Teaching Mathematics in Secondary Schools Linda Haggarty,2013-09-13 A companion to Aspects of Teaching Secondary Mathematics this book introduces and explores the contemporary issues and key ideas entailed in the teaching and learning of this subject This book is concerned with exploring the bigger picture of mathematics education and is aimed particularly at those learning to teach mathematics teachers in the classroom who want to continue thinking and developing as mathematics teachers and those concerned with education who would like to be better informed about mathematics education Divided into seven sections to help structure reading this book offers a completely up to date comprehensive overview written by the most known well respected experts in the field

Aspects of Teaching Secondary Mathematics Linda Haggarty,2003-09-02 If learners in the classroom are to be excited by mathematics teachers need to be both well informed about current initiatives and able to see how what is expected of them can be translated into rich and stimulating classroom strategies The book examines current initiatives that affect teaching mathematics and identifies pointers for action in the classroom Divided into three major sections it looks at the changing mathematics classroom at primary secondary and tertiary level major components of the secondary curriculum practical pedagogical issues of particular concern to mathematics teachers Each issue is explores in terms of major underpinnings and research in that area and practical ideas can be drawn from the text and implemented in the reader s classroom practice Each chapter has been written by a well respected writer researcher and practitioner in their field and all share a common

goal to look thoughtfully and intelligently at some of the practical issues facing mathematics teachers and offer their perspectives on those issues Curriculum Provision for the Gifted and Talented in the Primary School Eyre Deborah, Lynne McClure, 2012-10-12 The authors of this book offer practical help to teachers in making day to day provision for the gifted and talented pupils in their classroom Designed mainly for primary teacher intending teachers and teacher trainers the book draws together current findings in curriculum provision in the core subjects links theory and practice in such a way that the readers can benefit from exemplar material and allows them to adapt their own teaching to provide an inclusive curriculum for the gifted and talented children they teach Mathematics in Nursery Education, Second Edition Ann Montague-Smith, 2014-05-22 This Second Edition covers the mathematics needed to teach the Early Learning Goals It has been up dated to include new research findings as well as new topics for example using number lines with young children The topics of counting number including early addition and subtraction pattern measures and shape and space are covered in detail Each chapter contains suggestions for key questions to ask in order to encourage children to discuss their mathematics and to demonstrate what they know and understand There are sections on developing problem solving skills working with parents and other adults in the nursery setting as well as detailed charts giving ideas for activities and how to assess learning and some activities planned in full The final chapter gives detailed help with planning and assessment of mathematics The book is intended for anyone working with children in the early years teachers nursery nurses classroom assistants playgroup leaders and workers child minders and day care staff It is particularly suitable as a course text for those training to be teachers either through the undergraduate route or through a PGCE and for those studying for early childhood degrees or diplomas **Ability Grouping in Education** Judith Ireson, Susan Hallam, 2001-09-11 Ability Grouping in Education will provide very useful and timely background for psychologists working with schools where setting or streaming is a major issue Educational Psychology in Practice With an anticipated audience of teachers and policymakers this book is user friendly incorporating detailed research findings illustrated by graphs and tables A summary is provided at the end of each chapter offering an overview for the time conscious wishing to skip through the engaging but largely illustrative statistics and quotations However a close reading has its rewards as the extracts from teachers and students offer poignant insight into the enormous complexity and far reaching implications of ability grouping Cath Lambert Educational Review In this book the authors provide an overview of ability grouping in education They consider selective schooling and ability grouping within schools such as streaming banding setting and within class grouping Selection by ability is a controversial issue linked with conflicting ideological positions and reflected in strong differences of opinion about the merits of selective schooling Educational systems under pressure to produce an educated workforce have led governments to look for ways of raising attainment and grouping by ability is sometimes seen as an organizational solution Drawing on their own and others research in primary and secondary schools the authors provide an accessible analysis of the issues and latest research on

ability grouping as well as the implications of ability grouping for teachers managers in education and the wider community This book is for students and practitioners taking courses in school effectiveness education management as well as educational psychologists and local authority professionals Judy Ireson is Senior Lecturer in Psychology and Special Needs at the Institute of Education University of London and Susan Hallam is in the Department of Psychology Special Needs

Improving Children's Learning Joan Dean, 2003-09-02 How can teachers improve what they do in the primary classroom Which teaching methods will help you and your pupils to perform effectively These are the questions that every teacher will be asking him or herself in today s climate of targets and tables Much research over recent years has focused on the role of the teacher and how effective classroom practice is achieved The book discusses many areas of topical importance including teaching methods motivating learners and matching work to children how to structure children s learning classroom control and organisation teaching literacy teaching children with special education needs working with parents It also looks at the increasing role of the teacher as a researcher and how collaborative practices are providing a way for teachers to appraise both their own progress and that of their colleagues This book should be of particular interest to the classroom teacher who is looking for ways to develop his or her teaching but has limited time to explore the research It sets out to translate the findings of research into practical terms which teachers can easily use

Children's Mathematics Elizabeth Carruthers, Maulfry Worthington, 2006-08-07 In Case Study 5 a grassroots Children s Mathematics Network group the initiative supported the participants in their professional change by giving them a space for the detailed and joint consideration of children s mathematical thinking Another significant feature of this initiative is its focus on careful consideration and analysis of children s mathematics and the ways in which professionals can support and encourage the children s mathematical thinking and reasoning The standard of the mathematical understanding thinking and reasoning that the displays revealed was far higher than the specified curriculum objectives for children of this age Researching Effective CPD in Mathematics Education RECME project NCETM 2009 The review also plays great score by play based learning of a mathematical nature and makes specific recommendations regarding early mark making as a precursor to abstract mathematical symbolism Section 115 features children s mathematical graphics and emphasises The role of mark making in children s cognitive development is set out in the taxonomy Carruthers and Worthington 2006 The report recommends that local authorities leaders managers and head teachers should provide a culture with a significant focus on mathematical mark making and a learning environment that encourages children to choose to use their own mathematical graphics to support their mathematical thinking and processes The Williams Maths Review DCSF 2008 At the very heart of the success of the book is the authors ability to see mathematics through young children s eyes by listening to and reflecting on the constant efforts made by children to make sense of their world This is a liberating book which proposes that the teaching of mathematics could and should be a highly creative and enjoyable process Branwen Llewelyn Jones Early Years Consultant at

PACE Ltd TACTYC Ground breaking To single out any one chapter would be unfair because there is something thought provoking and inspirational throughout If you want to expand your understanding upwards and outwards then get a copy soon Times Educational Supplement I first read Children s Mathematics Making Marks Making Meaning a couple of years ago and it had an immediate impact on my own thinking and teaching and the work I do with trainee teachers I m sure you will find it compelling reading too I think it has the potential to change in a fundamental way how we think about early mathematical development Lynne McClure Editor Math Co ordiator s File Mathematics Association In their exceptionally readable and informative book Children s Mathematics Making Marks Making Meaning Carruthers and Worthington 2006 draw attention to one of the main goals of early years teaching that is to help children make links between the mathematics they have already encountered and continue to engage with at home and the more abstract mathematics of the school These authors suggest that by encouraging children to represent mathematical ideas in their own ways and crucially by talking to the pupils about the marks they have made we are given a window onto their thinking that may otherwise be inaccessible Liz Pumphrey NRICH This book draws on the authors many years of teaching children aged three to eight years and also on their extensive research with children in the home nursery and school The authors explain the development and range of young children s mathematical marks and visual representations showing how children make mental connections between their own early marks and subsequent abstract mathematical symbolism and go on to develop their own written methods Combining theory and practice this acclaimed book demonstrates how children s own mathematical graphics are highly creative and show deep levels of thinking The authors show how this is the key to success in school mathematics and to higher levels of achievement The authors are winners of TACTYC s 2003 Jenefer Joseph Award for the Creative Arts 3 8 awarded for their innovative work with children on mathematical graphics
