Reproductive Technologies Gender Motherhood And Medicine:

Reproductive Technologies Michelle Stanworth, 1987-01-01 The creation of test tube babies acted as a spur to public debate about the implications of research on embryos in vitro fertilization surrogate motherhood and the whole range of technologies concerned with human reproduction The scope of reproductive technologies examined in this volume from techniques for the medical management of childbirth to genetic engineering is such that few women in the western world and smaller and smaller numbers in the third world escape their influence What then is their impact on the process of reproduction on family life and particularly on women

Reproductive Agency, Medicine and the State Maya Unnithan-Kumar, 2005-11 Recent years have seen many changes in human reproduction resulting from state and medical interventions in childbearing processes Based on empirical work in a variety of societies and countries this volume considers the relationship between reproductive processes of fertility pregnancy childbirth and the postpartum period on the one hand and attitudes medical technologies and state health policies in diverse cultural contexts on the other

The Politics of Pregnancy Janna C. Merrick, 2014-05-01 Here is a comprehensive overview and analysis of issues concerning the maternal fetal relationship from abortion to surrogate motherhood Unlike many books which cover reproductive issues in general this book focuses in depth on one aspect of reproduction the maternal fetal relationship to give readers a detailed study of the many issues involved The Politics of Pregnancy discusses public policy dimensions of this relationship and posits new critical political dilemmas Many chapters in this unique book also provide significant clinical information as well as conceptual analysis The Politics of Pregnancy offers great diversity in terms of the disciplinary backgrounds of the authors and their ideological perspectives Authors come from many fields including sociology political science pediatrics ethics and psychiatry and provide diverse sometimes opposing analytical positions Some of the topics they debate include maternal substance use during pregnancy prenatal technology pregnancy and workplace hazards court ordered obstetrical intervention fetal experimentation Readers interested in public and health care policy nursing feminism pediatrics or ethics will find The Politics of Pregnancy to be a stimulating and thought provoking book This volume also makes an excellent discussion tool for graduate courses in these areas

The Psychology of Women's Health and Health Care Jo Campling, Paula Nicolson, Jane Ussher, 2016-07-27 The psychology of women's health is an area traditionally controlled by male orientated scientists psychologists and doctors Women by definition have been unquestioningly seen and treated as deviant from the male norm This model has been challenged by feminist historians and sociologists but not by psychologists who seem to have implicitly accepted the medical model and emphasised the pathology in women's behaviour and emotions In this book women's views and their experience of their own health and health care are taken seriously and analysed within a psychological and a feminist angle

The Gendered Cyborg Fiona Hovenden, Linda Janes, Gill Kirkup, Kathryn Woodward, 2013-09-13 The Gendered Cyborg explores the relationship between representation technoscience and gender through the metaphor of the

cyborg The contributors argue that the figure of the cyborg offers ways of thinking about the relationship between culture and technology people and machines which disrupt the power of science to enforce the categories through which we think about being human male and female Taking inspiration from Donna Haraway's groundbreaking *Manifesto for Cyborgs* the articles consider how the cyborg has been used in cultural representation from reproductive technology to sci fi and question whether the cyborg is as powerful a symbol as is often claimed The different sections of the reader explore the construction of gender categories through science the interaction of technoscience and gender in contemporary science fiction film such as *Blade Runner* and the *Alien* series debates around modern reproductive technology such as ultrasound scans and IVF assessing their benefits and constraints for women issues relating to artificial intelligence and the internet

Gender and Well-Being in Europe Lina Gálvez, 2016-04-22 This book is the first of four books based on a series of symposia funded by COST which is an intergovernmental framework for the promotion of European Cooperation in the field of Scientific and Technical Research It draws on both historical and contemporary European case studies to offer a sophisticated account of the relationship between gender and well being The authors focus on key discussions of the changing conceptions of well being from early twentieth century calculations of the relationship between income and the cost of living to more recent critiques from feminist writers Their fascinating answers allow them to significantly challenge the idea that well being is not only associated with income or opulence but also relates to more abstract concepts including capabilities freedom and agency of different women and men and will be of considerable interest to economic and social historians sociologists of health gender sexuality and economists

Gender, Identity & Reproduction S. Earle, G. Letherby, 2003-10-31 *Gender Identity and Reproduction* draws on a variety of perspectives relevant to an understanding of reproduction across the life course Through a consideration of the representation of reproductive identities and experiences the book highlights difference and diversity in relation to contemporary reproductive choices The book focuses on women's and men's experiences of agency control and negotiation within the context of cultural medical political theoretical and lay ideologies of the reproductive process in contemporary Western societies

Intersections: Women on Law, Medicine and Technology Kerry Petersen, 2019-05-23 First published in 1997 this volume explores how we live in a society which is developing beyond human experience and comprehension fast Advances in

technology and medicine are profoundly affecting the manner of human living from the beginning through to the end of life. These advances present exciting and demanding challenges to law makers, policy makers and healthcare providers who make decisions about genetics, human reproduction, competence, medical treatment priorities and dying. They also compel us to pay attention to human rights. This international collection of essays combines the thoughts and ideas of women scholars writing about these complex developments and aims at provoking debate and dissension as well as an opportunity for reflection. The writers explore a range of common themes in different areas and provide a coherent framework for law and policy making to serve as a foundation for the challenges ahead.

Surrogate Motherhood and the Politics of Reproduction Susan Markens, 2007. In an analysis of legislative responses to surrogacy in New York and California, the author explores how discourses about gender, family, race, genetics, rights and choice have shaped policies aimed at this issue. She examines the views of legislators, women's organizations, religious groups, the media and others.

The ^AOxford Handbook of Gender and Politics Georgina Waylen, Karen Celis, Johanna Kantola, S. Laurel Weldon, 2013-03-11. The Oxford Handbook of Gender and Politics brings to political science an accessible and comprehensive overview of the key contributions of gender scholars to the study of politics and it shows how these contributions produce a richer understanding of politics and societies.

Women, Medicine, Ethics and the Law Susan Sherwin, Barbara Parish, 2020-09-10. This title was first published in 2002. A collection of articles focused on women within a general study of medicine, ethics and the law. Topics covered include areas where the institutions of medicine, ethics and the law intersect in women's reproductive and sexual lives, the impact of legal policies and dominant ethical beliefs on many aspects of women's health and the health practices and policies of bioethics and health law. The editors recognise that it is important not to lose sight of social differences other than gender such as race, ethnicity, class, age, sexuality, religion, level of physical and mental ability and family relationships. In their approach they seek to consider the lives and experiences of women as primary. Hence they focus on the question of how women's encounters with the health care system are structured by gender and other socially significant dimensions of their lives rather than the question of how women differ from the male norm.

Medicine as Culture Deborah Lupton, 2012-03-22. Lupton's newest edition of *Medicine as Culture* is more relevant than ever. Trudy Rudge, Professor of Nursing, University of Sydney. A welcome update of a text that has become a mainstay of the medical sociologist's library. Alan Radley, Emeritus Professor of Social Psychology, Loughborough University. *Medicine as Culture* introduces students to a broad range of cross disciplinary theoretical perspectives using examples that emphasize bodies and visual images. Lupton's core contrast between lay perspectives on illness and medical power is a useful beginning point for courses teaching health and illness from a socio-cultural perspective. Arthur Frank, Department of Sociology, University of Calgary. *Medicine as Culture* is unlike any other sociological text on health and medicine. It combines perspectives drawn from a wide variety of disciplines including sociology, anthropology, social history, cultural geography and media and cultural studies. The book explores the ways in which

medicine and health care are sociocultural constructions ranging from popular media and elite cultural representations of illness to the power dynamics of the doctor patient relationship The Third Edition has been updated to cover new areas of interest including studies of space and place in relation to the body actor network theory as it is applied in research related to medicine The internet and social media and how they contribute to lay health knowledge and patient support complementary and alternative medicine obesity and fat politics Contextualising introductions and discussion points in every chapter makes *Medicine as Culture Third Edition* a rigorous yet accessible text for students Deborah Lupton is an independent sociologist and Honorary Associate in the Department of Sociology and Social Policy University of Sydney
