Los Tamanos:

Acerca de los tamaños y las distancias del Sol y de la Luna Aristarco de Samos. Edición, traducción de Christián C. Carman, Rodolfo P. Buzón, 2020-03-11 A qué distancia de la Tierra se encuentra el Sol y la Luna. ¿Qué relación de tamaño mantienen entre sí estos astros? En este brillante tratado Aristarco de Samos da la primera respuesta científica de la que tenemos conocimiento a estas preguntas. Se trata sin duda de una obra fundacional, pues nunca antes se había aplicado la geometría al estudio del cielo y los métodos utilizados se convirtieron en clásicos. Fueron los núcleos de que dispusieron los astrónomos hasta la época de Kepler. Esta edición bilingüe ofrece la primera traducción completa al castellano del tratado de Aristarco junto con el texto griego y los comentarios procedentes de la versión latina del médico y matemático renacentista Commandino, una selección de los escolios más relevantes y un amplio estudio preliminar que hacen de este volumen una auténtica obra de referencia.

The Cuba Review and Bulletin, 1905 Wool and Cotton Reporter and Financial Gazette, 1915 **Dam Maintenance and Rehabilitation** M. Cabrera, 2017-12-04 During the life of a dam, changes in safety standards, legislation and land use will inevitably occur and functional deterioration may also appear. To meet these challenges, these Proceedings from a panel of international experts assess, define and re-evaluate the design criteria for the construction of dams and the many attendant issues in ongoing maintenance and management. Authors include international specialists, academics, professionals and those in local government, utilities and suppliers. Practitioners from these same fields will find the book a useful tool in acquiring a comprehensive knowledge of managing and retrofitting dams so that they can continue to meet society's needs.

Impact Evaluation in Practice; La Evaluación de Impacto en la Práctica Paul J. Gertler, Sebastian Martinez, Patrick Premand, Laura B. Rawlings, Christel M. J. Vermeersch, 2011-06-13 This book offers an accessible introduction to the topic of impact evaluation and its practice in development. While the book is geared principally towards development practitioners and policymakers designing prospective impact evaluations, we trust that it will be a valuable resource for students and others interested in using impact evaluation. Prospective impact evaluations should be used selectively to assess whether or not a program has

achieved its intended results or to test alternatives for achieving those results We consider that more and better impact evaluation will help strengthen the evidence base for development policies and programs around the world If governments and development practitioners can make policy decisions based on evidence including evidence generated through impact evaluation our hope is that development resources will be spent more effectively and ultimately have a greater impact on reducing poverty and improving people s lives The three chapters in this handbook provide a non technical introduction to impact evaluations including Why Evaluate in Chapter 1 How to Evaluate in Chapter 2 and How to Implement Impact Evaluations in Chapter 3 These elements are the basic tools needed in order to successfully carry out an impact evaluation From a methodological standpoint our approach to impact evaluation is largely pragmatic we think that the most appropriate methods should be identified to fit the operational context and not the other way around This is best achieved at the outset of the program through the design of prospective impact evaluation that can be built into the project s implementation We argue that gaining consensus between key stakeholders and identifying an evaluation design that fits the political and operational context is as important as the method itself We also believe strongly that impact evaluations should be upfront about their limitations and caveats Finally we strongly encourage policymakers and program managers to consider impact evaluations in a logical framework that clearly sets out the causal pathways by which the program works to produce outputs and influence final outcomes and to combine impact evaluations with monitoring and selected complementary evaluation approach to gain a full picture of performance This book builds on a core set of teaching materials developed for the Turning Promises to Evidence workshops organized by the office of the Chief Economist for Human Development HDNCE in partnership with regional units and the Development Economics Research Group DECRG at the World Bank
