Construction Innovation Finn Orstavik, Andrew R. J. Dainty, Carl Abbott, 2015-01-20 Construction innovation is an important but contested concept both in industry practice and academic reflection and research A fundamental reason for this is the nature of the construction industry itself the industry and the value creation activities taking place there are multi disciplinary heterogeneous distributed and often fragmented This book takes a new approach to construction innovation revealing different perspectives set in a broader context It coalesces multiple theoretical and practice based views in order to stimulate reflection and to prepare the ground for further synthesis By being clear cogent and unambiguous on the most basic definitions it can mobilise a plurality of perspectives on innovation to promote fresh thinking on how it can be studied enabled measured and propagated across the industry This book does not gloss over the real life complexity of construction innovation Instead its authors look explicitly at the challenges that conceptual issues entail and by making their own position clear they open up fresh intellectual space for reflection *Construction Innovation*

examines innovation from different positions and through different conceptual lenses to reveal the richness that the theoretical perspectives offer to our understanding of the way that the construction sector actors innovate at both project and organizational levels The editors have brought together here leading scholars to deconstruct the concept of innovation and to discuss the merits of different perspectives their commonalities and their diversity The result is an invaluable sourcebook for those studying and leading innovation in the design the building and the maintenance of our built environment

A Study of Innovative Behavior in High Technology Product Development Organizations Mark Anthony Robben, 2018-07-27 Originally published in 1999 this volume integrates several streams of research on the antecedents of innovation to test a model of individual innovative behavior in a high technology product development organization The sample for this research was a group of Engineers Designers and Lab Technicians employed in an engineering department responsible for the development of high technology products Structural equation modeling techniques and multiple linear regression were used to evaluate the research
