The Press and the People is the first full length study of cheap print in early modern Scotland It traces the production and distribution of ephemeral publications from the nation s first presses in the early sixteenth century through to the age of Burns in the late eighteenth It explores the development of the Scottish book trade in general and the production of slight and popular texts in particular Focusing on the means by which these works reached a wide audience it illuminates the nature of their circulation in both urban and rural contexts Specific chapters examine single sheet imprints such as ballads and gallows speeches newssheets and advertisements as well as the little pamphlets that contained almanacs and devotional works stories and songs The book demonstrates just how much more of this literature was once printed than now survives and argues that Scotland had a much larger market for such material than has been appreciated By illustrating the ways in which Scottish printers combined well known titles from England with a distinctive repertoire of their own The Press and the People
