Research And The Library:

Research within the Disciplines Peggy Keeran, Michael Levine-Clark, 2014-04-28 Research within the Disciplines is designed to help reference librarians and students studying to become librarians gain that deeper understanding of disciplinary differences that allows them to comfortably solve information needs rather than merely responding to questions and practical knowledge about how to work with researchers in a library setting The book has three chapters that cover the disciplines at the broadest level humanities social sciences and sciences plus supplemental chapters that focus on associated disciplines research in history business and engineering research using government sources and across disciplines interdisciplinary and critical information literacy For the second edition of Research within the Disciplines several chapters have been added that together give a broader and deeper overview of research across all subject areas research practices of creative and performing artists and of clinical scientists research in international documents research strategies for foreign language materials and visual literacy across the disciplines Major shifts in technology have been accounted for that have changed how we do research and have expanded the range of resources available to researchers in all disciplines All of the chapters have been rewritten or heavily revised this is much more a new book than a new edition

How to Use a Research Library David R. Beasley, 1988 Most of the 31 000 libraries in the U S and Canada the 16 700 in England the 4 800 in Egypt and the many other libraries around the world contain research rooms and special collections How to Use a Research Library a unique guide for researchers provides essential materials from these special collections Beginning with a basic introduction that describes the layout and cataloging systems of research libraries and proceeding to more sophisticated levels of research it discusses the most efficient methods of library research helping readers to find the most appropriate bibliographical tools Written simply and organized for easy access the guide covers every aspect of research from the rudimentary to the most advanced Part I explains the layout of research libraries and introduces readers to the cataloging systems and various reference shelf books such as the Cumulative Book Index It also instructs readers on the use of requisition slips and supplemental catalogs Part II explains how to locate materials using various bibliographies reference books and the magazine and newspaper indices It describes the new computer databases the on line computer search and the inter library loan system as well as providing a brief summary of research procedures for readers who need a quick refresher or wish to begin research immediately Part III explores the methodology of research by discussing how to use library sources for particular types of research and research rules of thumb It also offers guidelines on how to use specific library divisions and collections and gives particulars about the world's major research libraries With full bibliographic citations and step by step examples based on the research libraries of the New York Public Library this authoritative handbook will teach even the most seasoned researchers new techniques and fact finding tips
