

An aerial photograph of a rural landscape. In the center, there is a large, light-colored building with a dark roof, possibly a farm or a small industrial site. To the left of the building is a small, circular structure. A road or path runs from the bottom left towards the building. The surrounding area is mostly green, suggesting fields or grass. The title 'Recent Work in RURAL ARCHAEOLOGY' is printed in white serif font at the top right. The editor's name 'edited by P. J. Fowler' is printed in white italicized serif font at the bottom left.

Recent Works In Rural Archaeology:

Archaeology of Thermalism. New studies on healing waters. Maddalena Bassani, Jacopo Tabolli, Jean MacIntosh Turfa, Mattia Bischeri, Emanuele Mariotti, Edoardo Vanni, Debora Barbagli, Cesare Felici, Olivier de Cazanove, Maria Elena De Venanzi, Marco Pacifici, Silvia González-Soutelo, Laura García-Juan, Fabrizio Caldara, Antonio Chiappetta, Pietro Scimemi, Massimo Osanna, Engramma214 presents the results of a new season of studies focused on the archaeology of thermal sites. The narrative of this first volume emerges ancient votive religion with thermal medicine in context and follows a chronological and spatial order. Different papers address the preliminary results of the excavation at Bagno Grande in San Casciano dei Bagni Italy. Jean Turfa, Emanuele Mariotti, Edoardo Vanni, Mattia Bischeri. This case study becomes an input to revise past and forgotten excavations in Tuscany. Jacopo Tabolli, Debora Barbagli, Cesare Felici, Marco Pacifici and to reconsider the votive role of bodies in ancient sanctuaries. Olivier de Cazanove. From Etruscan to Roman papers discuss places, objects and written evidence. Maddalena Bassani with a focus on the Euganean area both under the perspective of archaeologists and architects. Maddalena Bassani, Maria Elena De Venanzi and biologists and medical doctors. Fabrizio Caldara, Antonio Chiappetta, Pietro Scimemi. The article by Silvia González-Soutelo and Laura García-Juan proposes a methodological approach to the study of thermo-mineral sites between Antiquity and the present day. Back to San Casciano dei Bagni, the last part of the volume presents the encountering of the thermo-mineral spring of Bagno Grande in the design of the exhibition at the Archaeological National Museum of Naples. Massimo Osanna, Jacopo Tabolli. The Oxford Handbook of Islamic Archaeology Bethany Walker, Timothy Insoll, Corisande Fenwick, 2020-10-27. Born from the fields of Islamic art and architectural history, the archaeological study of the Islamic societies is a relatively young discipline. With its roots in the colonial periods of the late 19th and early 20th centuries, its rapid development since the 1980s warrants a reevaluation of where the field stands today. This Handbook represents for the first time a survey of Islamic archaeology on a global scale, describing its disciplinary development and offering candid critiques of the state of the field today in the Central Islamic Lands, the Islamic West, Sub-Saharan Africa, and Asia. The international contributors to the volume address such themes as the timing and process of Islamization, the problems of periodization and regionalism in material culture, cities and countryside, cultural hybridity, cultural and religious diversity, natural resource management, international trade in the later historical periods, and migration. Critical assessments of the ways in which archaeologists today engage with Islamic cultural heritage and local communities close the volume, highlighting the ethical issues related to studying living cultures and religions. Richly illustrated with extensive citations, it is the reference work on the debates that drive the field today. The Archaeology of Medieval England and Wales John Steane, 2014-10-30. In the preceding 25 years to this book's publication, in 1985, there was an extensive and unprecedented burst of archaeological activity in evidence from below-ground deposits, above-ground structures, and artefacts. During the boom of the late 1960s and 1970s, which led to a much central town

redevelopment it was buried remains which yielded the most dramatic information In the recession of the 1980s it was realised that upstanding remains had a lot to offer as well and they were being subject to ever more sophisticated study techniques This book examines those recent developments in archaeology and assesses their bearing on the study of medieval English and Welsh history Taking a series of important themes such as government religion and the countryside the book offers a chronological approach from the coming of the Vikings 850 AD to the Reformation in 1530 This approach focuses on the impact of man on the urban and rural landscape An important text for students of ancient history *The Archaeology of the Roman Economy* Kevin Greene,1986 Kevin Greene shows how archaeology can help provide a more balanced view of the Roman economy by informing the classical historian about geographical areas and classes of society that received little attention from the largely aristocratic classical writers whose work survives *Crusading and Archaeology* Vardit R. Shotten-Hallel,Rosie Weetch,2020-11-03 Between the eleventh and fifteenth centuries the social and cultural worlds of medieval Europe and the Eastern Mediterranean were transformed by the religious impetus of the crusades Today we bear witness to these transformations in the material and environmental record revealed by new archaeological excavations and reappraisals of museum collections This volume highlights new archaeological knowledge being developed by scholars working in the fields of history archaeology numismatics and architecture to demonstrate its potential to change and augment our understanding of the crusades The 16 chapters in this volume deploy a contemporary scientific approach to archaeology of the crusades to give an up to date account into the diverse range of research in this area They explore five key themes the implications of scientific methods new excavations and surveys architectural analyses sigillography and the application of social interpretations Together these chapters provide a new way of approaching the study of the crusades and demonstrate the value of taking a holistic view that utilises the full diverse range of evidence available to us **The Archaeology of Medieval Villages Currently Inhabited in Europe** Jesús Fernández Fernández,Margarita Fernández Mier,2019-08-29 Archaeological interventions in European rural settlements have largely focussed on villages abandoned during the last millennium Most hamlets and villages of medieval origin remain inhabited however and excavations have been scarce This book details excavations of inhabited sites in the UK the Netherlands France Scandinavia and Spain Handbook of Medieval Studies Albrecht Classen,2010-11-29 This interdisciplinary handbook provides extensive information about research in medieval studies and its most important results over the last decades The handbook is a reference work which enables the readers to quickly and purposely gain insight into the important research discussions and to inform themselves about the current status of research in the field The handbook consists of four parts The first large section offers articles on all of the main disciplines and discussions of the field The second section presents articles on the key concepts of modern medieval studies and the debates therein The third section is a lexicon of the most important text genres of the Middle Ages The fourth section provides an international bio bibliographical lexicon of the most

prominent medievalists in all disciplines A comprehensive bibliography rounds off the compendium The result is a reference work which exhaustively documents the current status of research in medieval studies and brings the disciplines and experts of the field together

People and Agrarian Landscapes: An Archaeology of Postclassical Local Societies in the Western Mediterranean Juan Antonio Quirós Castillo, Josu Narbarte Hernández, 2023-04-06 This book provides an overview of the driving theories methodologies and main topics that have been addressed to date regarding agrarian archaeology The text is presented as an introduction for students a critical reading guide for other scholars and an informative instrument aimed at a wide audience

The Oxford Handbook of the Merovingian World Bonnie Effros, Isabel Moreira, 2020 The Merovingian world has become more visible in Anglophone historical studies in the past two decades as attention to the social and economic networks of empires and modes of communication has begun to change older frameworks that viewed these centuries in terms of decline and characterized them as the Dark Ages The Merovingian epoch witnessed something which we understand from the perspective of hindsight a tilt to the middle ages The forty six essays included in this volume thus highlight the vitality and importance of the Merovingian kingdoms in the fifth through eighth centuries Rather than suggest that this was a chaotic and obscure interlude between the Fall of the Roman Empire and the Rise of the Carolingians and named for a dynasty with a reputation for few accomplishments and even fewer memorable kings the essays demonstrate that the Merovingian era is an important field in its own right The Handbook's contributors highlight recent research that moves beyond the political developments that were until recently the bread and butter of most historians and include many contributions based on material culture that shed new light on subjects that previously were inaccessible They demonstrate that the Merovingian world was at the center of a wide ranging Merovingian empire of elites peasants economies and cultures and its story must be told through archaeology bio archaeology architecture hagiographic literature manuscripts liturgy visionary literature and eschatology patristics numismatics and material culture In addition to mainland France the essays encompass the geographic conduits of power culture and trade that connected the Merovingian world with Anglo Saxon England Ireland Frisia Spain Italy North Africa and the Byzantine Empire This network empire of intersecting and often conflicting identities political interests religions economies patronage and cultures were intrinsically connected to contemporary developments not just among the Burgundians and Visigoths but among the Byzantines Avars Anglo Saxons Frisians and the Irish fields that were once viewed like the Merovingians themselves in isolation These important developments reveal why the Merovingian period has attracted new audiences and why it will never be viewed as a backwater again

Recent Research on the Late Antique Countryside William Bowden, Luke Lavan, Carlos Machado, 2004-01-01 This book surveys a variety of themes relating to the late antique countryside It covers social and economic life the archaeology of pilgrimage and the fate of rural temples villas monasteries and landscape change There is a special section on rural survey in Turkey a region of the Roman empire for which our knowledge of the countryside is poor A

bibliographic essay on the rural archaeology of the entire empire provides an excellent introduction to the volume and to the subject as a whole Essays range from Northern Gaul to Egypt and draw on many sources from papyrology and epigraphy to field survey and paleobotany A complex picture of differing regional trajectories emerges whilst cultural change is everywhere apparent in phenomena such as Christianisation settlement nucleation and fortification Contributors include Beat Brenk Beatrice Caseau Douglas Baird Archie Dunn Etienne Louis Fabio Saggioro John Mitchell Joseph Patrich Lynda Mulvin Carla Sfameni Marcus Rautman Peter Sarris Frank Trombley Joanita Vroom and Marc Waelkens *Kingdom, Civitas, and County* Stephen Rippon, 2018-04-19 This book explores the development of territorial identity in the late prehistoric Roman and early medieval periods Over the course of the Iron Age a series of marked regional variations in material culture and landscape character emerged across eastern England that reflect the development of discrete zones of social and economic interaction The boundaries between these zones appear to have run through sparsely settled areas of the landscape on high ground and corresponded to a series of kingdoms that emerged during the Late Iron Age In eastern England at least these pre Roman socio economic territories appear to have survived throughout the Roman period despite a trend towards cultural homogenization brought about by Romanization Although there is no direct evidence for the relationship between these socio economic zones and the Roman administrative territories known as civitates they probably corresponded very closely The fifth century saw some Anglo Saxon immigration but whereas in East Anglia these communities spread out across much of the landscape in the Northern Thames Basin they appear to have been restricted to certain coastal and estuarine districts The remaining areas continued to be occupied by a substantial native British population including much of the East Saxon kingdom very little of which appears to have been Saxon By the sixth century a series of regionally distinct identities that can be regarded as separate ethnic groups had developed which corresponded very closely to those that had emerged during the late prehistoric and Roman periods These ancient regional identities survived through to the Viking incursions whereafter they were swept away following the English reconquest and replaced with the counties with which we are familiar today **The Archaeology of Peasantry in Roman Spain** Jesús Bermejo Tirado, Ignasi Grau Mira, 2022-01-19 This volume aims to present an updated portrait of the Roman countryside in Roman Spain by the comparison of different theoretical orientations and methodological strategies including the discussion of textual and iconographic sources and the analysis of the faunal remains The archaeology of rural areas of the Roman world has traditionally been focused on the study of villae both as an architectural model of Roman otium and as the central core of an economic system based on the extensive agricultural exploitation of latifundia The assimilation of most rural settlements in provincial areas of the Roman Empire with the villa model implies the acceptance of specific ideas such as the generalization of the slave mode of production the rupture of the productive capacity of Late Iron Age communities or the reduction in importance of free peasant labor in the Roman economy of most rural areas However in recent decades as a

consequence of the generalized extension of preventive or emergency archaeology and survey projects in most areas of the ancient territories of the Roman Empire this traditional conception of the Roman countryside articulated around monumental villae is undergoing a thorough revision New research projects are changing our current perception of the countryside of most parts of the Roman provincial world by assessing the importance of different types of rural settlements In the last years we have witnessed the publication of archaeological reports on the excavation of thousands of small rural sites farms farmsteads enclosures rural agglomerations of diverse nature etc One of the main consequences of all this research activity is a vigorous discussion of the paradigm of the slave mode of production as the basis of Roman rural economies in many provincial areas A similar change in the paradigm is taking place with some delay in the archaeology of Roman Spain After decades of preventive emergency interventions there is a considerable quantity of unpublished data on this kind of rural settlements However unlike the cases of Roman Britain or Gallia Comata no synthesis or national projects are undertaking the task of systematizing all these data With the intention of addressing this current situation the present volume discusses the results and methodological strategies of different projects studying peasant settlements in several regions of Roman Spain

The Archaeology of Harriet Tubman's Life in Freedom Douglas V. Armstrong, 2022-09-09 Harriet Tubman's social activism as well as her efforts as a soldier nurse and spy have been retold in countless books and films and have justly elevated her to iconic status in American history Given her fame and contributions it is surprising how little is known of her later years and her continued efforts for social justice women's rights and care for the elderly Tubman housed and cared for her extended family parents brothers sisters nieces and nephews as well as many other African Americans seeking refuge Ultimately her house just outside of Auburn New York would become a focal point of Tubman's expanded efforts to provide care to those who came to her seeking shelter and support in the form of the Harriet Tubman Home for the Aged In this book Armstrong reconstructs and interprets Tubman's public and private life in freedom through integrating his archaeological findings with historical research The material record Tubman left behind sheds vital light on her life and the ways in which she interacted with local and national communities giving readers a fuller understanding of her impact on the lives of African Americans Armstrong's research is part of a wider effort to enhance public interpretation and engagement with the Harriet Tubman Home

The Oxford Companion to Archaeology Neil Asher Silberman, 2012-11 The second edition of *The Oxford Companion to Archaeology* is a thoroughly up to date resource with new

entries exploring the many advances in the field since the first edition published in 1996 In 700 entries the second edition provides thorough coverage to historical archaeology the development of archaeology as a field of study and the way the discipline works to explain the past In addition to these theoretical entries other entries describe the major excavations discoveries and innovations from the discovery of the cave paintings at Lascaux to the deciphering of Egyptian hieroglyphics and the use of luminescence dating Recent developments in methods and analytical techniques which have revolutionized the ways excavations are performed are also covered as well as new areas within archeology such as cultural tourism and major new sites which have expanded our understanding of prehistory and human developments through time In addition to significant expansion first edition entries have been thoroughly revised and updated to reflect the progress that has been made in the last decade and a half *Archives, Ancestors, Practices* Nathan Schlanger, Jarl Nordbladh, 2008-06-01 In line with the resurgence of interest in the history of archaeology manifested over the past decade this volume aims to highlight state of the art research across several topics and areas and to stimulate new approaches and studies in the field With their shared historiographical commitment the authors leading scholars and emerging researchers draw from a wide range of case studies to address major themes such as historical sources and methods questions of archaeological practices and the practical aspects of knowledge production visualizing archaeology and the multiple roles of iconography and imagery and questions of identity at local national and international levels The Archeology of New Hampshire David R. Starbuck, 2006 A complete archeological guide to New Hampshire from prehistoric times to the present Archaeology, Economy and Society David A. Hinton, 2002-03-11 Many books have been written on particular aspects of medieval archaeology or on particular parts of the period but synthesis across the whole spectrum has not been attempted before The aim of this book is to examine the contribution that archaeology can make to an understanding of the social economic religious and other developments that took place in England from the migrations of the fifth and sixth centuries to the beginning of the Renaissance showing how society and economy evolved in that time span Drawing on the latest available material the book takes a chronological approach to the archaeological material of the post Roman period in order to emphasize the changes that can be observed in the physical evidence and some of the reasons for them that can be suggested The environment in which people functioned and how they expressed themselves for example in their houses and burial practices their pottery and their clothes show how they were constrained by social customs and economic pressures The Maya World Scott R. Hutson, Traci Ardren, 2020-06-17 The Maya World brings together over 60 authors representing the fields of archaeology art history epigraphy geography and ethnography who explore cutting edge research on every major facet of the ancient Maya and all sub regions within the Maya world The Maya world which covers Guatemala Belize and parts of Mexico Honduras and El Salvador contains over a hundred ancient sites that are open to tourism eight of which are UNESCO World Heritage Sites and many thousands more that have been dug or await investigation In addition to captivating the lay public the ancient

Maya have attracted scores of major interdisciplinary research expeditions and hundreds of smaller projects going back to the 19th century making them one of the best known ancient cultures The Maya World explores their renowned writing system towering stone pyramids exquisitely painted murals and elaborate funerary tombs as well as their creative agricultural strategies complex social economic and political relationships widespread interactions with other societies and remarkable cultural resilience in the face of historical ruptures This is an invaluable reference volume for scholars of the ancient Maya including archaeologists historians and anthropologists
