Research Design in Anthropology John A. Brim, David H. Spain, 1984-01-01      *Research Design in Anthropology: Paradigms and Pragmatics in the Testing of Hypotheses* John A. Brim, David H. Spain, 1974      Research Methods in Anthropology H. Russell Bernard, 2011-04-16 Research Methods in Anthropology is the standard textbook for methods classes in anthropology Written in Russ Bernard's unmistakable conversational style his guide has launched tens of thousands of students into the fieldwork enterprise with a combination of rigorous methodology wry humor and commonsense advice Whether you are coming from a scientific interpretive or applied anthropological tradition you will learn field methods from the best guide in both qualitative and quantitative methods      Handbook of Methods in Cultural Anthropology H. Russell Bernard, Clarence C. Gravlee, 2014-07-08 The Handbook of Methods in Cultural Anthropology now in its second edition maintains a strong benchmark for understanding the scope of contemporary anthropological field methods Avoiding divisive debates over science and humanism the contributors draw upon both traditions to explore fieldwork in practice The second edition also reflects major developments of the past decade including the rising prominence of mixed methods the emergence of new technologies and evolving views on ethnographic writing Spanning the chain of research from designing a project through methods of data collection and interpretive analysis the Handbook features new chapters on ethnography of online communities social survey research and network and geospatial analysis Considered discussion of ethics epistemology and the presentation of research results to diverse audiences round out the volume The result is an essential guide for all scholars professionals and advanced students who employ fieldwork      *Mixed Methods in Ethnographic Research* Pertti J. Peltto, 2017-03-03 Mixed Methods in Ethnographic Research Historical Perspectives captures the dynamic history and development of mixed methods research in a narrative of personal discovery growth and experience Distinguished ethnographer and methodologist Pertti Peltto who first called for the integration of qualitative and quantitative research methods nearly half a century ago establishes a direct line between the earliest examples of ethnographic research and the ongoing mixed method discussions in academic institutions throughout the world By bringing together such distinct historical perspectives with his own reflections on mixed methods research Peltto offers a rare and endlessly enriching account that will satisfy the ever growing need for a better quality of practical data gathering and give researchers a foundation for promoting mixed methods in the future      **A Companion to Medical Anthropology** Merrill Singer, Pamela I. Erickson, 2015-04-20 A Companion to Medical Anthropology examines the current issues controversies and state of the field in medical anthropology today Provides an expert view of the major topics and themes to concern the discipline since its founding in the 1960s Written by leading international scholars in medical anthropology Covers environmental health global health biotechnology syndemics nutrition substance abuse infectious disease and sexuality and reproductive health and other topics      Understanding the Cultures of Fishing Communities James R. McGoodwin, Food and Agriculture Organization of

the United Nations,2001-01-01 Small scale fishing accounts for almost 95% of the world s fishing and it has been estimated that small scale fishing activities support the livelihoods of more than 200 million people worldwide The purpose of this document is to help fisheries officials gain a clearer understanding of the cultures of small scale fishing communities It is hoped this will enable the development of more successful management policies and practices and empower people in such communities to improve their livelihoods The document highlights the importance of sustaining the rights of access to resources and the integration of cultural considerations into fisheries management policies It includes six case studies from distinct cultural regions of the world *The Ethnographer's Method* Alex Stewart,1998-06-17 In this volume Alex Stewart shows novice and experienced ethnographers how to explain and present the methods they use in terms understood by those not in the field **The Role Of An Environmental NGO In The Landmark Florida Everglades Restoration: An**

Evaluation Models George F. Madaus,M. Scriven,D.L. Stufflebeam,2012-12-06 Attempting fonnally to evaluate something involves the evaluator coming to grips with a number of abstract concepts such as value merit worth growth criteria standards objectives needs nonns client audience validity reliability objectivity practical significance accountability improvement process pro duct fonnative summative costs impact infonnation credibility and of course with the tenn evaluation itself To communicate with colleagues and clients evaluators need to clarify what they mean when they use such tenns to denote important concepts central to their work Moreover evaluators need to integrate these concepts and their meanings into a coherent framework that guides all aspects of their work If evaluation is to lay claim to the mantle of a profession then these conceptualizations of evaluation must lead to the conduct of defensible evaluations The conceptualization of evaluation can never be a one time activity nor can any conceptualization be static Conceptualizations that guide evaluation work must keep pace with the growth of theory and practice in the field Further the design and conduct of any particular study involves a good deal of localized conceptualization Ethnobotany Gary J.

Martin,2014-07-29 Ethnoecology has blossomed in recent years into an important science because of the realization that the vast body of knowledge contained in both indigenous and folk cultures is being rapidly lost as natural ecosystems and cultures are being destroyed by the encroachment of development Ethnobotany and ethnozoology both began largely with direct observations about the ways in which people used plants and animals and consisted mainly of the compilation of lists Recently these subjects have adopted a much more scientific and quantitative methodology and have studied the ways in which people manage their environment and as a consequence have used a much more ecological approach This manual of ethnobotanical methodology will become an essential tool for all ethnobiologists and ethnoecologists It fills a significant gap in the literature and I only wish it had been available some years previously so that I could have given it to many of my students I shall certainly recommend it to any future students who are interested in ethnoecology I particularly like the

sympathetic approach to local peoples which pervades this book It is one which encourages the ethnobotanical work by both the local people themselves and by academically trained researchers A study of this book will avoid many of the arrogant approaches of the past and encourage a fair deal for any group which is being studied This manual promotes both the involvement of local people and the return to them of knowledge which has been studied by outsiders **Social Science**

**Methodology** John Gerring, 2011-12-15 John Gerring's exceptional textbook has been thoroughly revised in this second edition It offers a one volume introduction to social science methodology relevant to the disciplines of anthropology economics history political science psychology and sociology This new edition has been extensively developed with the introduction of new material and a thorough treatment of essential elements such as conceptualization measurement causality and research design It is written for students long time practitioners and methodologists and covers both qualitative and quantitative methods It synthesizes the vast and diverse field of methodology in a way that is clear concise and comprehensive While offering a handy overview of the subject the book is also an argument about how we should conceptualize methodological problems Thinking about methodology through this lens provides a new framework for understanding work in the social sciences *Social Research Methods* H. Russell Bernard, 2013 Bernard does an excellent job of not only showing how to practice research but also provides a detailed discussion of broader historical and philosophical contexts that are important for understanding research **Ethnography** David M. Fetterman, 2019-09-19

David M Fetterman captures the ethnographic imagination with the Fourth Edition of his popular text *Ethnography Step by Step* He shares new case examples of his work to highlight the illuminating power of reflexivity and theory The new edition expands the discussion of critical concepts such as culture contextualization emic and etic distinctions and symbols The book provides insights into the use of technology in ethnography from qualitative data analysis software to data visualization and Questions for Reflection have been added to the end of each chapter Fetterman is a seasoned educator evidenced by both the clarity of his thinking and the simplicity of his writing

**Football and Violent Extremism** Alberto Testa, Massimiliano Maidano, Hadidža Borović, 2024-11-18 This book examines the ways that nationalist leaders and extremist groups have used football to advance their often violent ideological narratives and to recruit and radicalise young people Drawing on applied ethnographic research with the Ultra fan groups of Bosnia and Herzegovina BiH the book explores the behavioural dynamics of the BiH Ultras both on and outside of the football terraces The book shines important new light on the Ultras ideology organisation and youth recruiting strategies and their connections with other extremist groups In a country and region divided on ethnic and religious lines in which far right and ethno nationalist groups are a visible presence in politics and society this book helps us to better understand why when and how BiH youth choose to join these groups and why when and how these groups participate in violent acts hate speech crime and racist actions The book has important implications for efforts to counter violent extremism across the Western Balkans and beyond This is valuable reading for any researcher

advanced student policy maker or practitioner working in sport studies political science criminology development studies security studies or post conflict studies      **Fieldnotes** Roger Sanjek, 2019-06-30 Thirteen distinguished anthropologists describe how they create and use the unique forms of writing they produce in the field They also discuss the fieldnotes of seminal figures Frank Cushing Franz Boas W H R Rivers Bronislaw Malinowski and Margaret Mead and analyze field writings in relation to other types of texts especially ethnographies Unique in conception this volume contributes importantly to current debates on writing texts and reflexivity in anthropology      *These "Thin Partitions"* Joshua Englehardt, Ivy Rieger, 2017-05-15 *These Thin Partitions* explores the intellectual and methodological differences that separate two of the four subdisciplines within the field of anthropology archaeology and cultural anthropology Contributors examine the theoretical underpinnings of this separation and explore what can be gained by joining them both in university departments and in field research In case studies highlighting the benefits of interdisciplinary collaboration contributors argue that anthropologists and archaeologists are simply not speaking the same language and that the division between fields undermines the field of anthropology as a whole Scholars must bridge this gap and find ways to engage in interdisciplinary collaboration to promote the health of the anthropological discipline By sharing data methods and ideas archaeology and cultural anthropology can not only engage in more productive debates but also make research accessible to those outside academia *These Thin Partitions* gets to the heart of a well known problem in the field of anthropology and contributes to the ongoing debate by providing concrete examples of how interdisciplinary collaboration can enhance the outcomes of anthropological research Contributors Fredrik Fahlander Lilia Fernandez Souza Kent Fowler Donna Goldstein Joseph R Hellweg Derek Johnson Ashley Kistler Vincent M LaMotta John Monaghan William A Parkinson Paul Shankman David Small

**Education of the Self** Gerald Weinstein, Joy Hardin, Matt Weinstein, 1982      Learning How to Ask Charles L. Briggs, 1986-07-25 Interviews are ubiquitous in modern society and they play a crucial role in social scientific research But as Charles Briggs convincingly argues in this book received interviewing techniques rest on fundamental misapprehensions about the nature both of the interview as a communicative event and of the nature of the data that it produces Furthermore interviewers rarely examine the compatibility of interviews as a means of acquiring information to one another These oversights often blind interviewers to ensuing errors of interpretation as well as to the limitations of the interview as a means of acquiring data To conflict these problems Professor Briggs presents an analysis of the communicative blunders that he himself committed in conducting research interviews among Spanish speakers in northern New Mexico By focusing on these errors and exploring how they may be avoided he is able to propose new techniques for designing implementing and analyzing interview based research These rest on identifying the subjects resources for conveying information and the relative compatibility of the shared rules and understandings that underlie their strategies with those associated with interviews Critical of existing paradigms of interviewing which he sees as deriving from Western folk theories of reality and

communication Briggs shows that the development of more sophisticated interviewing methodologies requires further research into interviewing itself Briggs s conclusions provide a basis for the reexamination of current uses of interviews in a wide range of contexts from social science research to job applications welfare and health care delivery criminal and legal investigations journalism and broadcasting and other areas of everyday life His book will appeal to linguists sociologists anthropologists historians psychologists as well as other readers whose research or professional activities depend on the use of interviews     *Padju Epat* Alfred B.
