Reason And Experience Modern Revivals In Philosophy S:

Revival: Contemporary Indian Philosophy (1936) S. Radhakrishnan, J. H. Muirhead, 2018-12-20 The book includes essays which are all written by philosophers of or about forty five years of age They fall into two main groups those in which the writer devotes himself chiefly to the exposition of the great Vedic tradition as he has apprehended it and made it the basis of his own life's work and those in which the writer while on the whole remaining true to the spirit of that tradition has sought to give new interpretations of it either by instituting comparisons of it with the Western doctrines most closely allied to it or by treating of modern problems in a way which though suggested by what he has learned from the West is yet stamped with the mark of his own racial sympathy Western readers will naturally find the latter group more attractive but this volume will have failed of its purpose if it does not give them some sense of the truth that underlies even the essays with which owing to the presuppositions on which these are founded they find themselves least in sympathy *Whitaker's Books in Print*, 1998

Revival: A Modern Introduction to Logic (1950) Lizzie Susan Stebbing, 2018-05-08 As the author of this volume states the science of logic does not stand still This book was intended to cover the advances made in the study of logic in the first half of the nineteenth century during which time the author felt there to have been greater advances made than in the whole of the preceding period from the time of Aristotle Advances which in her eyes were not present in contemporary text books As such this book offers a valuable insight into the progress of the subject tracing this frenetic period in its development with a first hand awareness of its documentary value The Rise of Modern Philosophy Tom Sorell, 1993 Modern philosophy in the West is said to have begun with Bacon and Descartes Their methodological and metaphysical writings in conjunction with the discoveries that marked the seventeenth century scientific revolution are supposed to have interred both Aristotelian and scholastic science and the philosophy that supported it But did the new or modern philosophy effect a complete break with what preceded it Were Bacon and Descartes untainted by scholastic influences The theme of this book is that the new and traditional philosophies have more in common than the orthodox account suggests In two survey articles and thirteen essays on individual philosophers the contributors show that the rise of modern philosophy was much more complicated and much more interesting than is usually thought They consider not only metaphysics and the sciences but also claims of Machiavelli Hobbes and Spinoza to have invented modern ethics and politics These two aspects of modernity in philosophy are connected for the first time The book offers a broad view of the early modern philosophers covering not only the much studied major figures but also relatively neglected writers Mersenne Gassendi White and Sergeant Religious Pluralism and the Modern World S.
