Representation And Misrepresentation:

Dialectic and Narrative Thomas R. Flynn, Dalia Judovitz, National Endowment for the Humanities Professor of French
Dalia Judovitz, 1993-01-01 Dialectic and narrative reflect the respective inclinations of philosophy and literature as disciplines that fix one another in a Sartrean gaze admixing envy with suspicion Ever since Plato and Aristotle distinguished scientific knowledge episteme from opinion doxa and valued demonstration through formal final causes over emplotment mythos the palm has been awarded to dialectic as the proper instrument of rational discourse the arbiter of coherence consistency and ultimately of truth The matter becomes more complicated when we recognize the various uses of the term dialectic in the tradition some of which complement and even overlap the narrative domain By confronting these concepts with one another either de facto or ex professo the following essays not only raise anew the ancient questions of the identities of philosophy and literature but do so in the context of recent postmodern challenges to their relative autonomy

Edmund Samson Green, 1904 *Continual Permutations of Action* Anselm L. Strauss, 2017-09-08 Richard Bernstein expressed the view that pragmatism was ahead of its time the same has been true of symbolic interactionism These two closely related perspectives one philosophical and the other sociological place human action at the center of their explanatory schemes It has not mattered what aspect of social or psychological behavior was under scrutiny Whether selves minds or emotions or institutions social structures or social change all have been conceptualized as forms of human activity This view is the simple genius of these perspectives Anselm Strauss always took ideas pertaining to action and process seriously Here he makes explicit the theory of action that implicitly guided his research for roughly forty years It is understood that Strauss accepts the proposition that acting or even better interacting causes social structure He lays the basis for this idea in the nineteen assumptions he articulates early in the book assumptions that elaborate and make clearer Herbert Blumer's famous premises of symbolic interactionism The task Strauss put before himself is how to keep the complexity of human group life in front of the researcher theorist and simultaneously articulate an analytical scheme that clarifies and reveals that complexity With these two imperfectly related issues before him Strauss outlines an analytical scheme of society in action It is a scheme that rests not on logical necessity but on research and observation and the concepts he uses are proposed because they do a certain amount of analytical work One would be well advised to take *Continual Permutations of Action* very seriously

Representation and Misrepresentation in Later Stuart Britain Mark Knights, 2006-09-28 In this original and illuminating study Mark Knights reveals how the political culture of the eighteenth century grew out of earlier trends and innovations Arguing that the period 1675-1720 needs to be seen as the second stage of a seventeenth century revolution that ran on until c 1720 the book traces the development of the public as an arbiter of

politics the growth of a national political culture the shift towards a representative society a crisis of public discourse and credibility and a political enlightenment rooted in local and national partisan conflict The public acquired a new status in the later Stuart period as a result of frequent elections the lapse of pre publication licensing the emergence of party politics the creation of a public debt and ideological conflict over popular sovereignty These factors enlarged the role of the public and required it to make frequent acts of judgement Yet contemporaries from across the political spectrum feared that the public might be misled by the misrepresentations peddled by their rivals Each side and those ostensibly of no side discerned a culture of passion slander libel lies hypocrisy dissimulation conspiracy private languages and fictions Truth appeared an ambiguous political matter But the reaction to partisanship was also creative for it helped to construct an ideal form of political discourse This was one based on reason rather than passion on politeness rather than incivility on moderation rather than partisan zeal on critical reading rather than credulity and the realisation of those ideals rested on infrequent rather than frequent elections Finding synergies between social political religious scientific literary cultural and intellectual history Representation and Misrepresentation reinvigorates the debate about the emergence of the public sphere in the later Stuart period

many animals are such individuals Consciousness something that is like to have an experience is widely distributed through the animal kingdom Many animals are capable of both causal and logical reasoning Many animals are also self aware since a form of self awareness is essentially built into the possession of conscious experience And some animals are capable of a kind of awareness of the minds of others quite independently of whether they possess a theory of mind This is not just a book about animals however As well as being fascinating in their own right animals as Claude Levi Strauss once put it are good to think In this seamless interweaving of the empirical study of animal minds with philosophy and its history this book makes a powerful case for the idea that reflection on animals allows us to better understand each of these four pillars of personhood and so illuminates what means for any individual animal or human to be conscious rational self and other aware Mews'
