## **Report Writing For Architects And Project Managers:**

Report Writing for Architects David Chappell, 2014-05-16 Report Writing for Architects presents a critical review of standard report formats used in writing reports for architects. It discusses a set of formats to help architects and surveyors to create good reports for their client. It addresses every instance that necessitates the creation of an architectural report. Some of the topics covered in the book are the purpose, target audience, format, presentation and main points of a report, description, style and basis of the content of a report to be written, creating reports connected with building projects, making of a feasibility report, format and its content and considerations in creating a report. The outline, proposals report format and the scheme design format are discussed. An in-depth analysis of creating a progress report is given. The book also covers a special report on claim for loss and expense, a report on award of extension of time, format and miscellaneous reports. The book can provide useful information to architects, surveyors, students and researchers. *The Architect in Practice* David

Chappell, Michael H. Dunn, 2016-01-26 Throughout its many editions *The Architect in Practice* has remained a leading textbook used in the education of architects. While the content of the book has developed, the message and philosophy has remained constant to provide students of architecture and young practitioners with a readable guide to the profession, outlining an architect's duties to their client and contractor, the key aspects of running a building contract and the essentials of management, finance and drawing office procedure. The eleventh edition follows in that tradition. The text has been brought up to date to ensure it follows the new RIBA Plan of Work 2013 as the guide to the architect's workflow. In addition, a number of changes to standard forms of contract were made with the publication of the JCT 2011 suite of contracts and the RIBA Standard Form for the Appointment of an Architect 2010/2012 Revision. These new forms are fully covered. In addition, the opportunity has been taken to reorganise the layout so that the content flows in a way that is more consistent with current architectural practice and to deal with the increasing use of BIM. The eleventh edition of *The Architect in Practice* continues to provide the guidance and advice all students and practising architects need in the course of their studies and in their profession. Standard Letters in Architectural Practice David Chappell, 2008-04-15 Architects and contract administrators

spend a great deal of time writing letters of various types. Many of them are routine and repetitive in character but they require proper consideration if potentially dangerous liability situations are to be avoided. This book provides some 285 standard letters for use at all stages of project administration. To assist the user, they are grouped into sections which correspond with the RIBA Plan of Work. The aim is to cover all the common situations encountered in practice. The book has been revised to take account of the latest contract revisions and many letters have been added. Unless otherwise stated, all letters are suitable for use with JCT 98, WCD 98, IFC 98, MW 98, GC Works 1, 1998. The latest edition also takes account of the three new RIBA Standard Forms of Agreement for Appointment of an Architect: SFA 99, CE 99 and SW 99. Although primarily written for architects and contract administrators, the book will also be of use to project managers and employers' agents.

under WCD 98 Contractors will also find much of interest
