presuppositions Holton 1969a has deplored the widely accepted myth experimenticism according to which progress in science is presented as the inexorable result of the pursuit of logically sound conclusions from un biguous experimental data Surprisingly some of the leading scientists themselves Millikan is a good example have contributed to perpetuate the myth with respect to modern science being essentially empirical that is carefully tested experim tal facts free of a priori conceptions leading to inductive generalizations Based on the existing knowledge in a field of research a scientist formulates the guiding assumptions Laudan et al 1988 presuppositions Holton 1978 1998 and hard core Lakatos 1970 of the research program that constitutes the imperative of presuppositions which is not abandoned in the face of anomalous data Laudan and his group consider the following paraphrase of Kant by Lakatos as an important guideline philosophy of science without history of science is empty Starting in the 1960s this historical school has attempted to redraw and replace the positivist or logical empiricist image of science that dominated for the first half of the twentieth century Among other aspects one that looms large in these studies is that of guiding assumptions and has considerable implications for the main thesis of this monograph Chapter 2   Beyond Common Sense Eugene Borgida,Susan T. Fiske,2008-04-30 Beyond Common Sense addresses the many important and controversial issues that arise from the use of psychological and social science in the courtroom Each chapter identifies areas of scientific agreement and disagreement and discusses how psychological science advances our understanding of human behavior beyond common sense Features original chapters written by some of the leading experts in the field of psychology and law including Elizabeth Loftus Saul Kassin Faye Crosby Alice Eagly Gary Wells Louise Fitzgerald Craig Anderson and Phoebe Ellsworth The 14 issues addressed include eyewitness identification gender stereotypes repressed memories Affirmative Action and the death penalty Commentaries written by leading social science and law scholars discuss key legal and scientific themes that emerge from the science chapters and illustrate how psychological science is or can be used in the courts   **Library Notes and News** ,1919   *Commonsense Justice* Norman J. FINKEL,Norman J Finkel,2009-06-30 For the first time in our history U S prisons house over a million inmates enough to populate a city larger than San Francisco Building prisons is the new growth industry as the American public reacts to a perceived increase in violence and politicians take a hard line toward crime But this eagerness to construct more prisons raises basic questions about what the community wants and will tolerate and what the Supreme Court will sanction In this timely book Norman Finkel looks at the relationship between the law on the books as set down in the Constitution and developed in cases and decisions and what he calls commonsense justice the ordinary citizen s notions of what is just and fair Law is an essentially human endeavor a collection of psychological theories about why people think feel and behave as they do and when and why we should find some of them blameworthy and punishable But is it independent of community sentiment as some would contend Or as Finkel suggests do juries bring the community s judgment to bear on the moral blameworthiness of the defendant When jurors decide that the law is unfair or the punishment inappropriate for a particular

defendant they have sometimes nullified the law Nullification represents the jury s desire not to defeat but to perfect and complete the law It is the no confidence vote of commonsense justice refusing to follow the path the law has marked out and pointing to a new path based on what seem to be more just grounds Finkel brings to life the story behind the jury and judicial decisions interweaving anecdotes case law and social science research to present a balanced and comprehensive view of important legal and social policy issues **Book Bulletin** Chicago Public Library,1918 **Book Bulletin of the Chicago Public Library** Chicago Public Library,1919 **Commonsense Methods for Children with Special Needs** Peter S. Onyango

Okello,2025-05-22 What is truth How should we define it Should we define it christologically as Jesus did when he revealed himself to Thomas as the embodiment of truth or should we appeal to philosophy for help This book explores possible answers to these questions More specifically the book offers a brief survey of how different philosophical theories have attempted to define truth After finding them somewhat incomplete the book shows how an adequate account of truth is given by the Judeo Christian tradition s view of omniscience By drawing from the rich tradition of the church fathers the book notes how naturalistic views of truth fail to account for the existence of truth prior to the evolution of the human mind This problem however is a non issue for a theistic account of truth and makes a strong case for the existence of objective truth even before the human mind was designed
