**Research Topics in Graph Theory and Its Applications** Vadim Zverovich, 2019-06-24 This book considers a number of research topics in graph theory and its applications including ideas devoted to alpha discrepancy strongly perfect graphs reconstruction conjectures graph invariants hereditary classes of graphs and embedding graphs on topological surfaces It also discusses applications of graph theory such as transport networks and hazard assessments based on unified networks The book is ideal for developers of grant proposals and researchers interested in exploring new areas of graph theory and its applications

Nanoscale Spectroscopy and Its Applications to Semiconductor Research Y. Watanabe, S. Heun, G. Salviati, N. Yamamoto, 2008-01-11 Fabrication technologies for nanostructured devices have been developed recently and the electrical and optical properties of such nanostructures are a subject of advanced research This book describes the different approaches to spectroscopic microscopy i e Electron Beam Probe Spectroscopy Spectroscopic Photoelectron Microscopy and Scanning Probe Spectroscopy It will be useful as a compact source of reference for the experienced researcher taking into account at the same time the needs of postgraduate students and nonspecialist researchers by using a tutorial approach throughout

High Magnetic Field Science and Its Application in the United States National Research Council, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Committee to Assess the Current Status and Future Direction of High Magnetic Field Science in the United States, 2013-12-25 The Committee to Assess the Current Status and Future Direction of High Magnetic Field Science in the United States was convened by the National Research Council in response to a request by the National Science Foundation This report answers three questions 1 What is the current state of high field magnet science engineering and technology in the United States and are there any conspicuous needs to be addressed 2 What are the current science drivers and which scientific opportunities and challenges can be anticipated over the next ten years 3 What are the principal existing and planned high magnetic field facilities outside of the United States what roles have U S high field magnet development efforts played in developing those facilities and what potentials exist for further international collaboration in this area A magnetic field is produced by an electrical current in a metal coil This current exerts an expansive force on the coil and a magnetic field is high if it challenges the strength and current carrying capacity of the materials that create the field Although lower magnetic fields can be achieved using commercially available magnets research in the highest achievable fields has been and will continue to be most often performed in large research centers that possess the materials and systems know how for forefront research Only a few high field centers exist around the world in the United States the principal center is the National High Magnetic Field Laboratory NHMFL High Magnetic Field Science and Its Application in the United States considers continued support for a centralized high field facility such as NHFML to be the highest priority This report contains a recommendation for the funding and siting of several new high field nuclear magnetic resonance magnets at user facilities in different regions of the United States Continued advancement in

high magnetic field science requires substantial investments in magnets with enhanced capabilities High Magnetic Field Science and Its Application in the United States contains recommendations for the further development of all superconducting hybrid and higher field pulsed magnets that meet ambitious but achievable goals Research on Novel Correlation Coefficient of Neutrosophic Cubic Sets and Its Applications Huiling Xue,Minrong Yu,Chunfang Chen, Single valued neutrosophic cubic set is a good tool to solve the vague and uncertain problems because it contains more information The article first gives the correlation coefficient of single valued neutrosophic cubic sets Then a decision method is proposed and an application in pattern recognition is considered Finally examples are given to explain the feasibility of this method At the same time the comparative analysis shows the superiority of this method *The Use of Social Research in Federal Domestic Programs* United States. Gavrilova,Ana Maria Alves Coutinho Rocha,Carmelo Torre,David Taniar,Bernady O. Apduhan,2015-06-20 The five volume set LNCS 9155 9159 constitutes the refereed proceedings of the 15th International Conference on Computational Science and Its Applications ICCSA 2015 held in Banff AB Canada in June 2015 The 232 revised full papers presented in 22 workshops and a general track were carefully reviewed and selected from 780 initial submissions for inclusion in this volume They cover various areas in computational science ranging from computational science technologies to specific areas of computational science such as computational geometry and security **The Concept and Application of Transdisciplinarity in Intellectual Discourse and Research** MISTRA MISTRA,2011-06-09 Mapungubwe Institute for Strategic Reflection MISTRA was publicly launched as a think tank in March 2011 and took up the task of following a transdisciplinary approach to the research generated within the organisation The projects initiated by MISTRA integrate various streams of knowledge and expertise when examining complex issues such as nation formation economic growth social equity adaptable science and technology and other strategic topics related to South Africa's development as a democracy Serving in part as an intellectual movement and in part as a research institution activities are structured around diverse topics that require the opening up of intellectual space for strategic research and reflection specific but not exclusive to the African continent A project was launched The concept and application of transdisciplinarity in intellectual discourse and research The intent of the study was two fold in the first place the need for better theoretical understanding of a transdisciplinarity approach was identified as a

necessity and in the second place MISTRA intended to apply transdisciplinarity towards the opening up of an African approach guided in part by the Afrikology principles of the late Professor Dani Nabudere By orientation Transdisciplinarity is an approach that recognises a united and borderless intellectual terrain It is an attempt to formulate an integrative process of knowledge production and distribution in reaction to the twentieth century narrow discipline focus and hyper specialisation It responds to the multi layered challenges of diffused disciplines interlinked socio economic problems the impact of globalisation the de terretorialised nation state technological advancements environmental concerns agriculture and food security and health And it recognises that in history some of the most revolutionary breakthroughs in science and technology in fact happened on the margins of narrow disciplines
