Revolution News:

The News Revolution in England Charles John Sommerville, 1996 The News Revolution in England Cultural Dynamics of Daily Information is the first book to analyze the essential feature of periodical media which is their periodicity Having to sell the next issue as well as the present one changes the relation between authors and readers or customers and subtly shapes the way that everything is reported whether politics the arts and science or social issues So there are certain biases that are implicit in the dynamics of news production or commodified information quite apart from the intentions of journalists With the birth of the commercial periodical in late seventeenth century England news became a commodity What constituted news how it was presented and received and how people responded to it underwent a fundamental change Rather than any democratic print revolution in which the masses suddenly had access to cheap and accessible information C John Sommerville shows that the arrival of the commercial press was in fact restrictive dictating what was discussed and ultimately how it was discussed The News Revolution in England looks at the history of journalism from an entirely different angle the effect of the medium rather than the intentions of the journalists It will be of interest to historians of England journalism and news along with anyone interested in how the media shapes our world and how we come to relate to it

Popkin, 2014-10-17 As television screens across America showed Chinese students blocking government tanks in Tiananmen Square the fall of the Berlin Wall and missiles searching their targets in Baghdad the connection between media and revolution seemed more significant than ever In this book thirteen prominent scholars examine the role of the communication media in revolutionary crises from the Puritan Revolution of the 1640s to the upheaval in the former Czechoslovakia Their central question Do the media in fact have a real influence on the unfolding of revolutionary crises On this question the contributors diverge some arguing that the press does not bring about revolution but is part of the revolutionary process others downplaying the role of the media Essays focus on areas as diverse as pamphlet literature newspapers political cartoons and the modern electronic media The authors wide ranging views form a balanced and perceptive examination of the impact of the media on the making of history

Brown, 2017-04-24 As Castro's democratic reform movement veered off course a revolution that seemed to signal the death knell of dictatorship in Latin America brought about its tragic opposite Jonathan C Brown examines in forensic detail how the turmoil that rocked a small Caribbean nation in the 1950s became one of the century's most transformative events

Global Histories of the Portuguese Revolution Luís Trindade, Rita Lucas Narra, Ricardo Noronha, Pedro Ramos Pinto, 2025-05-29 The Portuguese revolution marked the closure of the country's five centuries of imperial history as well as its 48 year authoritarian period a dramatic moment of political radicalization and social conflict that took place against the backdrop of rapid social transformation in an increasingly globalised world This collection goes beyond the limits of national history to locate the revolution at the intersection of transnational historical phenomena such as the long 1960s the Cold War the emergence of the Third World and postwar modernization Foregrounding the complex geographies and chronologies of semi peripheral Portugal this book combines its status as the centre of a global Empire with its subaltern position in Europe Offering a new global approach to this still understudied event chapters explore transnational socialist and grassroots forms of solidarity processes of global communication and Cultural Revolution decolonization feminism and socio economic transformations to offer a non Eurocentric global history from within Europe itself

Serial Revolutions 1848 Clare Pettitt, 2022-02-10 1848 was a pivotal moment not only in Europe but in much of the rest of the world too Marx's scornful dismissal of the revolutions created a historiography for 1848 that has persisted for more than 150 years *Serial Revolutions 1848* shows how far from being the failure that Karl Marx claimed them to be the revolutions of 1848 were a powerful response to the political failure of governments across Europe to care for their people Crucially this revolutionary response was the result of new forms of representation and mediation until the ragged and the angry could see themselves represented and represented as a serial phenomenon such a political consciousness was impossible By the 1840s the developments in printing transport and distribution discussed in Clare Pettitt's *Serial Forms The Unfinished Project of Modernity 1815 1848* Oxford University Press 2020 had made the social visible in an unprecedented way This print revolution led to a series of real and bloody revolutions in the streets of European cities The revolutionaries of 1848 had the temerity to imagine universal human rights and a world

in which everyone could live without fear hunger or humiliation If looked at like this the events of 1848 do not seem such poor incidents as Marx described them nor such an embarrassing failure after all Returning to 1848 we can choose to look back on that springtime of the peoples as a moment of tragi comic failure obliterated by the brutalities that followed or we can look again and see it as a proleptic moment of stored potential an extraordinary series of events that generated long distance and sustainable ideas about global citizenship international co operation and a shared and common humanity which have not yet been fully understood or realised The Illustrated London News ,1923 **The Oxford Handbook of the French Revolution** David Andress,2015-01-22 The Oxford Handbook of the French Revolution brings together a sweeping range of expert and innovative contributions to offer engaging and thought provoking insights into the history and historiography of this epochal event Each chapter presents the foremost summations of academic thinking on key topics along with stimulating and provocative interpretations and suggestions for future research directions Placing core dimensions of the history of the French Revolution in their transnational and global contexts the contributors demonstrate that revolutionary times demand close analysis of sometimes tiny groups of key political actors whether the king and his ministers or the besieged leaders of the Jacobin republic and attention to the deeply local politics of both rural and urban populations Identities of class gender and ethnicity are interrogated but so too are conceptions and practices linked to citizenship community order security and freedom each in their way just as central to revolutionary experiences and equally amenable to critical analysis and reflection This Handbook covers the structural and political contexts that build up to give new views on the classic question of the origins of revolution the different dimensions of personal and social experience that illuminate the political moment of 1789 itself the goals and dilemmas of the period of constitutional monarchy the processes of destabilisation and ongoing conflict that ended that experiment the key issues surrounding the emergence and experience of terror and the short and long term legacies for both good and ill of the revolutionary trauma for France and for global politics Printing Trade News ,1911 **The First Texas News Barons** Patrick L. Cox,2009-04-20 Newspaper publishers played a crucial role in transforming Texas into a modern state By promoting expanded industrialization and urbanization as well as a more modern image of Texas as a southwestern rather than southern state news barons in the early decades of the twentieth century laid the groundwork for the enormous economic growth and social changes that followed World War II Yet their contribution to the modernization of Texas is largely unrecognized This book investigates how newspaper owners such as A H Belo and George B Dealey of the Dallas Morning News Edwin Kiest of the Dallas Times Herald William P Hobby and Oveta Culp Hobby of the Houston Post Jesse H Jones and Marcellus Foster of the Houston Chronicle and Amon G Carter Sr of the Fort Worth Star Telegram paved the way for the modern state of Texas Patrick Cox explores how these news barons identified the needs of the state and set out to attract the private investors and public funding that would boost the state s civic and military infrastructure oil and gas industries real estate market and agricultural production He shows how

newspaper owners used events such as the Texas Centennial to promote tourism and create a uniquely Texan identity for the state To balance the record Cox also demonstrates that the news barons downplayed the interests of significant groups of Texans including minorities the poor and underemployed union members and a majority of women
