Horses, People and Parliament in the English Civil War Gavin Robinson, 2016-04-22 Horses played a major role in the military economic social and cultural history of early modern England This book uses the supply of horses to parliamentary armies during the English Civil War to make two related points Firstly it shows how control of resources although vital to success is contingent upon a variety of logistical and political considerations It then demonstrates how competition for resources and construction of individuals identities and allegiances fed into each other Resources such as horses did not automatically flow out of areas which were nominally under Parliament's control Parliament had to construct administrative systems and make them work This was not easy when only a minority of the population actively supported either side and property rights had to be negotiated so the success of these negotiations was never a foregone conclusion The study also demonstrates how competition for resources and construction of identities fed into each other It argues that allegiance was not a fixed underlying condition but was something external and changeable Actions were more important than thoughts and to secure victory both sides needed people to do things rather than feel vaguely sympathetic Furthermore identities were not always self fashioned but could be imposed on people against their will making them liable to disarmament sequestration fines or imprisonment More than simply a book about resources and logistics this study poses fundamental questions of identity construction showing how culture and reality influence each other Through an exploration of Parliament's interaction with local communities and individuals it reveals fascinating intersections between military necessity and issues of gender patriarchy religion bureaucracy nationalism and allegiance

Earls Colne's Early Modern Landscapes Dolly MacKinnon, 2016-04-29 The Essex village of Earls Colne boasts one of the most comprehensive collections of historical documents in Britain and has been the subject of an intensive and ongoing research project to collate and computerise the surviving records As such Earls Colne is undoubtedly one of the most studied parishes in England Yet whilst much is now known about the village and its inhabitants little work has been done on the social relationships that bound the community together within its mental and physical landscape As such scholars will welcome Dr MacKinnon's investigation into the social political and cultural world of early modern England as represented by Earls Colne The book provides a fresh approach to the study of the landscape of a seventeenth century village by focussing on the relationships between political power and cultural artefacts It examines how private public and communal spaces within society were generated gendered and governed and how this was recorded and perpetuated in the records names and monuments of the parish and surrounding landscape Yet whilst the elites tried to represent a select social landscape through their control of the local records and documents these attempts were always counterbalanced by the less powerful members of the community who occupied and contested these spaces By reconstructing the dynamics of Earls Colne through a careful reading and cross referencing of the surviving documents buildings and place names this book offers a fascinating insight into how the sights and sounds of early modern society were imbued with the social relations of parish politics As well as deepening our understanding of Earls Colne itself the book offers historians the potential to revisit other local studies from a fresh perspective
