Drug Testing in the Workplace S. Macdonald, P. Roman, 2012-12-06 Previous volumes have been well received and the present work should be no exception In a field where advances contribute to the widening gap between clinician and researchers this volume serves to close that distance Alcoholism Clinical and Experimental Research from a review of a previous volume Research Advances in Alcohol and Drug Problems. **Alcohol and Drug Problems** Reginald Smart, 2013-11-22 This book continues the series of reviews of research advances first published in 1974 The editors aim here is to present critical and integrative reviews by internationally recognized scholars of areas in which there has been much recent research In this task we have been greatly helped by the staff of Plenum Press and the Advisory Panel listed at the front of this volume Several members of the Panel have retired Dr W M D Paton Dr K Bruun Dr K F Killam and Dr J R Seeley Dr Klaus Makela has accepted our invitation to join the Panel Unfortunately one member of the Panel Professor William McGlothlin died as a result of a tragic accident He was a gifted and sensitive researcher His work over many years was well known to those studying alcohol and drug problems We want to acknowledge his contributions to the Research Advances Series and to the field in general The editors wish to acknowledge the help of Julliana Newell Ayoub in preparation of this volume This volume contains three papers by H Fingarette R Room and B Kissin on The Disease Concept They were originally prepared for an earlier volume but could not be included because of scheduling problems The editors and not the authors are responsible for this delay Because they are primarily philosophical and theoretical in nature they are not diminished in value by the lesser number of references to recent research

*Addiction in the Lives of Registered Nurses and Their Wake-Up Jolt to Recovery* Carol Stanford, 2018-10-15. In this age of increasing headlines about drug addiction and prescription drug abuse this book is a timely revelation of how the nursing profession is also impacted by substance abuse. It allows nurses who are the most trusted profession in society who have been hidden within their profession and living with substance use disorders to openly voice their personal experiences with addiction. Seven nurses detail their journey through family dynamics early use as nursing students and later career nurses as they traveled deeper and deeper into their addiction. They discuss their shame, humiliation and dejection under the throes of the compelling forces of drugs and alcohol. They also describe how their family, other nurses, the healthcare system and society assisted them in perpetuating their deception and denial about their disease. They explain how they lied, stole and cheated those around them to maintain their addiction. Each explains in detail the confrontations and the jolt and wake up call it took for them to awaken, become sober and truly enter recovery. They are all candid and forthright in order to help others that are impacted by this horrific and complex disease. They each share how recovery is possible when appropriate attitudes and tools are put in place to support nurses suffering from the devastation of addiction. Their stories bring attention to the importance of intervention, treatment and recovery communities within the nursing profession. Recovery is emphasized as a gift by each of these nurses. The nurses and the researcher provide suggestions and recommendations to assist the healthcare community in addressing addiction in nursing. This book reveals how recovery for nurses is a major public health benefit.
