## **Research In Family Interaction Readings And Commentary:**

*Research in Family Interaction* Antonio J. Ferreira, William D. Winter, 1971      Marital Interaction John Mordechai Gottman, 2013-10-22 Marital Interaction Experimental Investigations deals with experimental studies on marital interaction. Emphasis is on the importance of the role of description in the study of social interaction. Methods for the analysis of pattern and sequence including cross spectral time series analysis are also presented. Comprised of 15 chapters, this book begins with a historical review of several research traditions that have concerned themselves with families and marriages: the sociological tradition, the family therapy or systems tradition, the social learning tradition, and the developmental tradition. Research that points to the potential importance of the observation of consensual decision making processes is also reviewed. A model of marital interaction called the Structural Model, which can be used to predict changes in marital satisfaction, is described. Subsequent chapters focus on the Couples Interaction Scoring System, an observational system for categorizing marital interaction; modern concepts of the assessment of reliability, particularly the stringent assessment that is necessary for sequential analysis; differences between well functioning and poorly functioning marriages; couples' interactional styles in terms of communication skill deficits and the concept of an individual's social competence. This monograph will be of interest to psychologists engaged in research on marriage as well as sociologists and clinical researchers.      **Current Topics in**

**Clinical and Community Psychology** Charles D. Spielberger, 2013-10-22 Current Topics in Clinical and Community Psychology Volume 3 covers new approaches to the treatment of emotional disorders. The book discusses the use of imagery, fantasy, and daydream techniques in psychotherapy; the psychosocial behavioral model for therapeutic intervention; and theory and research on family therapy. The text describes the use of information feedback as a method of clinical intervention and consultation; the need for psychologists who work with minority groups, i.e., black community, as well as the epidemiology and prognosis of psychiatric disorders in the naval service. Community psychologists, clinical psychologists, psychiatrists, and students taking related courses will find the book useful.      **Sourcebook of Family Theories and Methods** Pauline

Boss, William J. Doherty, Ralph LaRossa, Walter R. Schumm, Suzanne K. Steinmetz, 2008-11-19 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots, i.e., sources from which these orientations and strategies flow. Thus an appropriate way to preface this book is to talk first of its roots, its beginnings. In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself. A goal was thus set to write a book that like Janus would face both backward and forward, a book that would give readers both a perspective on the past and a map for the future. There were precedents for such a project. The Handbook of Marriage and the Family, edited by Harold Christensen and published in 1964, the two Contemporary Theories about the Family volumes edited by Wesley Burr, Reuben Hill, F. Ivan Nye, and Ira Reiss, published in 1979, and the Handbook of Marriage and the Family, edited by Marvin Sussman and Suzanne Steinmetz, then in production.
