Creditor Protection in Private Equity-Backed Leveraged Buyout and Recapitalisation Practices Hasan Erdem

Private equity backed leveraged buyout LBO and leveraged recapitalisation practices have been on the rise since the early 1970s when the LBO model was first invented. They continue to play a major role for investors for their less transparent and less bureaucratic investment models outside of capital markets where financial regulations become tighter following the financial crisis of 2008 affecting global capital markets in a chain reaction. Private equity backed LBOs and leveraged recapitalisations continue to be popular investment models however they carry risks both at the target company level and on a macroeconomic level due to the interconnectedness of these investments with global capital markets for funding and refinancing of acquisition finance debts. Creditor protection mechanisms of company and insolvency law therefore play a central role in preventing or dealing with failures that may be triggered at the target company level and have detrimental effects for all creditors and the economy. Though the European legal capital system must be critically revisited, England's and Germany's already mature markets and legal systems should help in developing a better interpretation of these rules in developing economies like Turkey consequently establishing a solid base for this investment practice in these economies. Bank Insolvency Law in Developing Economies Kayode Akintola, Folashade

Adeyemo, 2022-12-30 The subject of bank stability has been under a great amount of political and legislative scrutiny since the mid 2007 to late 2009 global financial crisis. However these efforts have centred on developed economies. Little coverage is given to strategies adopted by many developing economies. While there is a global discourse on the subject of insolvency generally there is ample scope to contribute to the growing body of work on the narrow subject of bank insolvencies. This book provides a unique perspective on an emerging theme in at least two respects. First is the focus on selected developing economies and selected developed economies in the EMEA region alongside cross border developments with the objective of deciphering the regulatory approach to bank insolvencies. The second is the analytical consideration of methods that may be implemented to preclude or resolve bank insolvencies in developing economies. This book explores the nexus between developing economies and their banking institutions. Developing economies are acutely dependent on their banks for the functioning of their cash based economies. Recent events however suggest a weakness in the long term viability of some of their banks and a mixed bag regulatory approach to redress this weakness. This book evaluates the effectiveness of regulatory frameworks in selected developing economies that are designed to prevent or resolve the insolvency of banks. At a time of global economic uncertainty this book will prove to be a valuable resource to the discourse on the viability of banks businesses and economies in developing States. *Introduction to Business Law* Lucy Jones, 2019 The leading textbook on this subject. *Introduction to Business Law* is an ideal companion to law modules for business management and finance and accounting students.
