Recent Social Trends In France 1960 199:

Recent Social Trends in France, 1960-1990 Michel Forsé, International Research Group on the Comparative Charting of Social Change in Advanced Industrial Societies, 1993 Over the three decades from 1960 to 1990 French society underwent a spectacular transformation due to the baby boom which was particularly broad based and prolonged in France and caused the population to climb by a full one third At the same time the French economy expanded and the pace of modernization picked up with the result that the wealth of the French quadrupled in a single generation The turning point between the reconstruction and development period and the period of profound social change appears to have been 1965 The baby boom was over by then and the production system was shifting in orientation No longer dominated by the growth of basic industries production was now starting to focus on consumer goods and services

Borderlines in a Globalized World G. Preyer, Mathias Bös, 2013-11-11 Scholars of different schools have extensively analyzed world systems as networks of communication under the fashionable heading globalization Our collected new research pushes the argument one step further Globalization is not a homogenization of all social life on earth It is a heterogeneous process that connects the global and the local on different levels To understand these contemporary developments this book employs innovative concepts strategies of research and explanations Globalization is a metaphor for different borderstructures new borderlines and conditions of membership which emerge in a global world system As a world system expands it incorporates new territories and new peoples The process of incorporation creates frontiers or boundaries of the world system These frontiers or boundary zones are the locus of resistance to incorporation ethnogenesis ethnic transformation and ethnocide

The Imaginary Revolution Michael Seidman, 2004-08 The events of 1968 have been seen as a decisive turning point in the Western world The author takes a critical look at May 1968 and questions whether the events were in fact as revolutionary as French and foreign commentators have indicated He concludes the student movement changed little that had not already been challenged and altered in the late fifties and early sixties The workers strikes led to fewer working hours and higher wages but these reforms reflected the secular demands of the French labor movement May 1968 was remarkable not because of the actual transformations it wrought but rather by virtue of the revolutionary power that much of the media and most scholars have attributed to it and which turned it into a symbol of a youthful renewed and freer society in France and beyond

The Politics of Immigration in France, Britain, and the United States M. Schain, 2008-11-10 This book argues that although labour market needs have been an important element in the development of immigration policy they have been filtered through a political process the politics of immigration The book explores the relation between policy and politics in France the UK and the US

Contemporary Marriage Kingsley Davis, 1986-08-20 This fascinating symposium is based on an assumption that no longer seems to need justification that the institution of marriage is today experiencing profound changes But the nature of

those changes their causes and consequences is very much in need of explication The experts contributing to this volume bring a wide range of perspectives sociological anthropological economic historical psychological and legal to the problem of marriage in modern society Together these essays help illuminate a form of relationship that is both vulnerable and resilient biological and social a reflection of and an influence on other social institutions Contemporary Marriage begins with an important assessment of the revolution in marital behavior since World War II tracing trends in marriage age cohabitation divorce and fertility The focus here is primarily on the United States and on industrial societies in general Later chapters provide intriguing case studies of particular countries There is a recurrent interest in the impact on marriage of modernization itself but a number of essays probe influences other than industrial development such as strong cultural and historical patterns or legislation and state control Beliefs and expectations about marriage are explored and human sexuality and gender roles are also considered as factors in the nature of marriage Contemporary Marriage offers a rich spectrum of approaches to a problem of central importance The volume will reward an equally broad spectrum of readers interested in the meaning and future of marriage in our society

La revolución imaginaria. París 1968 Michael Seidman, 2018-05-31 Durante los meses de mayo y junio de 1968 las calles de París fueron testigo de una ola de protestas iniciadas por los estudiantes contra el modelo político social y cultural dominante Aquellas movilizaciones que pasaron a la Historia como el Mayo del 68 francés dieron la vuelta al mundo y pusieron contra las cuerdas al Gobierno del general De Gaulle Movilizaciones similares aunque quizá no de tal magnitud se dieron en las universidades de otros países como Estados Unidos Berkeley Alemania México e incluso España Pero las movilizaciones de París son las que más han quedado en el recuerdo popular y en los medios de comunicación Pasados los años en este estudio bien documentado detallado y minucioso Michael Seidman analiza aquella revolución valorando su importancia histórica cuestionando algunas ideas establecidas e intentando comprobar si realmente el mundo cambió después de aquel Mayo del 68

Histories of Everyday Life Laura Carter, 2021 This book is a social history of popular history in Britain between the end of the First World War and the 1970s It considers how ordinary people were taught history through books in school and museums and on BBC radio

Australian Social Trends, 1996 *Atlantic Automobility* Gijs Mom, 2014-12-01 Our continued use of the combustion engine car in the 21st century despite many rational arguments against it makes it more and more difficult to imagine that transport has a sustainable future Offering a sweeping transatlantic perspective this book explains the current obsession with automobiles by delving deep into the motives of early car users It provides a synthesis of our knowledge about the emergence and persistence of the car using a broad range of material including novels poems films and songs to unearth the desires that shaped our present car society Combining social psychological and structural explanations the author concludes that the ability of cars to convey transcendental experience especially for men explains our attachment to the vehicle

America, History and Life ,1997 Provides historical coverage of the United States and Canada from prehistory to the present Includes information abstracted from over 2 000 journals published worldwide **Recent Social Trends in France, 1960-1990** Michel Forsé, Jean-Pierre Jaslin, 1993-04-29 A prominent feature of the social revolution in France has been the decline of the great national institutions the Republic the Army the church and the schools which are losing their symbolic value and are no longer the targets of ideological disputes As a result there is a growing basic consensus among the French people At the same time the French have developed a new interest in managing local problems due to the decentralization law which has led to the establishment of many voluntary associations Changes in family life following the revolution of 1968 have led to greater instability among couples but at the same time have strengthened the kinship system resulting in increased life expectancy The customs of the French have also changed The French education system originally based on authority and regulations is now making increasing use of experimentation and negotiation As a result the attitude of the French towards authority has totally changed and the French have learned to negotiate and cooperate among themselves All these changes can be interpreted as progressive moves toward liberty equality and individualism There is little danger of social instability since French society remains in remarkably robust health Women in American History Cynthia Ellen Harrison, 1979 Engineering Labour Peter Meiksins, Chris Smith, Boel Berner, 1996 Engineers often perceived as central agents of industrial capitalism are thought to be the same in all capitalist societies occupying roughly the same social status and performing similar functions in the capitalist enterprise What the essays in this volume reveal

however is that engineers are trained and organized quite distinctly in different national contexts The book includes case studies of engineers in six major industrial economies Japan France Germany Sweden Britain and the United States Through a comparison of these six cases the authors develop an approach to national differences which both retains the place of historical diversity in the experience of capitalism and accommodates the forces of convergence from increasing globalisation and economic integration Contributions from Boel Berner Stephen Crawford Kees Gispén Kevin McCormick and Peter Whalley New Approaches for Sustainable & Resilient Processes and Products of Social Housing Development in the Arabian Gulf Countries Khaled Galal Ahmed, Mohamed H. Elnabawi Mahgoub, Lindita Bande, Martin Scoppa, 2023-10-16 Social housing has been a forefront research topic especially from its economic and socio cultural factors The nature of social housing in the Arabian Gulf Countries has been distinctive in its approach with usually generous areas and urban sprawl designs Recently most of these Arabian Gulf Countries have gone through profound transformation in their social and housing paradigms influenced by their sustainability adopted agendas Still scholarly documentation and analysis of the processes and products of these transformed paradigms are largely missing or at least fragmented So there is a desperate need to boost research work in this field as related to each city country in this region with largely expected mutual effects that these experiences might have on each other and on the global debate about sustainable and resilient social housing as a whole Organizational Communication and Management Andrzej Kozminski, Donald P. Cushman, 1993-01-07 Polish and American scholars with contributions from Western Europe Japan and Africa discuss issues of the communication and management demands on companies faced with dealing in a global economy The main topics of the 14 papers from a June 1990 conference near Plock Poland are the economic and social reasons for the sudden decline of communism and the prospects for the region and the threat posed to the preservation of national identity by globalism and regionalism Paper edition unseen 17 95 Annotation copyright by Book News Inc Portland OR A World Away Michael John Law, 2022-01-15 The 1950s and 1960s were a transformative period in Britain and an important part of this was how Britons lives were changed when they began flying abroad for their holidays In A World Away Michael John Law investigates how something that previously only the rich could afford became available to working class holidaymakers A World Away moves beyond the big players in the tourist industry and technical accounts of the airplanes used by tour operators to tell the histories of the people who were there both tourists and tour guides using their personal testimonies Until now there has been uncertainty about the identity of these new tourists some feared they were working class intruders who might invade the pristine destinations favoured by the elite others claimed that most were from the middle class Using new data derived from flight accident investigations Law explains the complex origins of these new flyers In British society this unprecedented mobility could not go unpunished and the new tourists were lampooned in books and newspapers aimed at the middle classes Law shows how popular culture movies and music influenced the decision to travel and what actually happened when these new

holidaymakers went abroad Law investigates the package tour industry from its mid century origins through its inherent weaknesses governmental interference and unforeseen world events that contributed to its partial failure in the early 1970s A World Away provides the definitive account of this important change in postwar British society
