Research Interviewing Context And Narrative:

Research Interviewing Elliot George MISHLER, Elliot George Mishler, 2009-06-30 Interviews hold a prominent place among the various research methods in the social and behavioral sciences This book presents a powerful critique of current views and techniques and proposes a new approach to interviewing At the heart of Elliot Mishler's argument is the notion that an interview is a type of discourse a speech event it is a joint product shaped and organized by asking and answering questions This view may seem self evident yet it does not guide most interview research In the mainstream tradition the discourse is suppressed Questions and answers are regarded as analogues to stimuli and responses rather than as forms of speech questions and the interviewer's behavior are standardized so that all respondents will receive the same stimulus respondents social and personal contexts of meaning are ignored While many researchers now recognize that context must be taken into account the question of how to do so effectively has not been resolved This important book illustrates how to implement practical alternatives to standard interviewing methods Drawing on current work in sociolinguistics as well as on his own extensive experience conducting interviews Mishler shows how interviews can be analyzed and interpreted as narrative accounts He places interviewing in a sociocultural context and examines the effects on respondents of different types of interviewing practice The respondents themselves he believes should be granted a more extensive role as participants and collaborators in the research process The book is an elegant work of synthesis clearly and persuasively written and supported by concrete examples of both standard interviewing and alternative methods It will be of interest to both scholars and clinicians in all the various fields for which the interview is an essential tool [Narrative Matters in Medical Contexts across Disciplines](#) Franziska Gygax, Miriam A. Selves and Identities in Narrative and Discourse Michael G. W. Bamberg, Anna De Fina, Deborah Schiffrin, 2007 The different traditions that have inspired the contributors to this volume can be divided along three different orientations one that is rooted predominantly in sociolinguistics a second that is ethnomethodologically informed and a third that came in the wake of narrative interview research All three share a commitment to view self and identity not as essential properties of the person but as constituted in discursive practices and particularly in narrative Moreover since self and identity are held to be phenomena that are contextually and continually generated they are defined and viewed in the plural as selves and identities In the attempt of moving closer toward a process oriented approach to the formation of selves and identities this volume sets the stage for future discussions of the role of narrative and discourse in this generation process and for how a close analysis of these processes can advance an understanding of the world around us and within this world of identities and selves

The Sociolinguistics of Identity Tope Omoniyi, Goodith White, 2006-11-02 Across the social and behavioural sciences there has been an increased interest in identity as a subject of inquiry Despite this there remain questions to which researchers need to find answers and challenges

to be made to older paradigms of analysis in order to continue to push the frontiers of knowledge in this research domain Identity is a problematic concept inasmuch as we recognise it now as non fixed non rigid and always being co constructed by individuals of themselves or by people who share certain core values or perceive another group as having such values This volume re examines the analytical tools employed in the sociolinguistic research of identity in order to assess their efficiency establish the roles of language in the identity claims of specific communities of people and determine the place of identity in a variety of social contexts including work places and language classrooms It will be of interest to academics and students working in sociolinguistics applied linguistics and second language learning
