Rescuing Regulation Reza R. Dibadj, 2012-02-01 The traditional debate on governmental regulation has run its course with economically minded analysts pointing to regulation's inefficiency while those focused on justice purposefully avoid the economic paradigm to defend regulation's role in protecting consumers, workers and society's disadvantaged. In *Rescuing Regulation* Reza R. Dibadj challenges both camps. He squarely addresses the shortcomings of the conventional economic critique that portrays regulation as a waste and also confronts those focused on justice to marshal economic arguments for public intervention against social inequities and abusive market behavior. Providing novel answers to the questions of why and how to regulate, Dibadj contends that the law and economics paradigm must not remain an apologist for laissez faire public policy. He also demonstrates how incorporating the latest economics and revamping institutions can help improve our public agencies. *Rescuing Regulation* not only suggests ways to develop public institutions reflective of a democracy but also broadly outlines how social science can inform normative legal discourse.

Digital Forensics and Cyber Crime Pavel Gladyshev, Marcus K. Rogers, 2012-11-28 This book contains a selection of thoroughly refereed and revised papers from the Third International ICST Conference on Digital Forensics and Cyber Crime, ICDF2C 2011, held October 26-28 in Dublin, Ireland. The field of digital forensics is becoming increasingly important for law enforcement, network security and information assurance. It is a multidisciplinary area that encompasses a number of fields including law, computer science, finance, networking, data mining and criminal justice. The 24 papers in this volume cover a variety of topics ranging from tactics of cyber crime investigations to digital forensic education, network forensics and the use of formal methods in digital investigations.
