Media Exposure During Infancy and Early Childhood Rachel Barr,Deborah Nichols Linebarger,2016-11-24 This book discusses the burgeoning world of young children s exposure

to educational media and its myriad implications for research theory practice and policy Experts across academic disciplines and the media fill knowledge gaps and address concerns regarding apps eBooks and other screen based technologies which are being used by younger and younger children and content delivery and design Current research shows the developmental nuances of the child as learner in home school and mobile contexts and the changes as parenting and pedagogy accommodate the complexities of the new interactive world The book also covers methods for evaluating the quality of new media and prosocial digital innovations such as video support for separated families and specialized apps for at risk toddlers Highlights of the coverage The role of content and context on learning and development from mobile media Learning from TV and touchscreens during early childhood Educational preschool programming How producers craft engaging characters to drive content delivery The parental media mediation context of young children s media use Supporting children to find their own agency in learning Media Exposure During Infancy and Early Childhood is an essential resource for researchers clinicians and related professionals and graduate students in diverse fields including infancy and early childhood development child and school psychology social work pediatrics and educational psychology *Resources in Education*, 2000-10 Television and Child Development Judith Van Evra, 2004-07-21 Television continues to play a major role in the lives of most children and adolescents but current research also reflects the explosive growth in new technologies and their widespread use by young people Integrating information from communication literature as well as from child development and other psychological domains author Judith Van Evra presents a summary and synthesis of what is currently known about the media s impact on children s physical cognitive social and emotional development to help discern the complex and significant interplay between other forces in a child s life and the use of various media This third edition contains updated and expanded coverage of research findings and a review of changing trends in media use including computers the Internet books and magazines music videos and video games as well as television New chapters focus on basic research designs and methodologies cultural diversity health related matters and lifestyle choices media s impact on various social emotional aspects of a child s development the use of technology for information and for entertainment and intervention possibilities parent strategies and education An overall conclusions section at the end of the book provides a cogent summary of findings to date and stimulates discussion of questions and ideas for future research Television and Child Development explores how and to what extent television and other media actually affect children and what role other variables may play in mediating their impact so that we can maximize technology s potential for enriching children s cognitive social and emotional development while at the same time minimizing any negative influence This text is appropriate for researchers teachers and students in communications developmental and social psychology and education as well as in areas of advertising leisure studies family studies and health promotion Media Violence and Children Douglas A. Gentile, 2014-09-30 Stripping away the hype this book describes how when and why media violence can influence children of different ages giving parents and

teachers the power to maximize the media's benefits and minimize its harm. There are many opinions about media violence and children but not all are supported by science. In this book the top experts gather the latest results from 50 years of scientific study as the basis for a comprehensive in depth examination of the complex issues surrounding the effects of media violence of different types. Each chapter focuses on a particular issue of concern including hot topics such as brain development, cyber bullying, video games and verbal aggression. Articles take into account factors such as economics, differences based on the ages of children and differences between types of media violence. This book provides the information parents and those who work with families need to make the best choices. It includes chapters specifically relevant to the types of bullying schools have the most trouble identifying and controlling. Most importantly the writing is both intelligent and accessible so that parents, educators, pediatricians and policymakers can understand and apply the findings presented.

Family Disintegration Anton Purcell, 2002. The contemporary family is being distracted, disturbed and distraught by societal pressures from every direction. The nuclear family concept, believed crucial to child rearing, is becoming passé according to census data. Or has the wave of disruption to families crested? It is hoped that this bibliography will serve as a useful tool to researchers seeking further information on families and the pressures being exerted upon them in the 21st century.

The Handbook of Children, Media, and Development Sandra L. Calvert, Barbara J. Wilson, 2010-12-13. The Handbook of Children, Media and Development brings together an interdisciplinary group of experts in the fields of developmental psychology, developmental science, communication and medicine to provide an authoritative, comprehensive look at the empirical research on media and media policies within the field. 25 newly commissioned essays bring new research to the forefront, especially on digital media, developmental research and public policy debates. Includes helpful introductions to each section, a theoretical overview of the field and a final chapter that offers a vision of future research. Contributors include key international authorities in the field.

Television Violence P. T. Kelly, 1999. If one culprit is suspected above all others for encouraging society to become more violent and unfeeling, it is television. This medium, which has become so pervasive in the last 50 years, seems to play an enormous role in the lives of the vast majority of people. But who controls the content which exerts such an enormous influence and to an extent controls the people? What are they doing now and what will they be doing tomorrow? Is violence essential to sell toothpaste and hamburgers? What are our children becoming and what will their children be like? Will every child carry a gun or other weapon just waiting for someone to trigger their violent nature and ignite their preprogrammed anger?

The Routledge International Handbook of Children, Adolescents, and Media Dafna Lemish, 2022-05-30. This second thoroughly updated edition of The Routledge International Handbook of Children, Adolescents and Media analyzes a broad range of complementary areas of study including children as media consumers, children as active participants in media making and representations of children in the media. The roles that media play in the lives of children and adolescents as well as their potential implications for their cognitive, emotional, social

and behavioral development have attracted growing research attention in a variety of disciplines This handbook presents a collection that spans a variety of disciplines including developmental psychology media studies public health education feminist studies and the sociology of childhood Chapters provide a unique intellectual mapping of current knowledge exploring the relationship between children and media in local national and global contexts Divided into five parts each with an introduction explaining the themes and topics covered the Handbook features over 50 contributions from leading and upcoming academics from around the globe The revised and new chapters consider vital questions by analyzing texts audience and institutions including media and its effects on children s mental health children and the internet of toys media and digital inequalities news and citizenship in the aftermath of COVID 19 The Handbook s interdisciplinary approach and comprehensive current and international scope make it an authoritative state of the art guide to the field of children s media studies It will be indispensable for media scholars and professionals policy makers educators and parents

Stop Teaching Our Kids To Kill, Revised and Updated Edition Lt. Col. Dave Grossman, Gloria Degaetano, 2014-08-05 Completely revised and updated a much needed call to action for every parent teacher and citizen to help our children and stop the wave of killing and violence gripping America s youth Newtown Aurora Virginia Tech Columbine There is no bigger or more important issue in America than youth violence Kids some as young as ten years old take up arms with the intention to murder Why is this happening Lt Col Dave Grossman and Gloria DeGaetano believe the root cause is the steady diet of violent entertainment kids see on TV in movies and in the video games they play witnessing hundreds of violent images a day Offering incontrovertible evidence based on recent scientific studies and research they posit that this media is not just conditioning children to be violent and see killing as acceptable but teaching them the mechanics of killing as well Stop Teaching Our Kids to Kill supplies the statistics interprets the copious research that exists on the subject and suggests the many ways to make a difference in your home at school in your community in the courts and in the larger world In using this book parents educators social service workers youth advocates and anyone interested in the welfare of our children will have a solid foundation for effective action and prevention of future Columbines Jonesboros and Newtowns

[Stop Teaching Our Kids to Kill](#) Lt. Col. Dave Grossman, Gloria Degaetano, 2009-11-04 There is perhaps no bigger or more important issue in America at present than youth violence Columbine Sandy Hook Aurora We know them all too well and for all the wrong reasons kids some as young as eleven years old taking up arms and with deadly frightening accuracy murdering anyone in their paths What is going on According to the authors of Stop Teaching Our Kids to Kill there is blame to be laid right at the feet of the makers of violent video games called murder trainers by one expert the TV networks and the Hollywood movie studios the people responsible for the fact that children witness literally thousands of violent images a day Authors Lt Col Dave Grossman and Gloria DeGaetano offer incontrovertible evidence much of it based on recent major scientific studies and empirical research that movies TV and video games are not just conditioning children to be violent and unaware of the

consequences of that violence but are teaching the very mechanics of killing Their book is a much needed call to action for every parent teacher and citizen to help our children and stop the wave of killing and violence gripping America s youth And most important it is a blueprint for us all on how that can be achieved In Paducah Kentucky Michael Carneal a fourteen year old boy who stole a gun from a neighbor s house brought it to school and fired eight shots at a student prayer group as they were breaking up Prior to this event he had never shot a real gun before Of the eight shots he fired he had eight hits on eight different kids Five were head shots the other three upper torso The result was three dead one paralyzed for life The FBI says that the average experienced qualified law enforcement officer in the average shootout at an average range of seven yards hits with less than one bullet in five How does a child acquire such killing ability What would lead him to go out and commit such a horrific act

A Cognitive Psychology of Mass Communication Fred W. Sanborn, Richard Jackson

Harris, 2019-01-15 In a constantly changing media landscape A Cognitive Psychology of Mass Communication is the go to text for any course that examines mass communication from a psychological perspective Now in its seventh edition the book continues its exploration of how our experiences with media affect the way we acquire and process knowledge about the world and how this knowledge influences our attitudes and behavior Updates include end of chapter suggestions for further reading new research and examples for a more global perspective as well as an added emphasis on the power of social media in affecting our perceptions of reality and ourselves While including real world examples the book also integrates psychology and communication theory along with reviews of the most up to date research The text covers a diversity of media forms and issues ranging from commonly discussed topics such as politics sex and violence to lesser studied topics such as emotions and prosocial media Readers will be challenged to become more sensitized and to think more deeply about their own media use as they explore research on behavior and media effects Written in an engaging readable style the text is appropriate for graduate or undergraduate audiences The accompanying companion website also includes resources for both instructors and students For students Chapter outlines and review questions Useful links For instructors Guidelines for in class discussions Sample syllabus Summaries Please visit www.routledge.com/cw/sanborn
