*Edition* Kate L. Turabian, 2018-04-27 When Kate L. Turabian first put her famous guidelines to paper she could hardly have imagined the world in which today's students would be conducting research. Yet while the ways in which we research and compose papers may have changed, the fundamentals remain the same: writers need to have a strong research question, construct an evidence-based argument, cite their sources, and structure their work in a logical way. A Manual for Writers of Research Papers, Theses, and Dissertations, also known as Turabian, remains one of the most popular books for writers because of its timeless focus on achieving these goals. This new edition filters decades of expertise into modern standards. While previous editions incorporated digital forms of research and writing, this edition goes even further to build information literacy, recognizing that most students will be doing their work largely or entirely online and on screens. Chapters include updated advice on finding, evaluating, and citing a wide range of digital sources and also recognize the evolving use of software for citation management, graphics, and paper format and submission. The ninth edition is fully aligned with the recently released Chicago Manual of Style 17th edition as well as with the latest edition of The Craft of Research. Teachers and users of the previous editions will recognize the familiar three-part structure. Part 1 covers every step of the research and writing process, including drafting and revising. Part 2 offers a comprehensive guide to Chicago's two methods of source citation: notes/bibliography and author-date. Part 3 gets into matters of editorial style and the correct way to present quotations and visual material. A Manual for Writers also covers an issue familiar to writers of all levels: how to conquer the fear of tackling a major writing project. Through eight decades and millions of copies, A Manual for Writers has helped generations shape their ideas into compelling research papers. This new edition will continue to be the gold standard for college and graduate students in virtually all academic disciplines. Bestselling, trusted, and time-tested advice for writing research papers. The best interpretation of Chicago style for higher education students and researchers. Definitive, clear, and easy to read, with plenty of examples. Shows how to compose a strong research question, construct an evidence-based argument, cite sources, and structure work in a logical way. Essential for anyone interested in learning about research. Everything any student or teacher needs to know concerning paper writing. **A Manual for Writers of Research Papers, Theses, and Dissertations, Seventh Edition** Kate L. Turabian, 2009-08-14

Dewey Bellow, Strauss, Friedman. The University of Chicago has been the home of some of the most important thinkers of the modern age. But perhaps no name has been spoken with more respect than Turabian. The dissertation secretary at Chicago for decades, Kate Turabian literally wrote the book on the successful completion and submission of the student paper. Her Manual for Writers of Research Papers, Theses, and Dissertations, created from her years of experience with research projects across all fields, has sold more than seven million copies since it was first published in 1937. Now, with this seventh edition, Turabian's Manual has undergone its most extensive revision, ensuring that it will remain the most valuable handbook for writers at every level, from first-year undergraduates to dissertation writers apprehensively submitting final manuscripts to senior scholars who may be old hands.
