Renewing Unilever Transformation Tradition:

Renewing Unilever : Transformation and Tradition Geoffrey Jones, 2005-07-01 Unilever is one of the world's largest suppliers of fast moving consumer goods in foods home and personal care. It operates in over 100 countries. Its scope and scale make it a unique global corporation. Yet the story of Unilever is not simply a tale of corporate evolution. Unilever is a corporation that has a big impact on the lives of people round the world. Indeed a Unilever brand can be found in one in every two households worldwide. Geoffrey Jones, a leading business historian from the Harvard Business School, takes us inside this corporation which from its origins in Britain and the Netherlands has become a worldwide manufacturer of fast moving consumer products. Unilever's operations cover food and home and personal care and its brands include Lipton, Hellmann's, Birds Eye, Wall's, Surf, Domestos, Comfort, Dove, Sunsilk, Pond's, Signal, Axe and Ben & Jerry's. In particular the book focuses on the evolution of the company over the last half century. Managing such a firm in the era of globalization posed enormous challenges. The book covers the company's strategies and provides compelling evidence of its decision making, marketing, brand management, innovation, acquisition strategies, corporate culture and human resource management. The author has had full access to corporate archives and executives and provides us with a unique insight into the workings and strategies of one of the world's oldest and largest multinationals.

Renewing Unilever Peter Wardley, 2006 *Exploring Strategy* Jerry Johnson, Richard Whittington, Patrick Regnér, Duncan Angwin, Gerry Johnson, Kevan Scholes, 2020 With over one million copies sold worldwide, *Exploring Strategy* has long been the essential strategy text for managers of today and tomorrow. From entrepreneurial start-ups to multinationals, charities to government agencies, this book raises the big questions about organisations: how they grow, how they innovate and how they change.

Oil Palm Jonathan E. Robins, 2021-05-21 Oil palms are ubiquitous: grown in nearly every tropical country, they supply the world with more edible fat than any other plant and play a role in scores of packaged products from lipstick and soap to margarine and cookies. And as Jonathan E. Robins shows, sweeping social transformations carried the plant around the planet. First brought to the global stage in the holds of slave ships, palm oil became a quintessential commodity in the Industrial Revolution. Imperialists hungry for cheap fat subjugated Africa's oil palm landscapes and the people who worked them. In the twentieth century, the World Bank promulgated oil palm agriculture as a panacea to rural development in Southeast Asia and across the tropics. As plantation companies tore into rainforests, evicting farmers in the name of progress, the oil palm continued its rise to dominance, sparking new controversies over trade, land and labor rights, human health and the environment. By telling the story of the oil palm across multiple centuries and continents, Robins demonstrates how the fruits of an African palm tree became a key commodity in the story of global capitalism, beginning in the eras of slavery and imperialism, persisting through decolonization and stretching to the present day.

The Oxford Handbook of Employment Relations Adrian Wilkinson, Geoffrey Wood, Richard Deeg, 2014-03-13 There have been numerous accounts exploring the relationship between institutions and firm practices However much of this literature tends to be located into distinct theoretical traditional silos such as national business systems social systems of production regulation theory or varieties of capitalism with limited dialogue between different approaches to enhance understanding of institutional effects Again evaluations of the relationship between institutions and employment relations have tended to be of the broad brushstroke nature often founded on macro data and with only limited attention being accorded to internal

diversity and details of actual practice The Handbook aims to fill this gap by bringing together an assembly of comprehensive and high quality chapters to enable understanding of changes in employment relations since the early 1970s Theoretically based chapters attempt to link varieties of capitalism business systems and different modes of regulation to the specific practice of employment relations and offer a truly comparative treatment of the subject providing frameworks and empirical evidence for understanding trends in employment relations in different parts of the world Most notably the Handbook seeks to incorporate at a theoretical level regulationist accounts and recent work that link bounded internal systemic diversity with change and at an applied level a greater emphasis on recent applied evidence specifically dealing with the employment contract its implementation and related questions of work organization It will be useful to academics and students of industrial relations political economy and management

The Making of Modern Management John F. Wilson, Andrew Thomson, 2006-08-24 Management has always been part of human organization but it is only in the last two centuries or so that it has been the central driver of economic activity as companies have moved from family firms to hugely complex multinational corporations with many layers of management The term management is commonly used in three ways as a process or activity as a structure in any organization and as a group or class of people carrying out certain roles in an organization This book is the first detailed account of the evolution of management in all three senses The focus is mainly on the UK but throughout the broader question of why corporate management structures developed so impressively in the USA Germany and Japan is borne in mind while arguably little progress was made in this regards in the UK Equally the authors consider why given that management is now so widely studied so little careful research has been undertaken into the evolution of the practice and the profession of management The book is divided into four sections Part One provides An Introduction to Management History Part Two Management and Organization explores the historical development through the 19th and 20th centuries Part Three Managers in Context looks at the social and cultural context of management and managers and Part Four considers three key functional areas labour marketing and accounting and finance This rich detailed and path breaking book will be essential reading for anyone wanting to understand the evolution of management as we now understand it whether academics students or managers themselves
