Kessler, 2013-05-06 In the quarter century from San Francisco's devastating fire of 1906 to the beginning of the Great Depression as automobiles exploded in popularity new buildings had to be conceived and constructed to provide parking space and repair facilities This book studies a number of the resulting public garages that featured facade designs based on historical architectural styles Considering the garages function the facades exhibit a surprising grace and nobility Through an analysis complemented by photographs including sixty by noted architectural photographer Sharon Risedorff and drawings the author dissects the architectural and cultural factors that lie at the heart of this unexpected merit Addressing the discrepancy between the buildings beauty and the assumption that old garages are unsightly and disposable the book examines them as cultural artifacts of the dawn of the Motor Age The garage is presented as a new form of transportation depot employing architectural symbolism to celebrate the ascendancy of the automobile over the train Today the surviving buildings are vulnerable to real estate development in part because their quality is misunderstood The book a fresh perspective on the value of older utilitarian buildings concludes with a call to preserve these structures and adapt them to compatible new uses

Pathways through Crisis Carl A. Maida, 2008-12-16 When densely populated urban areas face severe crises natural disasters epidemics sudden unemployment massive immigration they often find that established mechanisms cannot respond adequately to the problems Carl Maida argues that solutions to these problems tend to be developed within the affected communities themselves In Pathways through Crisis he draws on his two decades of work in ethnography and with crisis centers in the Los Angeles area to study the kinds of informal organizations that arise at the grass roots level in order to deal with severe crises This ground breaking examination of responses to urban disaster suggests how both informal and formal organizations can be developed to serve people under extreme duress

the development of urban transport which transcends the boundaries between academic disciplines Based on a discussion of the diversity of megacities worldwide it provides help in navigating the complexity of megacity mobility culture Experts from megacities around the world each take the reader on a journey to their own city and its mobility culture giving a deeper insight into the unique evolutionary paths of mobility that these places have taken and what lies before them Whilst acknowledging the overwhelming diversity of cities worldwide the authors also identify common denominators behind the evolution of urban transport systems seven temperaments which are found in a unique mix in any given city defining the character of its mobility culture The Institute for Mobility Research is a research facility of the BMW Group It deals with future developments and challenges relating to mobility across all modes of transport with automobility being only one aspect among many Taking on an international perspective ifmo s activities focus on social science and sociopolitical economic and ecological issues but also extend to cultural questions related to the key challenges facing the future of mobility The work of the Institute is supported by an interdisciplinary board of renowned scientists and scholars and by representatives of BMW Deutsche Bahn Lufthansa MAN Siemens and The World Bank
