Subcommittee on Employment, Manpower, and Poverty, 1971 Cross-Cultural Roots of Minority Child Development Patricia M. Greenfield, Rodney R. Cocking, 2014-12-05 Cross Cultural Roots of Minority Child Development was the first volume to analyze minority child development by comparing minority children to children in their ancestral countries rather than to children in the host culture It was a ground breaking volume that not only offered an historical reconstruction of the cross cultural roots of minority child development but a new cultural historical approach to developmental psychology as well It was also one of the best attempts to develop guidelines for building models of development that are multicultural in perspective thus challenging scholars across the behavioral sciences to give more credence to the impact of culture on development and socialization in their respective fields of work A true classic Cross Cultural Roots of Minority Child Development will remain an essential resource for any scholar who is interested in minority child development and engages in cross cultural research and multidisciplinary methodologies **Cross-Cultural Child Development for Social Workers** Lena Robinson, 2020-01-03 This innovative text explains child development from a cross cultural perspective Using examples to illuminate key points it considers a range of topics from attachment to identity and communication to socialization This is essential reading for social workers at all stages of their careers who want to develop culturally sensitive practice

Social and Emotional Adjustment and Family Relations in Ethnic Minority Families Ronald D. Taylor,Margaret C. Wang,Margaret C Wang,2013-11-26 This collection of essays addresses issues related to the intersection of family relationships and several contexts for the social and emotional development of ethnic minority adolescents The papers are organized in sections under subtitles which reflect three contextual frames through which these issues may be examined The first section focuses on the relationship between economic factors and resources on the one hand and family relations as environments for development on the other The next part focuses on family and peer networks and relations as contexts for the emotional and social development of adolescents The last section takes neighborhood and school as contexts for and determinants of social and emotional adjustment in adolescence Like much of the extant work and current thought concerning development in ethnic minority children and

adolescents the authors have highlighted the more stressful and negative aspects of these several contexts There are a few explicit and several implicit references made to supportive and more positive contexts and manifestations of relationships which frame the developmental experiences of ethnic minority adolescents These serve as a reminder that many ethnic minority adolescents do overcome the odds against success and grow into healthy and wholesome adults However in large measure this book is a contribution to our understanding of the problematic circumstances under which a significant segment of the population exists reminding us that life for ethnic minority adolescents is difficult The fact that some of these young people manage to overcome the negative and stressful aspects of their experiences and defy the implicit prediction of failure to thrive is truly remarkable
