Real Time Programming 1999 A.H. Frigeri, W.A. Halang, S.H. Son, 1999 In 1999 the IFAC IFIP Workshop on Real Time Programming WRTP joined forces with the Workshop on Active and Real Time Database Systems ARTDB Both series of workshops provide an excellent forum for exchanging information on recent scientific and technological advances and practices in real time computing a field that is becoming an essential enabling discipline of both control engineering and computer science and engineering The annual Workshop on Real Time Programming and the bi annual Workshop on Active and Real time Databases Systems are intended as meetings of relatively small numbers of experts in their fields taking place as truly international events The 1999 Workshop maintained the outstanding quality of both series providing an opportunity to assess the state of the art to present new results and to discuss possible lines of future developments Primarily it focused on software development for real time systems real time operating systems and active and real time database systems In particular the technical programme of the Workshop covered latest research and developments in requirements engineering software engineering active and real time database systems communication and clock synchronisation embedded systems formal methods operating systems and scheduling Out of 58 submissions from 19 countries the International Programme Committee selected 26 regular papers and 8 reserve papers for presentation at the Workshop Contributions come from Europe North America Australia and the Far East In addition to these the programme also featured two world renowned keynote speakers and a discussion panel about the state of the art in the field of active real time database systems

Real-time Programming 2000 (WRTP'2000) Alfons Crespo, Joan Vila, 2000 This Proceedings contains the papers presented at the IFAC Workshop on Real Time Programming held in Spain During these last twelve years the Workshop on Real Time Programming WRTP has developed as an excellent forum for presenting the most relevant advances in the field of real time computing and exchanging information and experiences among the real time community Several of the most relevant people of this community have participated in the reviewing process that plays every time a more important role This year 48 papers from 16 different countries have been submitted to the Workshop After the review process 31 of them have been selected for presentation including 2 industrial papers They cover topics of formal methods scheduling distributed systems embedded systems design techniques applications etc Their discussion proved to be interesting and productive and we are sure that it helped to throw light on some of the aspects of Real Time Programming WRTP 2000 was organised in co operation with another event related to the real time field the Workshop on Algorithms and Architecture for Real Time Control AARTC Both Workshops were scheduled with a common day of joint activities This experience increased the level of cooperation and information exchanging between this two research communities which have several aspects in common Handbook of Real-Time and Embedded Systems Insup Lee, Joseph Y-T. Software Engineering - ESEC/FSE '99 Oskar Nierstrasz, Michel Lemoine, 1999-08-30 For the second time the European Software Engineering Conference is being held jointly with the ACM SIGSOFT Symposium on the Foundations of Software Engineering FSE Although the two conferences have different origins and traditions there is a significant overlap in intent and subject matter Holding the conferences jointly when they are held in Europe helps to make these thematic links more explicit and encourages researchers and practitioners to attend and submit papers to both events The ESEC proceedings have traditionally been published by Springer Verlag as they are again this year but by special arrangement the proceedings will be distributed to members of ACM SIGSOFT as is usually the case for FSE ESEC FSE is being held as a single event rather than as a pair of colocated events Submitted papers were therefore evaluated by a single program committee ESEC FSE represents a broad range of software engineering topics in mainly two continents and consequently the program committee members were selected to represent a spectrum of both traditional and emerging software engineering topics A total of 141 papers were submitted from around the globe Of these nearly half were classified as research papers a quarter as experience papers and the rest as both research and experience papers Twenty nine papers from five continents were selected for presentation and inclusion in the proceedings Due to the large number of industrial experience reports submitted we have also introduced this year two sessions on short case study presentations
