## **Repair The Impulse To Restore In A Fragile World:**

Repair Elizabeth V. Spelman, 2002 The Impulse to Restore in a Fragile World Like Diane Ackerman's A Natural History of the Senses an exploration of a powerful but often overlooked aspect of the human psyche our ability and instinct to fix things From clothing that develops holes from long use to fraying relationships we seem constantly to be repairing in a breakable world We fix things around us all the time without giving it much thought But looking hard at this work makes us ask why we do it and what we're trying to achieve When does restoration destroy the value of an object Who in your house is more likely to fix the faucet The relationship When shouldn't you accept someone's apology From fixing cars and restoring motorcycles to women as the menders in our lives to restorative justice as a way to heal societies fractured by civil war Spelman guides us across a fascinating terrain that is both highly personal and common to us all Repair illuminates a familiar yet mysterious instinct and makes us see that our work as Homo reparans is vital creative and above all underappreciated Elizabeth Spelman is professor of philosophy at Smith College and author of Inessential Woman Beacon 6745 8 17 00 and Fruits of Sorrow Beacon 1421 4 14 00 She lives in Northampton Massachusetts

**Design in Crisis** Tony Fry, Adam Nocek, 2020-12-29 This book is an essential contribution to the transdisciplinary field of critical design studies The essays in this collection locate design at the center of a series of interrelated planetary crises from climate change nuclear war and racial and geopolitical violence to education computational culture and the loss of the commons In doing so the essays propose a range of needed interventions in order to transform design itself and its role within the shifting realities of a planetary crisis It challenges the widely popular view that design can contribute to solving world problems by exposing how this attitude only intensifies the problems we currently face In this way the essays critique the dominant modes of framing the meaning and scope of design as a largely Anglo European problem solving practice By drawing on post development theory decolonial theory black studies continental philosophy science and technology studies and more the contributions envision a critical and speculative practice that problematises both its engagement with planet and itself The essays in this collection will appeal to design theorists and practitioners alike but also to scholars and students generally concerned with how the past and future of design is implicated in the unfolding complexity of ecological devastation racial and political violence coloniality technological futures and the brutality of modern Western culture generally

*Race and Epistemologies of Ignorance* Shannon Sullivan, Nancy Tuana, 2012-02-01 Offering a wide variety of philosophical approaches to the neglected philosophical problem of ignorance this groundbreaking collection builds on Charles Mills's claim that racism involves an inverted epistemology an epistemology of ignorance Contributors explore how different forms of ignorance linked to race are produced and sustained and what role they play in promoting racism and white privilege They argue that the ignorance that underpins racism is not a simple gap in knowledge the accidental result of an epistemological oversight In the case of racial oppression ignorance often is actively produced for purposes of domination and exploitation But as these essays demonstrate

ignorance is not simply a tool of oppression wielded by the powerful It can also be a strategy for survival an important tool for people of color to wield against white privilege and white supremacy The book concludes that understanding ignorance and the politics of such ignorance should be a key element of epistemological and social political analyses for it has the potential to reveal the role of power in the construction of what is known and provide a lens for the political values at work in knowledge practices

*Everyday Aesthetics* Yuriko Saito,2008-01-03 Everyday aesthetic experiences and concerns occupy a large part of our aesthetic life However because of their prevalence and mundane nature we tend not to pay much attention to them let alone examine their significance Western aesthetic theories of the past few centuries also neglect everyday aesthetics because of their almost exclusive emphasis on art In a ground breaking new study Yuriko Saito provides a detailed investigation into our everyday aesthetic experiences and reveals how our everyday aesthetic tastes and judgments can exert a powerful influence on the state of the world and our quality of life By analysing a wide range of examples from our aesthetic interactions with nature the environment everyday objects and Japanese culture Saito illustrates the complex nature of seemingly simple and innocuous aesthetic responses She discusses the inadequacy of art centered aesthetics the aesthetic appreciation of the distinctive characters of objects or phenomena responses to various manifestations of transience and the aesthetic expression of moral values and she examines the moral political existential and environmental implications of these and other issues

*A Face Drawn in Sand* Rey Chow,2021-04-13 Leadership innovation diversity inclusiveness sharing accountability such is the resounding administrative refrain we keep hearing in the contemporary Western university What kinds of benefits does this refrain generate For whom What discursive incitements undergird such benefits Although there are innumerable discussions of Michel Foucault in the English speaking academy seldom is his work used systematically to unravel the dead ends and potentialities of humanistic inquiry as embedded in these simple but dynamic questions Rey Chow takes up this challenge by articulating the plight of the humanities in the age of global finance and neoliberal mores through a resharpened focus on Foucault s concept outside This general discussion is followed by a series of micro arguments about several loosely linked topics the biopolitics of literary study visibilities and invisibilities race and racism sound voice listening and confession and self entrepreneurship Against what she polemicizes as the moralistic entrepreneurial norming of knowledge production Chow foregrounds a nonutilitarian approach stressing anew the

intellectual and pedagogical objectives fundamental to humanistic inquiry How to process analyze and evaluate different types of texts across languages and disciplines how to form and sustain viable arguments how to rethink familiar problems through less known as well as very well known sources figures and methods Above all she asks in an abidingly humanistic spirit how not to know all the answers before the questions have been posed Not Giving Up on People Barrett

Emerick,Audrey Yap,2023-12-06 Feminist philosophers Barrett Emerick and Audrey Yap bring theoretical arguments about personhood and moral repair into conversation with the work of activists and the experiences of incarcerated people to make the case that prisons ought to be abolished They argue that contemporary carceral systems in the United States and Canada fail to treat people as genuine moral agents in ways that also fail victims and their larger communities Such carceral systems are a form of what Emerick and Yap call institutionalized moral abandonment Instead they argue that we should create communities of moral solidarity which open up space for wrongdoers to make up for their wrongs As part of this argument the book directly addresses one of the paradigm cases of wrongdoing often used to justify carceral systems rape Carceral systems that treat perpetrators of sexual violence as irredeemable monsters both obscure the reality of sexual violence and are harmful to everyone involved As an alternative to carceral systems Emerick and Yap argue for an orientation towards justice that is grounded in moral repair This incorporates elements of restorative justice mutual aid and harm reduction Instead of advocating for one specific and universal approach the authors argue for multigenerational collective action that aims to build resilient communities that support the wellbeing of everyone **From Personal Life to Private Law** John

Gardner,2018-04-06 Mounting a lawsuit against someone who has wronged you is a prospect no less fearful than being on the receiving end of such a lawsuit Litigation in the courts has a reputation for being a byzantine process far removed from ordinary life often failing to address people's real grievances while adding to their pain Yes there is money to be had if you win But beyond that what is it all in aid of In this book John Gardner argues that in spite of their legal intricacy many of the questions that perennially occupy the courts in civil cases are actually timeless puzzles about the human condition The architecture of the law of torts and the law of contract turns out to track the contours of personal life much more closely than you might expect Using a wide range of examples from literature and life as well as law Gardner explores big questions about our relationships to our own pasts and our own futures as well as to other people What are friends for Why does it matter how your actions turn out What is the good of saying sorry Why regret your mistakes How can anyone be compensated for an irreversible loss Why would you want to hold onto the life you already have And what does any of this have to do with all those protracted legal disputes about damaged cars ruined holidays and leaky roofs **Groundwork for the Practice of**

**the Good Life** Omedi Ochieng,2016-10-14 What makes for good societies and good lives in a global world In this landmark work of political and ethical philosophy Omedi Ochieng offers a radical reassessment of a millennia old question He does so by offering a stringent critique of both North Atlantic and African philosophical traditions which he argues unfold visions of

the good life that are characterized by idealism moralism and parochialism But rather than simply opposing these flawed visions of the good life with his own set of alternative prescriptions Ochieng argues that it is critically important to step back and understand the stakes of the question Those stakes he suggests are to be found only through a social ontology a comprehensive and in depth account of the political economic and cultural structures that mark the boundaries and limits of life in the twenty first century It is only in light of this social ontology that Ochieng then proffers an alternative normative account of the good society and the good life which he spells out as emergent from ecological embeddedness social entanglement embodied encounter and aesthetic engenderment At once sweeping and rigorous incisive and subtle original and revisionary this book does more than just appeal to intellectuals and scholars across the humanities and social sciences rather it opens up the academic disciplines to a whole new landscape of exploration into the biggest and most pressing questions animating the human experience

**The Moral Psychology of Forgiveness** Kathryn J. Norlock, 2017-05-24 The feeling that one can't get over a moral wrong is challenging even in the best of circumstances This volume considers challenges to forgiveness in the most difficult circumstances It explores forgiveness in criminal justice contexts under oppression after genocide when the victim is dead or when bystanders disagree when many different negative reactions abound and when anger and resentment seem preferable and important The book gathers together a diverse assembly of authors with publication and expertise in forgiveness while centering the work of new voices in the field and pursuing new lines of inquiry grounded in empirical literature Some scholars consider how forgiveness influences and is influenced by our other mental states and emotions while other authors explore the moral value of the emotions attendant upon forgiveness in particularly challenging contexts Some authors critically assess and advance applications of the standard view of forgiveness predominant in Anglophone philosophy of forgiveness as the overcoming of resentment while others offer rejections of basic aspects of the standard view such as what sorts of feelings are compatible with forgiving The book offers new directions for inquiry into forgiveness and shows that the moral psychology of forgiveness continues to enjoy challenges to its theoretical structure and its practical possibilities

**The Replaceability Paradigm** Niall Martin,Ilios Willemars,2024-06-04 The trope of humans being replaced by AI is one of the most familiar examples of the rhetoric of replaceability Not only have questions about what is unique and what is replaceable gained momentum in digital culture but notions of fungibility have emerged in many other contexts as well such as ecology management theory and more sinisterly in racist and conspiracist thinking This volume argues that there is a replaceability paradigm at work throughout the culture of modernity from the European Renaissance through Freudian psychoanalysis Chinese science fiction and postcolonial theory all the way to neural network programs such as Google s DeepDream This collection will be of interest to anybody engaged with the conceptual architecture of contemporary culture whether through film literature or new digital media

**Reparations and the Human** David L. Eng, 2025-03-21 The Holocaust and the atomic bombings of Hiroshima and Nagasaki invoked in graphic terms the specter of total human destruction In response a new international order of reparations and human rights arose from the ashes of World War II This legal regime sought to subrogate the sovereignty of the nation state in order to defend the sovereignty of the human being While the Holocaust's history is settled Nazis were perpetrators and Jews were victims there remains little historical consensus as to the victims and perpetrators of the atomic bombings In *Reparations and the Human* David L. Eng investigates a history of reparations across the Transpacific He analyzes how concepts of reparation established during colonial settlement and the European Enlightenment shape contemporary configurations of the human and human rights determining who can be recognized as victims who must be seen as perpetrators and who deserves repair As demands for reparations now occupy center stage in debates concerning unresolved legacies of dispossession and Transatlantic slavery Eng considers how the Cold War Transpacific provides a limit case for the politics of repair and definitions of the human
