Survey Research in the Social Sciences Charles Y. Glock, John Bennett, 1967-12-31 Survey research was for a long time thought of primarily as a sociological tool It is relatively recently that this research method has been adopted by other social sciences and related professional disciplines The amount and quality of its use however vary considerably from field to field This volume describes the elementary logic of survey design and analysis and provides for each discipline an evaluation of how survey research has been used and conceivably may be used to deal with the central problems of each field Alternative Real Estate Research Ling Hin Li, 2014-09-15 This book aims to provide insight into the soft side of real estate research and the interesting results and implications of the real estate research outside the traditional realm of investment financial aspects The book also attempts to answer what constitutes the so called soft side of real estate research if we shift our focus from the usual financial returns and investment analysis It also attempts to address whether there is such thing as an alternative real estate research paradigm The book also argues that research in real estate should not only be limited to land and property market performance analyses as this may greatly impair the potential research implications of various real estate studies The book argues that such analyses take on a very myopic view of real estate research This book will interest many who wish to learn more about the alternative aspect of real estate research which is more than just about investment analysis
