Reorient Global Economy In The Asian Age:

ReORIENT Andre Gunder Frank, 1998-07 Frank shows how Marx and Weber got it all wrong A fundamental rethinking of the rise of the West and the origin of the world system Absolutely essential to understanding world history Albert Bergesen University of Arizona The great virtue of this stimulating book is its relentless push to redefine our framework for thinking about the early modern economy A benchmark study R Bin Wong University of California Irvine

ReOrient Andre Gunder Frank, 1998 Andre Gunder Frank asks us to ReORIENT our view away from Eurocentrism to see the West as a mere blip in what was and is again becoming an Asia centered world In a bold challenge to received historiography and social theory he turns on its head the world according to Marx Weber and other theorists including Polanyi Rostow Braudel and Wallerstein Frank explains the Rise of West from 1400 onwards in world economic and demographic terms with a sweeping historical perspective that places it in clear conjunction with Decline of the East around 1800 European states he says used the silver extracted from the American colonies to buy entry into an expanding Asian Market which already flourished in the global economy by means of the very productive commercial and institutional mechanisms that were supposedly unique to Europe Then as the East entered into a decline phase of the cyclical world economy the nations of West resorted to import substitution and export promotion in the world market to become New Industrializing Economics That is precisely what East Asia is doing today Frank points out to recover its traditional dominance in the world economy the center of which is once again moving to the Middle Kingdom of China Anyone interested in Asia economic and social history in international relations in political economy and in socio economic theory cannot afford to ignore Andre Gunder Frank s exciting reassessment of our global economic past and future

Reorienting the 19th Century Andre Gunder Frank, Robert A. Denemark, 2015-10-23 Andre Gunder Frank was a path breaking scholar in several disciplines over an illustrious and contentious 50 year career First amongst his many important works is the book *ReORIENT Global Economy in the Asian Age* which sought to correct a Euro centric world view of the development of the global political economy Frank passed away in April 2005 while working on this new book a sequel to *ReORIENT* In this book Frank shows many of the myths of European industrialisation hegemony and capitalism which have hidden the fact that Asia remained a serious power not just into the 18th century as Frank himself argued in 1998 but well into the 19th century as well When Frank passed away his colleagues rallied to finish this book and it is presented here as his final major statement

Global Nexus, The: Political Economies, Connectivity, And The Social Sciences

Wazir Jahan Karim,2019-08-27 The Global Nexus Political Economies Connectivity and the Social Sciences is a provocative critique of the social sciences in the age of neoconservative and alt right globalisation sweeping across modern democracies globally The writer persuasively argues that the mainstream western social science modality of describing indigenous knowledge and sub altern discourses as alternative knowledge is due for serious review for it describes devalues and renders it the same renegade status as the alternate realities of the alt right neo conservative agencies of Western and Asian governments The abuse of indigenous knowledge by neoconservative governments to promote racism ethno centricities and misogyny has also reduced vital sources of local knowledge to fodder only salvaged by the good press specialists of the media in investigative journalism communications and literature who propose that worldviews and ideas of the underclasses including women migrants minorities refugees war prisoners and refugees should be brought to the fore and mainstreamed for the reader to understand that the stories they tell and their reasons why tell them are closer to truth than fiction These lost voices often silenced suppressed and understated generate new knowledge of the marginalised and disadvantaged sectors of modern society reflecting the social realities of globalisation Focusing on Southeast Asia with comparisons across nations in the Levant and the Middle East Europe and the United States Wazir Jahan Karim vividly demonstrates how plural political economies have emerged and rendered flaws in the globalisation process As powerful elites compete to accumulate and control wealth power and vital global resources the growing phenomenon of global agencing wealth and poverty generating institutions exist together in complex networks of hierarchical relationships strategies and alliances with dire consequences for those on the receiving end of the global spectrum
