An Inventor in the Garden of Eden Eric Roberts Laithwaite, 1994-09 Eric Laithwaite takes the reader on a guided tour through the mysteries of invention stopping off to examine the laws of nature and engineering He shows how many of our inventions are based on designs which were evolved by the natural world over millions of years In fact we learn that the natural world has often found more efficient answers than we have to taxing engineering problems The shapes and sizes of both natural and Man made objects are largely dictated by the size and weight of the earth and by the properties of materials An Inventor in the Garden of Eden crosses many boundaries as well as natural history and engineering the author discusses religion economics and cosmology More than that the author deals with such fundamental topics as habit experience logic
