section and a Transactions section Beginning in 1947 the Transactions section is continued as SAE quarterly transactions
Coatings Tribology Kenneth Holmberg, Allan Matthews, 2009-03-18 The surface coating field is a rapidly developing
area of science and technology that offers new methods and techniques to control friction and wear New coating types are
continually being developed and the potential applications in different industrial fields are ever growing ranging from
machine components and consumer products to medical instruments and prostheses This book provides an extensive review
of the latest technology in the field addressing techniques such as physical and chemical vapour deposition the tribological
properties of coatings and coating characterization and performance evaluation techniques Eleven different cases are
examined in close detail to demonstrate the improvement of tribological properties and a guide to selecting coatings is also
provided This second edition is still the only monograph in the field to give a holistic view of the subject and presents all
aspects including test and performance data as well as insights into mechanisms and interactions thus providing the level of
understanding vital for the practical application of coatings An extensive review of the latest developments in the field of
surface coatings Presents both theory and practical applications Includes a guide for selecting coatings **EPA**
