Dispelling Wetiko Paul Levy, 2013-01-15 The mind virus behind human self destruction has a name wetiko See it clearly and it starts to lose power You see it everywhere smart people making destructive choices

Companies poisoning their own customers Nations pouring trillions into war while their people suffer Social media built to connect us driving us apart We re the one species that knowingly degrades its own habitat at scale Why do we keep acting against our own survival From Indigenous North American traditions comes the term wetiko a life eating compulsion that turns us against one another and the living world Whether you approach it as metaphor psychology or spirituality the effects are real and they propagate through what we don t see In Dispelling Wetiko Paul Levy brings this insight into dialogue with Jungian psychology framing wetiko as a mind parasite that exploits our blind spots Drawing on teachings shared in public sources depth psychology and his own harrowing encounters Levy describes wetiko as ME disease Malignant Egophrenia a pathological self centering that mistakes the ego for the whole Like a vampire that can t see its reflection it hides in the very way we perceive reality The crucial insight the moment we recognize wetiko it begins to lose power The cure isn t waging war on evil or waiting for others to wake up it starts by noticing how our attention and reactions feed the very patterns we oppose and then withdrawing that food Dispelling Wetiko offers a clear diagnosis and a practical path back to sanity personally and collectively

Fear of Jung Theo A. Cope, 2018-04-17 The current neuroscientific research in the field of emotion studies highlights a paradigm of scientific research that must be categorized as functional science As functional science the neuroscientific theory of the neuron doctrine combined with a Jungian theory of the complex doctrine hold significant potential for a natural human science and a psychological study of affectivity Though researchers utilize psychological constructs similar to those proposed by Carl Jung there appears to be a fear of Jung that is a professional fear of invoking Jung's name or his psychological research One familiar with Jung's works notice similar terminology ideas and even conclusions The marginalization and neglect of Jung's psychological insights from a serious empirical scientific approach to psychology is due to many factors Jung did not reduce psychological experience to the body or brain a reductive science does not consider seriously the reality of the psyche This work is an initial contribution to a psychological and neurological study of personal emotional experience

Vision, Reality and Complex Thomas Singer, 2020-11-09 Vision Reality and Complex brings together a rich selection of Thomas Singer's scholarship on the development of the cultural complex theory and explores the relationship between vision reality and illusion in politics and psyche The chapters in this book discuss the basic principles of the cultural complex theory in various national and international contexts that span the Clinton Bush Obama and Trump eras Each chapter grounds this theory in practical examples such as race and healthcare in the United States or in specific historical and international conflicts between groups whether they be ethnic racial gender local national or global With chapters on topics including mythology leadership individuation revolution war and the soul Singer's work provides unique insights into contemporary culture activism and politics This collection of essays demonstrates how the cultural complex theory applies in specific contexts while simultaneously having cross cultural relevance through the reemergence of complexes throughout history It is essential reading for academics and students of Jungian and post Jungian ideas politics sociology and international studies as well as for practicing and trainee analysts alike

White, 2023-01-30 Adaption and Psychotherapy gives a concentrated but complete picture of Robert Langs's adaptive clinical theory and also expands Langs's treatment of adaptation by examining Carl Jung's theory of adaptation This book articulates Jung's positive and clinical

understanding of adaptation in a way that allows comparison to Langs s adaptive paradigm as well as a creative synthesis of the two approaches The result is a development of Langs s adaptive paradigm and an expansion of clinical theory and technique that is valuable for both Freudian and Jungian analysts **The Gnostic Path to Spiritual Reality** ,

Nelson,2021-10-09 Our species has coexisted in the world in a healthy and balanced way for 97% of its existence It was only after our ancestors emerged from life in nature as hunter gatherers that this all began to change By the beginning of civilization some 6 000 years ago these changes rigidified and became destructive on a large scale They have accumulated to such an extent that our species now faces extinction or a dismal future of ever worsening ecocide Meaninglessness and confusion have become rampant in our postmodern era The human psyche has become utterly fragmented and rendered a stranger to reality other people and itself As dispiriting as this all seems the path forward has always been available to us if we can overcome the ignorance that prevents us from taking it We must reject the values of civilization and return to the naturalistic perspective of our ancestors where our values thinking feeling and actions are once again based on how nature and reality truly function While this approach should be evident we have until now been too terrified bewildered or arrogant to adopt it To help us succeed Reality Unedited provides a simple model of reality that

serves as a foundation for establishing truth claims in the public sphere Then we can finally take the actions necessary so our species and all life on the planet cannot only survive but thrive

Processing Reality John H. Buchanan,2022-10-27 In this book John Buchanan takes us on a journey through the early death of a parent the ups and downs of addiction the extraordinary revelations of psychedelic experiences and the rewards of a sober and meaningful life Reflecting on these experiences the author identifies five pivotal events that drove him to seek a deeper understanding of the significance of extraordinary experiences the nature of mind and the universe the meaning of life and most generally to ask What is Reality Drawing on his wide ranging studies and explorations Buchanan discusses the ideas that most influenced his search and led him to conclude that transpersonal psychology and process philosophy especially as developed by Stanislav Grof and Alfred North Whitehead offer the most satisfying answers He presents in some detail the essence of Grof s and Whitehead s thought as it pertains to these basic questions about life and reality so that readers can appreciate these ideas for themselves Buchanan argues that taken together process thought and transpersonal theory offer the kind of enspirited worldview capable of providing both the necessary inspiration and the intellectual understanding for confronting the great challenges facing our world
