Abstract

This Special Issue introduces the theoretical and methodological approach for specifying the character of the sociology of law through the concept of legal culture. Including this concept in the design of the socio-legal research can improve the questions towards legal phenomena and better identify the sociological perspective concerning other disciplines and legal knowledge. Still, it requires a better specification of what can be understood by legal culture from the sociological point of view. To this end, it proposes to refer to the concept, with “legal”, to what is attributable to the legal institutionalisation of the normative dimensions of social life. “Culture”, on the other hand, refers to cultural components to which recourse is made to reconnect those processes of institutionalisation to social norms, values and the more general cultural and social context of the law.

Key words

Legal culture; methodology; research design

Resumen

Este número especial presenta el enfoque teórico y metodológico para especificar el carácter de la sociología del derecho a través del concepto de cultura jurídica. La inclusión de este concepto en el diseño de la investigación socio-jurídica puede mejorar las preguntas hacia los fenómenos jurídicos e identificar mejor la perspectiva sociológica respecto a otras disciplinas y al conocimiento jurídico. Sin embargo, requiere una mejor especificación de lo que puede entenderse por cultura jurídica desde el punto de vista sociológico. Para ello, propone referir el concepto, con “jurídico”, a lo que es atribuible a la institucionalización jurídica de las dimensiones normativas de la vida social. “Cultura”, en cambio, se refiere a los componentes culturales a los que se recurre para

Research In Law And Sociology Volume3:

The Sociology of Law A. Javier Treviño, 2008 *Law and Social Movements* Michael McCann, 2017-07-05 The work of both socio legal scholars and specialists working in social movements research continues to contribute to our understanding of how law relates to and informs the politics of social movements In the 1990s an important line of new research most of it initiated by those working in the law and society tradition began to bridge the gaps between these two areas of scholarship This work includes new approaches to group legal mobilization politics analysis of the judicial impact on social reform struggles studies of individual legal mobilization in civil disputing and an almost entirely new area of research in cause lawyering It brings together the best of this research introduced by a detailed essay by the editor Critical Legal Studies and the Campaign for American Law Schools Paul Baumgardner, 2021-09-08 Recent political science research into the American legal academy has been captured by conservatism this research has framed the institutional and ideological developments occurring within the law schools over the past forty years solely through the prism of modern conservatism As a result political scientists have ignored the political struggles of one of the most important legal reform movements of the 1980s and overlooked the hope for leftist reform that existed within American law schools during this period Critical Legal Studies and the Campaign for American Law Schools tells the story of the critical legal studies movement This formidable movement sought to fundamentally reconstruct law schools train a new generation of leftist lawyers and replace the dominant form of legal consciousness governing the American legal system Instead of projecting a fatalism onto leftist reform this book relies on extensive archival research and interviews to illuminate the radical potential that lived in the American legal academy of the 1980s The critical legal studies movement was a towering presence in the law schools and its legacy continues to hold out political possibilities and reform lessons for leftist legal scholars today *Sociological Theory and Criminological Research* Mathieu Deflem, 2006-06-21 This volume highlights the value of sociological theorizing in various strands of criminological research and reveals the breadth and depth of criminological sociology in its explicit and informed reliance on insights from sociological theory It offers a range of perspectives and theories of criminal behavior and perspectives of social control *Research Handbook on Critical Legal Theory* Emiliós Christodoulidis, Ruth Dukes, Marco Goldoni, 2019 Critical theory characteristically linked with the politics of theoretical engagement covers the manifold of the connections between theory and praxis This thought provoking Research Handbook captures the broad range of those connections as far as legal thought is concerned and retains an emphasis both on the politics of theory and on the notion of theoretical engagement The first part examines the question of definition and tracks the origins and development of critical legal theory along its European and North American trajectories The second part looks at the thematic connections between the development of legal theory and other currents of critical thought such as Feminism Marxism Critical Race Theory varieties of post modernism as well as the various turns ethical aesthetic political of critical legal theory The third and final

part explores particular fields of law addressing the question how the field has been shaped by critical legal theory or what critical approaches reveal about the field with the clear focus on opportunities for social transformation Bowker's Law Books and Serials in Print ,1993 Research Methods in Environmental Law Andreas Philippopoulos-Mihalopoulos,Victoria Brooks,2017-11-24 This timely Handbook brings innovative free thinking and radical approaches to research methods in environmental law With a comprehensive approach it brings together key concepts such as sustainability climate change activism education and Actor Network Theory It considers how the Anthropocene subjects environmental law to critique and to the needs of the variety of bodies human and non human that require its protection This much needed book provides a theoretically informed analysis of methodological approaches in the discipline such as constitutional analysis rights based approaches spatial geographical analysis immersive methodologies and autoethnography which will aid in the practical critique and re imagining of Environmental Law **Colonialism in Africa 1870-1960: Volume 5, A Bibliographic Guide to Colonialism in Sub-Saharan Africa** L. H. Gann,Peter Duignan,1969 A comprehensive study of recent African history examining the political social and economic effects of colonialism **Sports Coaching Research** Anthony Bush,Michael Silk,David Andrews,Hugh Lauder,2013-05-02 This book raises critical questions about the explanatory framework guiding sports coaching research and presents a new conceptualization for research in the field Through mapping and contextualizing sports coaching research within a corporatized higher education the dominant or legitimate forms of sports coaching knowledge are problematized and a new vision of the field which is socially and culturally responsive communitarian and justice oriented emerges Register of Educational Research in the United Kingdom, 1992-1995 National Foundation For Educational Research,1995 This latest volume of the Register of Educational Research in the United Kingdom lists all the major research projects being undertaken in Britain during the latter months of 1992 the whole of 1993 and 1994 and the early months of 1995 Each entry provides names and addresses of the researchers a detailed abstract the source and amount of the grant where applicable the length of the project and details of published material about the research *Methodologies of Legal Research* Mark Van Hoecke,2011-02-28 Until quite recently questions about methodology in legal research have been largely confined to understanding the role of doctrinal research as a scholarly discipline In turn this has involved asking questions not only about coverage but fundamentally questions about the identity of the discipline Is it mainly descriptive hermeneutical or normative Should it also be explanatory Legal scholarship has been torn between on the one hand grasping the expanding reality of law and its context and on the other reducing this complex whole to manageable proportions The purely internal analysis of a legal system isolated from any societal context remains an option and is still seen in the approach of the French academy but as law aims at ordering society and influencing human behaviour this approach is felt by many scholars to be insufficient Consequently many attempts have been made to conceive legal research differently Social scientific and comparative approaches have proven fruitful However does the introduction of

other approaches leave merely a residue of legal doctrine to which pockets of social sciences can be added or should legal doctrine be merged with the social sciences What would such a broad interdisciplinary field look like and what would its methods be This book is an attempt to answer some of these questions **Aerial Targeting and the Laws of War**

Alexander P. Holder, 2025-09-30 A ground breaking socio legal investigation of the in situ legal considerations involved in targeting and the use of force Aerial Targeting and the Laws of War develops a new kind of evidence base for international action relating to the protection of civilians Investigating the materials surrounding a civilian casualty incident that took place in Afghanistan in 2010 the book explores how a single strike which was conducted in light of intelligence gathered by a militarised drone crew and resulted in the deaths of at least 15 civilians became a lawful strike that is a strike that was deemed to have been compliant with the laws of war both at the point at which munitions were released and following two internal investigations Through an ethnomethodological engagement with the transcripts interviews reports and other materials associated with the incident Alexander P Holder examines the methods by which military personnel produce and maintain legitimate targets for the use of force Re focusing debates surrounding civilian harm upon the praxeological details of the military practices which generate such harms this book will appeal to scholars of sociology military studies and socio legal studies with interests in the rules of war and ethnomethodological approaches to research *Making Sense of Sexual Consent*

Mark Cowling, Paul Reynolds, 2017-03-02 The issue of sexual consent has stimulated much debate in the last decade The contributors to this illuminating volume make sense of sexual consent from various conceptual standpoints socio legal post structural philosophical and feminist The volume comprises a range of studies all based around consent within a specific context such as criminal justice homosexuality sadomasochism prostitution male rape learning disabilities sexual ethics and the age of consent It is the first collection to publish exclusively on issues of sexual consent and both makes sense of sexual consent in contemporary society and guides debate towards better consent standards and decisions in the future Making Sense of Sexual Consent will excite considerable discussion amongst academics professionals and all those who think that freedom to make decisions about our sexual selves is important It will set the agenda for debate on sexual consent into the 21st Century **Risk Governance**

Accountability in Social Research Norma Romm,2007-05-08 In this book I have concentrated on drawing attention to various conceptions of accountability that might be brought to bear in judging the practice of social research Much of the book is organized around making explicit the assumptions that influence what counts as proper research in society including assumptions about how social inquirers might be held accountable My focus is on reviewing discourses around the practice of professional inquiry with a view to reconsidering the way in which people create expectations for accountable social inquiry My focus hereon is related to my concern that the manner in which judgments about researchers accountability are made is not without social consequences for our way of living in society I have approached the issues by beginning with a discussion of tenets of the position called positivism so named by certain proponents and by considering the view on

accountability that is implied by adherence to these tenets Briefly expressed positivist argumentation suggests that researchers are required to do science in a manner that warrants their being considered indeed scientists I use my discussion of accountability as seen within positivist argumentation to explicate ways in which alternative positions have arisen as ways of treating accountability issues Through my way of comparing the various positions I hope to provide some indication of the complexity of ethical and accountability issues in social inquiry
