Rethinking Cultural-Historical Theory Manolis Dafermos, 2018-05-17 This book is an exploration of science in the making It offers readers the opportunity to critically reflect on the process of development of Vygotsky's research program from the perspective of dialectics focusing on the dramatic process of building and rebuilding cultural historical theory Vygotsky's creative and dramatic journey is no less important than the concrete results of his research An epistemological and historical investigation of the formulation of cultural historical theory sheds light on the process of knowledge production and reveals hidden dimensions of creativity in science Using Substances to Enhance Performance: A Psychology of Neuroenhancement Ralf Brand, 2017-01-18 Neuroenhancement NE is a behavior conceptualized as the use of a potentially psychoactive substance to enhance one's already proficient cognitive capacities Depending on the specific definitions used prevalence estimates vary greatly between very low 0.3% for illicit substances to astonishingly high 89% for freely available lifestyle substances These variations indicate that further research and more conceptual and theoretical clarification of the NE construct is dearly needed The contributions of this research topic aim to do just that Specific questions addressed are How prevalent is NE behavior How can NE research profit from the already more evolved field of social science research on doping in sports How is NE perceived by the public What psychological processes and variables play a role in the decision to neuroenhance A wide array of methodological approaches is used to investigate these questions The topics contributions range from theoretical to experimental accounts on NE and they utilize a diverse set of methods ranging from qualitative to neuroscientific approaches The research presented here represents a first step towards what we have labeled a psychological approach to NE By addressing the questions above this research topic hopefully advances our understanding of NE behavior As with every new field of research new answers always prompt new questions In light of what we know now about NE we hope that the findings presented here will be pursued by other researchers in the future Clearly the endeavor to understand NE behavior has only just begun International Psychology Virginia Staudt Sexton, 2015-11-01 While acknowledging their major debt to Europeans like Freud Piaget Erickson Lewin and Jung American psychologists generally concentrated on developments in American psychology And this tendency prevails in spite of the fact that innovations in sport psychology and clinical neuropsychology for example have continued to come from abroad International Psychology is a much needed exposition of the state of psychology in forty five countries including the Soviet Union and the United States Emphasizing the period from 1960 to the present and surveying the training research and practice of psychologists on six continents this volume introduces a widely dispersed network of occupational kinfolk many of whom have scant knowledge of one another The editors provide a panoramic view in the opening chapter as well as an epilogue and name and subject indexes The contributors nearly all distinguished psychologists in their countries represent Argentina Armenia Australia Austria Belgium
