Housing and the Financial Crisis Edward Glaeser,Todd Sinai,2013-08-19 Conventional wisdom held that housing prices couldn't fall But the spectacular boom and bust of the housing market during the first decade of the twenty first century and millions of foreclosed homeowners have made it clear that housing is no different from any other asset in its ability to climb and crash Housing and the Financial Crisis looks at what happened to prices and construction both during and after the housing boom in different parts of the American housing market accounting for why certain areas experienced less volatility than others It then examines the causes of the boom and bust including the availability of credit the perceived risk reduction due to the securitization of mortgages and the increase in lending from foreign sources Finally it examines a range of policies that might address some of the sources of recent instability International Capital Flow Pressures

Ms.Linda S. Goldberg,Signe Krogstrup,2018-02-16 This paper presents a new measure of capital flow pressures in the form of a recast Exchange Market Pressure index The measure captures pressures that materialize in actual international capital

flows as well as pressures that result in exchange rate adjustments The formulation is theory based relying on balance of payments equilibrium conditions and international asset portfolio considerations Based on the modified exchange market pressure index the paper also proposes the Global Risk Response Index which reflects the country specific sensitivity of capital flow pressures to measures of global risk aversion For a large sample of countries over time we demonstrate time variation in the effects of global risk on exchange market pressures the evolving importance of the global factor across types of countries and the changing risk on or risk off status of currencies

Goldstein,Ms.Liliana Rojas-Suárez,Mr.D. F. I. Folkerts-Landau,1991-04-15 The growing integration of capital markets has strengthened incentives for greater international coordination of economic and financial policies Structural changes in these financial market however may have undermined the effectiveness of monetary and fiscal policy and complicated market access by developing countries These are among the findings of this study of capital flows in the 1970s and the 1980s

International Capital Flows and the Lucas Paradox Muhammad Akhtaruzzaman,2019-06-21 This book offers a comprehensive analysis of the debates on international capital flows and presents a new evidence based answer to the long standing question of why capital doesn't tend to flow from rich to poor countries as predicted by standard neoclassical theory a puzzle known as the Lucas paradox Further the book reviews alternative approaches to conventional estimates of the marginal product of capital MPK and considers whether these estimates actually help us understand observed international capital flows A rigorous quantitative approach is subsequently used to provide clear empirical evidence on the determinants of capital flows across borders The findings of this empirical analysis suggest that generous economic policies on capital account convertibility are more influential than differences in institutional quality in terms of determining international capital flows In closing the relative importance of various types of political risk e.g expropriation and corruption is examined After determining that expropriation risk has one of the greatest effects on foreign direct investment FDI the book proposes an appealingly intuitive explanation for the lack of FDI flows to many capital scarce developing countries
