Natures Paradise:

Natures in Translation Alan Bewell, 2017-01-02 Understanding the dynamics of British colonialism and the enormous ecological transformations that took place through the mobilization and globalized management of natures For many critics Romanticism is synonymous with nature writing for representations of the natural world appear during this period with a freshness concreteness depth and intensity that have rarely been equaled Why did nature matter so much to writers of the late eighteenth and early nineteenth centuries And how did it play such an important role in their understanding of themselves and the world In *Natures in Translation* Alan Bewell argues that there is no Nature in the singular only natures that have undergone transformation through time and across space He examines how writers as disparate as Erasmus and Charles Darwin Joseph Banks Gilbert White William Bartram William Wordsworth John Clare and Mary Shelley understood a world in which natures were traveling and resettling the globe like never before Bewell presents British natural history as a translational activity aimed at globalizing local natures by making them mobile exchangeable comparable and representable Bewell explores how colonial writers in the period leading up to the formulation of evolutionary theory responded to a world in which new natures were coming into being while others disappeared For some of these writers colonial natural history held the promise of ushering in a cosmopolitan nature in which every species through trade and exchange might become a true citizen of the world Others struggled with the question of how to live after the natures they depended upon were gone Ultimately *Natures in Translation* demonstrates that far from being separate from the dominant concerns of British imperial culture nature was integrally bound up with the business of empire *Listening to British Nature* Michael Guida, 2022 *Listening to British Nature* Wartime Radio and Modern Life 1914 1945 argues that trench warfare created new practices of listening to nature in order to cultivate an intimate connection with its vibrations to understand danger and to imagine survival In focusing on the sensing of sounds and rhythms this study demonstrates how nature retained its emotional potency as the pace of life seemed to increase and new man made sounds and sonic media appeared all around *Nature's Bounty* Anthony N. Penna, 2016-07-01 This thorough clearly organized text focuses on four major environmental categories forests and land wildlife and wildlife habitat water and drinking water quality and air Each category is treated historically from the time of exploration and discovery in the seventeenth century to the present There are also discussions on environmental public policy issues currently in our national debate The text is integrated throughout with fascinating primary source documents eyewitness accounts government reports and documents speeches and congressional testimony which illuminate the material *Heart's Window* Robyn Charlesworth, 2016-08-27 *Heart's Window* Light and Shade is a compilation of poetry prose and musings about this journey we call life There are amusing stories uplifting and heartfelt reflections and celebrations and observations of life in all its variety As you read you'll move through the pages getting to know the author as you go and by the last page you'll know her like a friend *The Sights, Sounds, and Flavors of the Caribbean* Pasquale De

Nature's Pharmacopeia Dan Choffnes,2016-08-09 This beautifully illustrated elegantly written textbook pairs the best research on the biochemical properties and physiological effects of medicinal plants with a fascinating history of their use throughout human civilization revealing the influence of nature s pharmacopeia on art war conquest and law By chronicling the ways in which humans have cultivated plant species extracted their active chemical ingredients and

investigated their effects on the body over time Nature's Pharmacopeia also builds an unparalleled portrait of these special herbs as they transitioned from wild flora and botanical curiosities to commodities and potent drugs The book opens with an overview of the use of medicinal plants in the traditional practices and indigenous belief systems of people in the Americas Africa Asia and ancient Europe It then connects medicinal plants to the growth of scientific medicine in the West Subsequent chapters cover the regulation of drugs the use of powerful plant chemicals such as cocaine nicotine and caffeine in various medical settings and the application of biomedicine's intellectual frameworks to the manufacture of novel drugs from ancient treatments Geared toward nonspecialists this text fosters a deep appreciation of the complex chemistry and cultural resonance of herbal medicine while suggesting how we may further tap the vast repositories of the world's herbal knowledge to create new pharmaceuticals

Environment and Tourism Andrew Holden, 2016-04-25 The global demand for tourism continues to increase as economic growth creates opportunities for its consumption as a lifestyle option across cultures The spatial reach of recreational tourism into remoter environments reflects a desire to reconnect to nature that is partially created by the global trend toward urbanisation At the same time anthropogenic created environmental problems have led us to re-evaluate our relationship to nature and the values that are held by the environment This third edition of Environment and Tourism incorporates additional material on environmental philosophies and ontologies of nature and how these influence our understanding of tourism's relationship with the natural environment In an epoch representing a critical juncture for the future well-being of the planet based on our relationship to nature the text has been updated to reflect the growth in significance of the interaction between tourism and the natural environment as a part of this discourse It communicates a range of key conceptual debates on the ethics and economics of the consuming nature for tourism and relates these to real world examples whilst evaluating environmental planning and management responses The book seeks to highlight the relevance of the significance of tourism for nature within the framework of society as a system of interconnected places across space and time exploring the relationship of the environments of where tourists come from with the ones that they travel to The updated features include new chapters on philosophies and constructs of the environment environmental ethics and tourist consumption an extensive range of international case studies used to illustrate the theoretical ideas presented boxes offering bite-sized insights and think points designed to encourage students to further engage with the topics discussed Environment and Tourism emphasises a holistic view of the tourism system and how it interacts with nature illustrating the positive and negative effects of this relationship It emphasises how ontologies of the environment influence the planning and management of tourism for natural resource conservation and human development It is an invaluable tool for anyone studying Human Geography Tourism and Environmental Studies as well as for policy makers and consultants working in the field of tourism development

Windshield Wilderness David Louter,2009-11-23 In his engaging book Windshield Wilderness David Louter explores the relationship between automobiles and national parks and how together they have shaped our ideas of wilderness National parks he argues did not develop as places set aside from the modern world but rather came to be known and appreciated through technological progress in the form of cars and roads leaving an enduring legacy of knowing nature through machines With a lively style and striking illustrations Louter traces the history of Washington State s national parks Mount Rainier Olympic and North Cascades to illustrate shifting ideas of wilderness as scenic as roadless and as ecological reserve He reminds us that we cannot understand national parks without recognizing that cars have been central to how people experience and interpret their meaning and especially how they perceive them as wild places Windshield Wilderness explores what few histories of national parks address what it means to view parks from the road and through a windshield Building upon recent interpretations of wilderness as a cultural construct rather than as a pure state of nature the story of autos in parks presents the preservation of wilderness as a dynamic and nuanced process Windshield Wilderness illuminates the difficulty of separating human modified landscapes from natural ones encouraging us to recognize our connections with nature in national parks
