Times, and Arranged for Immediate Reference Edwin Davies,1875 *The Life of Plants* Emanuele Coccia,2019-01-16 We barely talk about them and seldom know their names Philosophy has always overlooked them even biology considers them as mere decoration on the tree of life And yet plants give life to the Earth they produce the atmosphere that surrounds us they are the origin of the oxygen that animates us Plants embody the most direct elementary connection that life can establish with the world In this highly original book Emanuele Coccia argues that as the very creator of atmosphere plants occupy the fundamental position from which we should analyze all elements of life From this standpoint we can no longer perceive the world as a simple collection of objects or as a universal space containing all things but as the site of a veritable metaphysical mixture Since our atmosphere is rendered possible through plants alone life only perpetuates itself through the very circle of consumption undertaken by plants In other words life exists only insofar as it consumes other life removing any moral or ethical considerations from the equation In contrast to trends of thought that discuss nature and the cosmos in general terms Coccia's account brings the infinitely small together with the infinitely big offering a radical redefinition of the place of humanity within the realm of life **Select Thoughts on the Ministry and the Church** Davies,2023-12-13
