## **Reproduction In Education Society And Culture:**

Reproduction in Education, Society and Culture Pierre Bourdieu, Jean Claude Passeron, 1977      *Reproduction in Education, Society and Culture* Pierre Bourdieu, Jean-Claude Passeron, 1990-10 The way in which the ruling ideas of a social system are related to structures of class production and power and how these are legitimated and perpetuated is fundamental to the sociological project In this second edition of this classic text which includes a new introduction by Pierre Bourdieu the authors develop an analysis of education in its broadest sense encompassing more than the process of formal education They show how education carries an essentially arbitrary cultural scheme which is actually though not in appearance based on power More widely the reproduction of culture through education is shown to play a key part in the reproduction of the whole social system The analysis is carried through not only in theoretical      *The International Handbook of Educational Research in the Asia-Pacific Region* J.P. Keeves, Ryo Watanabe, 2003-09-30 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region
