Social Science Research Methodology: Concepts, Methods and Computer Applications George Kanire,2012-12-05 Document from the year 2012 in the subject Communications Methods and Research Logic Kampala International University course undergraduates and graduates language English abstract Researches fundamentals are of great importance in disciplines and interested people on searching various knowledge or solution to a phenomenon The main purpose of the book is to share scholarly knowledge about research and its complexity This book can be used to train the basics and techniques involved on doing inquiries from different views The experience shows that no one single cure for all

diseases So when comes to research there is no single research methodology or technique which fits all circumstances Hence the book tries to identify a family of approaches towards various research situations and distinguish their outcomes Thus various disciplines example human resource management accounts and project management have different environmental set up i e matters in question study elements involved and the study plan can determine research context The study consulted scholars in different disciplines through their publications that explain various research methodologies Generally the books highlighted some technical guide lines on conducting researches and report writing which provide overview on research plans In chapter one the book tried to explain how to choose among the methods of inquiries It includes the meaning of research research approaches and types Chapter two addressing the types of variables deployed in a study Either chapter three tells how to generate research idea Rather the book through chapter four described how to develop a re searchable topics Meanwhile chapter five gives explanation on how to carry out literature survey that forms a crucial party of studies Then chapter six is critically explain research designs and research management The book concludes with the application of computer software in research process Therefore the book intended to guide researchers academician and groom young researchers to conduct different inquiries This is due to the fact that human activities and environmental changes created complexity in life as well as challenges So far challenges need answers from fundamental questions such as what where who and how It is the main reason for interested groups such as researchers academician and practitioners to seek guidance during research This is done to attain answers towards fundamental questions
