Lost Millennium Iii Lost Days:

The Lost Millennium Florin Diacu, 2010-07-23 Have you ever wondered how we really know what year it is Part detective story part conspiracy theory part scientific history The Lost Millennium explores the astonishing possibility that our calendar is out by a thousand years A chance conversation at a conference in Mexico started mathematician Florin Diacu on an amazing journey to make sense of one of the strangest and if true most revolutionary theories you ll ever encounter To understand how scientists could be sceptical about what year it is Florin Diacu explores the fascinating history of chronology from Egyptian horoscopes to the work of Isaac Newton with cameos by Voltaire and Edmund Halley making the startling discovery that our calendar is far from ironclad It all depends rather on the dating of ancient events about which there is real controversy At once accessible and profound The Lost Millennium examines the arguments of present day chronological revisionists such as the Russian scholar Anatoli Fomenko who claims that our system of dating is horribly askew Fomenko cites evidence from ancient astronomy linguistics and cartography and a crucial manuscript by Ptolemy staking his scientific prestige on a theory so controversial that it will change the way you think about time history and the calendar on your wall The field has also inspired its share of now discredited cranks such as Immanuel Velikovsky a media celebrity of the 1950s His notorious book *Worlds in Collision* argued that biblical events are incorrectly dated Beautifully written and peopled with fascinating characters from past and present The Lost Millennium is essential reading for anyone who believes they re living in the year 2005

Haldeman-Julius Quarterly , 1927 *Strikes Around the World, 1968-2005* , 2007 Are strikes going out of fashion or are they an inevitable feature of working life This is a longstanding debate The much proclaimed withering away of the strike in the 1950s was quickly overturned by the resurgence of class conflict in the late 1960s and 1970s The period since then has been characterized as one of labor quiescence Commentators again predict the strikes demise at least in the former heartlands of capitalism Patterns of employment are constantly changing and strike activity reflects this The continuing decline of manufacturing in mature industrialized economies is of major importance here though the global relocation of manufacturing may lead to some relocation of strikes Simultaneously we see the growth of disputes in the service sector the tertiarization of strikes This is evident particularly in public services including health care social care and education and is accompanied by a feminization of strikes given the prevalence of women working there This unique study draws on the experience of fifteen countries around the world South Africa Argentina Canada Mexico United States Korea Australia New Zealand Belgium Denmark France Germany the Netherlands Sweden and the United Kingdom Covering the high and low points of strike activity over the period 1968 2005 the study shows continuing evidence of the durability adaptability and
