Testing Behaviors/Approaches to Tests:

Student was cooperative at the outset of the two testing sessions. Student demonstrated persistence in attempting all subtests presented to her. The examiner used American sign-language, and verbal English to communicate with Student. The examiner encouraged Student during the more challenging subtests. Student often smiled during testing and interacted with the examiner using physical gestures and sign-language throughout the testing. As the testing sessions passed 15 minutes in duration, Student would gradually demonstrate behaviors, such as leaning back and covering her eyes or grabbing test materials. Student appeared to give her best effort on the first subtests given in each session.

There were a number of subtests administered which yielded little or no response from Student. The result of the lack of response was that the examiners were not able to establish a basal level, and were unable to record a score higher than 0. The lack of response in these tests indicated that some subtests were inappropriate for Student, given her instructional level. Student attempted all tests presented, and appeared to give her best effort in answering all questions to the best of her ability.
