explores how well this attachment theory sits with other theories of self and relationships, such as transactional analysis and the person-centred approach. Secondly, it is an account of how Neath took an application of McCluskey's theory, The McCluskey Model for Exploring the Dynamics of Attachment in Adult Life, to the University of Leeds, with learning points made along the way, exploring the practise of a therapeutic style of group facilitation and reflection on good practice for professional adult learning and teaching techniques. Thirdly, it acts as a handbook for anyone wishing to replicate Neath's work and includes feedback from participants both during and after the training process. It will appeal to those new to training, counselling, organisational developers and those wishing to enjoy and see the potential of the work of McCluskey. *Black Belt*, 2001-08 The oldest and most respected martial arts title in the industry, this popular monthly magazine addresses the needs of martial artists of all levels by providing them with information about every style of self defense in the world, including techniques and strategies.
