Real Relations:

The Metaphysics of Relations Anna Marmodoro, David Yates, 2016-01-07 This volume presents thirteen original essays which explore both traditional and contemporary aspects of the metaphysics of relations. It is uncontroversial that there are true relational predications: Abelard loves Eloise, Simmias is taller than Socrates, smoking causes cancer, and so forth. More controversial is whether any true relational predications have irreducibly relational truthmakers. Do any of the statements above involve their subjects jointly instantiating polyadic properties, or can we explain their truths solely in terms of monadic, non-relational properties of the relata? According to a tradition dating back to Plato and Aristotle and continued by medieval philosophers, polyadic properties are metaphysically dubious. In non-symmetric relations such as the amatory relation, a property would have to inhere in two things at once: lover and beloved, but characterise each differently, and this puzzled the ancients. More recent work on non-symmetric relations highlights difficulties with their directionality. Such problems offer clear motivation for attempting to reduce relations to monadic properties. By contrast, ontic structural realists hold that the nature of physical reality is exhausted by the relational structure expressed in the equations of fundamental physics. On this view, there must be some irreducible relations, for its fundamental ontology is purely relational. *The Metaphysics of Relations* draws together the work of a team of leading metaphysicians to address topics as diverse as ancient and medieval reasons for scepticism about polyadic properties, recent attempts to reduce causal and spatiotemporal relations, recent work on the directionality of relational properties, powers ontologies, and their associated problems, whether the most promising interpretations of quantum mechanics posit a fundamentally relational world, and whether the very idea of such a world is coherent. From those who question whether there are relational properties at all to those who hold they are a fundamental part of reality, this book covers a broad spectrum of positions on the nature and ontological status of relations from antiquity to the present day. *Thomas Seebohm on the Foundations of the Sciences* Thomas Nenon, 2020-02-03 This book explores the work of Thomas Seebohm (1934–2014), a leading phenomenologist and hermeneuticist. It features papers that offer a critical and constructive dialogue about Seebohm's analyses and their implications for the sciences. The net result is an in-depth study and a helpful overview of Seebohm's general approach and his specific views on various areas of modern science. The contributors focus especially upon his final text, *History as a Science and the System of the Sciences*. They view this as the culmination and summary of his historical and phenomenological investigations into the foundations, nature, and limits of modern sciences. This includes not just history but the *Geisteswissenschaften* more generally, along with the social and natural sciences as well. The essays in this volume reflect that range. This volume presents insightful discussions about the nature and legitimacy of the human sciences as sciences and the unique character of the social sciences. It will be of interest not just as a matter of historical scholarship but also, and above all, as an important contribution to phenomenology and to the philosophy of science and the sciences as such. It deserves attention by scholars from any philosophical tradition interested in

thinking about the foundations of their disciplines and a philosophy of science that includes but is not limited to the natural sciences

Compendium of Theology Saint Thomas Aquinas, Aeterna Press, 1992 To restore man who had been laid low by sin to the heights of divine glory the Word of the eternal Father though containing all things within His immensity willed to become small This He did not by putting aside His greatness but by taking to Himself our littleness No one can say that he is unable to grasp the teaching of heavenly wisdom what the Word taught at great length although clearly throughout the various volumes of Sacred Scripture for those who have leisure to study He has reduced to brief compass for the sake of those whose time is taken up with the cares of daily life Man's salvation consists in knowing the truth so that the human mind may not be confused by divers errors in making for the right goal so that man may not fall away from true happiness by pursuing wrong ends and in carrying out the law of justice so that he may not besmirch himself with a multitude of vices Aeterna Press

This book consists of seven chapters containing multiple questions of the global socially epistemological situation in science and higher education Despite the progress of techno sciences we are facing blind flaws in leading systems of knowledge and perception The global era in a paradox way connects the new knowledge of economics postpolitics postdemocracy and biopolitical regulation of live and unrepresentable forms of the global geo located violence Techno optimism and techno dictatorship in the twenty first century coincide with the ideology of market biopolitics of mandatory satisfaction religious revivalism and collapse of higher education In order for sciences to recover it is necessary to make a globally epistemological and moral turn toward the truth The book shows that when joint desires of the new economics of knowledge and technology erase epistemology in a way to assign definitions of knowledge and rules and practices of the public usage of the mind then the time for epistemology is on its way **And in Our Hearts Take Up Thy Rest** Michael Eades,2019-07-26

In his seminary classes and his writings Frederick Crowe SJ 1915 2012 sought to understand anew the eternal identity of the Holy Spirit and the Spirit s role in the Church s life Despite Crowe s fame as a professor of Trinitarian theology and his groundbreaking work on Thomas Aquinas doctrine of complacent love as an analogy for the Holy Spirit s eternal procession no book has ever been published on this influential Canadian Jesuit who set up centres around the world for the study of the thought of Bernard Lonergan SJ 1904 84 Drawing on Crowe s published works and archival material Eades emphasizes how Crowe s Trinitarian pneumatology modestly and creatively extended Lonergan s theology of the Holy Spirit Making use of Crowe s own historical methodology Eades looks for the emergence of new and significant questions about the Holy Spirit in Crowe s works **The Pursuit of Belief - Christian Classics Collection** Johann

Relational Intentionality: Brentano and the Aristotelian Tradition Hamid Taieb, 2018-12-28 This book sheds new light on the history of the philosophically crucial notion of intentionality which accounts for one of the most distinctive aspects of our mental life the fact that our thoughts are about objects Intentionality is often described as a certain kind of relation Focusing on Franz Brentano who introduced the notion into contemporary philosophy and on the Aristotelian tradition which was Brentano's main source of inspiration the book reveals a rich history of debate on precisely the relational nature of intentionality It shows that Brentano and the Aristotelian authors from which he drew not only addressed the question whether intentionality is a relation but also devoted extensive discussions to what kind of relation it is if any The book aims to show that Brentano distinguishes the intentional relation from two other relations with which it might be confused namely causality and reference which also hold between thoughts and their objects Intentionality accounts for the aboutness of a thought causality by contrast explains how the thought is generated and reference understood as a sort of similarity occurs when the object towards which the thought is directed exists Brentano claims to find some anticipation of his views in Aristotle This book argues that whether or not Brentano's interpretation of Aristotle is correct his claim is true of the Aristotelian tradition as a whole since followers of Aristotle more or less explicitly made some or all of Brentano's distinctions This is demonstrated through examination of some major figures of the Aristotelian tradition broadly understood including Alexander of Aphrodisias the Neoplatonic commentators Thomas Aquinas Duns Scotus and Francisco Suarez This book combines a longue dure approach focusing on the long term evolution of philosophical concepts rather than restricting itself to a specific author or period with systematic analysis in the history of philosophy By studying Brentano and the Aristotelian authors with theoretical sensitivity it also aims to contribute to our understanding of intentionality and cognate features of the mind

 Mullins, 2016-01-07 The claim that God is timeless has been the majority view throughout church history However it is not
 obvious that divine timelessness is compatible with fundamental Christian doctrines such as creation and incarnation

Theologians have long been aware of the conflict between divine timelessness and Christian doctrine and various solutions to these conflicts have been developed In contemporary thought it is widely agreed that new theories on the nature of time can further help solve these conflicts Do these solutions actually solve the conflict Can the Christian God be timeless The End of the Timeless God sets forth a thorough investigation into the Christian understanding of God and the God world relationship It argues that the Christian God cannot be timeless
